Guna memperoleh gambaran kondisi risiko yang menyeluruh dan berkesinambungan, Bank Mandiri Taspen menyusun laporan Profil Risiko Bank setiap triwulan dan Laporan penilaian Tingkat Kesehatan Bank dengan menggunakan pendekatan risiko (Risk Based Bank Rating/RBBR) setiap semester, yang keduanya dilaporkan kepada Otoritas Jasa Keuangan.

Laporan profil risiko tersebut mencakup penilaian atas risiko yang melekat dalam kegiatan bisnis Bank (*inherent risk*) serta kualitas penerapan Manajemen Risiko terhadap 8 (delapan) jenis risiko, yaitu risiko kredit, pasar, likuiditas, operasional, hukum, strategik, reputasi, dan kepatuhan. The amount of remuneration was determined based on resolutions of the General Meeting of Shareholders (GMS) and could be delegated to the Bank's Board of Commissioners. The determination of remuneration consisted of:

- Fixed Remuneration:

- Variable Remuneration:
Remuneration linked to performance and risk, including bonuses or other equivalent forms. The policy for variable remuneration was provided in cash. Such variable remuneration could not be hedged by Material Risk Takers.

- Malus: A policy implemented by the Bank based on certain criteria, allowing the deferral of part or all of the deferred Variable Remuneration.
- Clawback: A policy implemented by the Bank in the form of an agreement between the Bank and members of the Board of Directors, members of the Board of

Direksi, anggota Dewan Komisaris atau Pegawai setuju untuk mengembalikan Remunerasi yang Bersifat Variabel yang diterima sesuai kriteria yang ditetapkan Bank.

Bank menentukan metode pengukuran kinerja dan jenis risiko dalam menetapkan pemberian Remunerasi yang Bersifat Variabel bagi Direksi, Dewan Komisaris, dan Pegawai Bank. Dari pengukuran kinerja ini kemudian ditetapkan Material Risk Taker (MRT) yang dilakukan berdasarkan:

1. Kriteria Material Risk Taker (MRT) Direksi/Dewan Komisaris/Pegawai yang mendapat Remunerasi yang bersifat Variabel dengan nilai besar.
2. Remunerasi yang Bersifat Variabel dengan nilai besar Bank dapat menagguhkan pembayaran Remunerasi yang Bersifat Variabel kepada pihak yang menjadi Material Risk Taker (MRT) sebesar presentase tertentu yang disesuaikan dengan tingkat jabatan.

Penangguhan Remunerasi yang Bersifat Variabel bagi MRT

Bank dapat menunda pembayaran Remunerasi yang Bersifat Variabel yang ditangguhkan (Malus) atau menarik kembali Remunerasi yang Bersifat Variabel yang sudah dibayarkan (Clawback) kepada pihak yang menjadi Material Risk Takers dalam kondisi tertentu. Pihak yang menjadi Material Risk Takers dilarang melakukan lindung nilai atas Remunerasi yang Bersifat Variabel yang ditangguhkan. Penangguhan Remunerasi yang Bersifat Variabel untuk MRT dilakukan berdasarkan:

1. Besarnya penangguhan pembayaran Remunerasi yang Bersifat Variabel berdasarkan tingkat Jabatan yaitu semakin tinggi tingkat Jabatan maka semakin besar persentase Remunerasi yang Bersifat Variabel yang ditangguhkan.
2. Remunerasi yang Bersifat Variabel diberikan dalam bentuk tunai serta dalam bentuk saham atau instrumen yang berbasis saham yang diterbitkan Bank maka penangguhan dilakukan terhadap semua bentuk Remunerasi yang Bersifat Variabel tersebut.

Penerapan Malus dan/atau Clawback dilakukan dengan risiko yang seminimal mungkin, perlu memperhatikan hal-hal antara lain memperhatikan aspek hukum dan perpajakan, Penerapan Malus dan Clawback bagi anggota Direksi, anggota Dewan Komisaris atau Pegawai yang ditetapkan menjadi MRT baik yang masih bekerja maupun yang sudah tidak bekerja di Bank dilakukan sebagai berikut:

- a. Malus diterapkan terhadap Remunerasi yang Bersifat Variabel yang masih ditangguhkan.
- b. Clawback diterapkan terhadap Remunerasi yang Bersifat Variabel yang sudah dibayarkan.

Commissioners, or employees, whereby they agree to return Variable Remuneration received in accordance with criteria determined by the Bank.

The Bank determines the performance measurement method and risk type in determining the provision of Variable Remuneration for the Board of Directors, Board of Commissioners, and Bank Employees. Based on this performance measurement, the Material Risk Taker (MRT) is determined based on:

1. Material Risk Taker (MRT) criteria for Directors/Board of Commissioners/Employees receiving substantial Variable Remuneration.
2. For substantial Variable Remuneration, the Bank may defer payment of Variable Remuneration to parties who are Material Risk Takers (MRT) by a certain percentage adjusted for their position level.

Deferral of Variable Remuneration for MRT

Banks may defer the payment of deferred Variable Remuneration (Malus) or clawback paid Variable Remuneration to Material Risk Takers under certain circumstances. Material Risk Takers are prohibited from hedging their deferred Variable Remuneration. Deferral of Variable Remuneration for MRT is based on:

1. The amount of deferral of Variable Remuneration payment is based on the position level; the higher the position level, the greater the percentage of deferred Variable Remuneration.
2. If Variable Remuneration is provided in cash or in shares or share-based instruments issued by the Bank, the deferral applies to all forms of Variable Remuneration.

The implementation of Malus and/or Clawback was carried out with minimal risk, taking into account, among others, legal and tax considerations. The application of Malus and Clawback to members of the Board of Directors, members of the Board of Commissioners, or employees designated as Material Risk Takers (MRT), whether still employed or no longer employed by the Bank, was conducted as follows:

- a. Malus was applied to Variable Remuneration that remained deferred.
- b. Clawback was applied to Variable Remuneration that had already been paid.

Nilai besar yang menjadi faktor penentu Material Risk Taker adalah remunerasi variabel dengan besaran remunerasi lebih dari 10 (sepuluh) kali gaji yang diterima sebagai remunerasi variabel pegawai, sedangkan untuk Direksi dan Dewan Komisaris ditentukan berdasarkan persetujuan pemegang saham atas usulan yang disampaikan oleh komite remunerasi melalui Komisaris.

Bank memilih menggunakan sistem malus dalam melakukan penangguhan pembayaran remunerasi variabel dengan komposisi persentase sebagai berikut:

No	Posisi Position	Malus	H+1 Tahun H+1 Year	H+2 Tahun H+2 Years	H+3 Tahun H+3 Years
1	Direksi dan Komisaris Board of Directors and Board of Commissioners	20%	10%	5%	5%
2	Business Unit/Risk Taking Unit Business Unit/Risk Taking Unit	20%	10%	5%	5%
3	Supporting Unit/control unit Supporting Unit/control unit	10%	5%	2,50%	2,50%

Jangka waktu penangguhan pembayaran remunerasi yang bersifat variabel adalah selama 3 (tiga) tahun sejak pembayaran remunerasi variabel, Nilai penangguhan malus memperhitungkan present value.

Remunerasi variabel yang ditangguhkan dapat dibayarkan dengan syarat:

- Penilaian kinerja minimal Performance Level (PL) 3 di tahun berjalan
- Tidak dalam masa pengenaan sanksi
- Tidak dalam masa pemeriksaan karena indikasi fraud

Apabila pada saat masa pembayaran yang ditangguhkan salah satu variabel tersebut di atas tidak terpenuhi, maka remunerasi variabel dimaksud tetap ditangguhkan dan/atau tidak dibayarkan, dan baru akan dibayarkan setelah pegawai dinyatakan tidak terbukti dan/atau tidak terlibat dalam kasus fraud dimaksud.

Realisasi atas penangguhan remunerasi yang Bersifat Variabel bagi MRT telah disampaikan pada Sub Bab Penerapan Tata Kelola Dalam Pemberian Remunerasi Bagi Bank Umum Sesuai POJK 45/POJK.03/2015 dalam Bab Tata Kelola Perusahaan pada Laporan Tahunan ini.

Selain itu, Bank Mandiri Taspen merupakan Perseroan Terbatas yang tertutup sehingga tidak memiliki program kepemilikan saham oleh Pegawai dan/atau Manajemen (ESOP/MSOP).

The threshold for determining a Material Risk Taker (MRT) was defined as Variable Remuneration exceeding 10 (ten) times the employee's salary. For members of the Board of Directors and the Board of Commissioners, the determination was based on shareholder approval upon recommendation from the Remuneration Committee through the Board of Commissioners.

The bank chose to use the malus system to defer variable remuneration payments with the following percentage composition:

The deferral period for Variable Remuneration was set at 3 (three) years from the date of payment, with the malus value calculated on a present value basis.

Deferred Variable Remuneration could be paid subject to the following conditions:

- Performance evaluation of at least Performance Level (PL) 3 in the current year
- Not under any sanction period
- Not under investigation for alleged fraud

If, at the time of payment, any of the above conditions were not fulfilled, the Variable Remuneration would remain deferred and/or not be paid, and would only be disbursed once the employee was declared not proven and/or not involved in the alleged fraud case.

The realization of deferred Variable Remuneration for Material Risk Takers (MRT) had been disclosed in the subsection on the Implementation of Governance in Remuneration for Commercial Banks in accordance with POJK 45/POJK.03/2015 in the Corporate Governance chapter of this Annual Report.

Furthermore, Bank Mandiri Taspen is a privately held limited liability company and therefore did not implement an Employee Stock Ownership Program (ESOP) and/or Management Stock Ownership Program (MSOP).

Strategi Anti Fraud

Sesuai Peraturan Otoritas Jasa Keuangan Republik Indonesia Nomor 12 Tahun 2024 tentang Penerapan Strategi Anti Fraud bagi Lembaga Jasa Keuangan (POJK SAF LJK), disampaikan bahwa untuk meminimalisir terjadinya fraud diperlukan penguatan sistem pengendalian intern berupa penerapan strategi anti fraud serta Bank wajib menyusun dan menerapkan strategi anti fraud secara efektif. Menindaklanjuti hal tersebut di atas, saat ini Bank telah memiliki Standar Prosedur Strategi Anti Fraud, Petunjuk Teknis Strategi Anti Fraud dan Petunjuk Teknis Investigasi, yang di dalamnya memuat strategi Bank dalam upaya penerapan strategi anti fraud. Penerapan strategi anti fraud sebagai upaya untuk mencegah terjadinya kasus penyimpangan operasional pada perbankan dan pelanggaran terhadap ketentuan peraturan perundang-undangan, khususnya fraud, yang dapat mengakibatkan kerugian bagi Bank, Nasabah, dan/atau pihak lain, diperlukan peningkatan efektivitas pengendalian intern, sebagai upaya meminimalisasi risiko fraud dengan cara menerapkan strategi anti fraud.

Selama ini, baik secara langsung maupun tidak langsung, pelaksanaan pencegahan fraud telah dilaksanakan Bank, antara lain melalui penerapan manajemen risiko, khususnya sistem pengendalian intern dan pelaksanaan tata kelola yang baik. Namun demikian, agar penerapan strategi anti fraud menjadi lebih efektif masih diperlukan upaya peningkatan budaya sadar risiko agar pencegahan fraud menjadi fokus perhatian dan kepedulian bagi seluruh jajaran organisasi Bank, yang antara lain diwujudkan dengan kesediaan penandatanganan pakta integritas oleh Direksi, Dewan Komisaris, dan Pegawai Bank.

Berdasarkan SK Direksi No. SKD/008/I/2017 tanggal 31 Januari 2017, Divisi Internal Audit ditugaskan sebagai unit kerja yang bertanggung jawab atas pengelolaan dan pelaksanaan Strategi Anti Fraud. Divisi Internal Audit bertanggung jawab langsung kepada Direktur Utama dan melaporkan hasil pengawasannya ke Dewan Komisaris melalui Komite Audit. Penerapan Strategi Anti Fraud ditunjukkan pada gambar sebagai berikut:

Anti-Fraud Strategy

In accordance with the Regulation of the Financial Service Authority of the Republic of Indonesia Number 12 of 2024 concerning the Implementation of Anti-Fraud Strategies for Financial Service Institutions (POJK SAF LJK), it is stated that in order to minimize the occurrence of fraud, it is necessary to strengthen the internal control system in the form of implementing anti-fraud strategies and Banks are required to prepare and implement anti-fraud strategies effectively. Following the above, the Bank had Standard Operating Procedures for Anti-Fraud Strategy, Technical Guidelines for Anti-Fraud Strategy, and Technical Guidelines for Investigation, which contained the Bank's strategies in implementing anti fraud strategies. The implementation of anti-fraud strategies as an effort to prevent operational deviations in banking and violations of legal regulations, especially fraud, which could result in losses to the Bank, Customers, and/or other parties, required the enhancement of internal control effectiveness as an effort to minimize fraud risks by implementing anti-fraud strategies.

So far, both directly and indirectly, fraud prevention measures had been implemented by the Bank, including through risk management implementation, especially internal control systems, and good governance practices. However, to make the implementation of anti-fraud strategies more effective, efforts to enhance a risk-aware culture were still needed so that fraud prevention became the focus of attention and concern for all levels of the Bank's organization, which included willingness to sign integrity pacts by the Board of Directors, Board of Commissioners, and Bank employees.

Based on Board of Directors Decree No. SKD/008/I/2017 dated January 31, 2017, the Internal Audit Division was assigned as the unit responsible for the management and implementation of the Anti-Fraud Strategy. The Internal Audit Division reported directly to the President Director and reported the results of its supervision to the Board of Commissioners through the Audit Committee. The implementation of the Anti-Fraud Strategy is illustrated in the following diagram:

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. Such key audit matters were addressed in the context of our audit of the financial statements taken as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on such key audit matters. For the key audit matter below, our description of how our audit addressed such key audit matter is provided in such context.

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Financial Statements paragraph of our report, including in relation to the key audit matter communicated below. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the accompanying financial statements. Hal audit utama (lanjutan)

Cadangan kerugian penurunan nilai atas kredit yang diberikan (lanjutan)

Penjelasan atas hal audit utama: (lanjutan)

Kami fokus pada area ini karena nilai tercatat atas kredit yang diberikan dan cadangan kerugian penurunan nilai atas kredit yang diberikan adalah material terhadap laporan keuangan terlampir. Selain itu, penentuan cadangan kerugian penurunan nilai atas kredit yang diberikan memerlukan pertimbangan dan memiliki ketidakpastian estimasi termasuk dalam penentuan model untuk menghitung cadangan kerugian penurunan nilai, identifikasi eksposur kredit yang mengalami penurunan kualitas kredit yang signifikan, dan penentuan asumsi yang digunakan dalam model perhitungan cadangan kerugian penurunan nilai (untuk eksposur yang dinilai secara individual atau kolektif), termasuk faktor ekonomi makro masa depan dan overlay yang digunakan atas risiko yang tidak ditangkap oleh model.

Respons audit:

Kami melakukan pengujian pengendalian utama atas pemberian kredit, penilaian kualitas kredit internal secara reguler, serta pencatatan dan pengawasan kredit yang diberikan. Kami memperoleh pemahaman dan menilai metodologi pengukuran penurunan nilai, serta melakukan validasi atas model pencadangan kerugian penurunan nilai, data masukan, dasar, dan asumsi yang digunakan oleh Bank dalam menghitung cadangan kerugian penurunan nilai, serta menguji tiga tahapan kualitas kredit portofolio sesuai dengan kriteria tingkatan (staging) yang disusun oleh Bank untuk kredit yang diberikan. Kami menguji apakah pengalaman historis mewakili keadaan saat ini dan kerugian terkini yang terjadi dalam portofolio, serta menilai kewajaran atas penyesuaian berorientasi masa depan, analisis faktor ekonomi makro, dan beberapa skenario probabilitas tertimbang untuk kredit yang diberikan.

Key audit matters (continued)

Allowance for impairment losses of loans (continued)

Description of key audit matter: (continued)

We focused on this area because the carrying value of loans and the allowance for impairment losses on loans is material to the accompanying financial statements. In addition, the determination of allowance for impairment losses on loans requires judgement and is subject to estimation uncertainty which includes determining the model to calculate allowance for impairment losses, identification of credit exposures with significant deterioration in credit quality, and determining assumptions used in the allowance for impairment loss calculation models (for exposures assessed on an individual or collective basis), including forward-looking macroeconomic factors and overlays used for risks not captured by models.

Audit response:

We tested the key controls over the loans origination, regular internal credit quality assessments, and recording and monitoring of the loans. We obtained understanding and assessed impairment measurement methodologies and performed validation of allowance for impairment losses models, inputs, bases, and assumptions used by the Bank in calculating the allowance for impairment losses and tested the classification into the three-stage credit quality of loan portfolios in accordance with staging criteria developed by the Bank for loans. We tested whether historical experience is representative of current circumstances and of the recent losses incurred in the portfolios, and assessed the reasonableness of forward-looking adjustments, macroeconomic factor analysis, and probability-weighted multiple scenarios for loans.

Audit response: (continued)

Untuk cadangan kerugian penurunan nilai yang dinilai secara individual, kami menguji sampel kredit yang diberikan untuk mengevaluasi identifikasi atas eksposur yang mengalami penurunan kualitas kredit yang signifikan atau yang telah mengalami penurunan nilai secara tepat waktu oleh Bank dan menilai asumsi Bank atas arus kas masa depan ekspektasian, termasuk nilai agunan yang dapat direalisasikan berdasarkan informasi pasar yang tersedia atau penilaian yang dilakukan oleh penilai independen atau internal.

With respect to individually assessed allowance for impairment losses, we tested the samples of loans to evaluate the timely identification by the Bank of exposures with significant deterioration in credit quality or exposures which have been impaired and assessed the Bank's assumptions on the expected future cash flows, including the realizable value of collateral based on available market information or valuation prepared by independent or internal valuer.

Kami memeriksa keakurasian perhitungan jumlah cadangan kerugian penurunan nilai dengan melakukan perhitungan ulang atas keseluruhan portofolio yang penurunan nilainya dinilai secara kolektif dan individual. Kami menguji kelengkapan dan ketepatan, termasuk asumsi dan pertimbangan, overlay yang digunakan atas risiko yang tidak ditangkap oleh model. Kami menilai apakah pengungkapan dalam laporan keuangan cukup dan secara memadai mencerminkan eksposur Bank terhadap risiko kredit. Kami melibatkan pakar auditor internal kami untuk membantu kami dalam melakukan prosedur-prosedur di atas ketika keahlian spesifik mereka diperlukan.

We checked the accuracy of the calculation of allowance for impairment losses amount by recalculating the entire portfolio for collectively and individually assessed impairment. We challenged the completeness and appropriateness, including the assumptions and judgments, of overlays used for risks not captured by models. We assessed whether the financial statements disclosures are adequately and appropriately reflecting the Bank's exposures to credit risk. We involved our auditor's internal experts to assist us in the performance of the above procedures where their specific expertise was required.

Tanggung jawab manajemen dan pihak yang bertanggung jawab atas tata kelola terhadap laporan keuangan (lanjutan)

Dalam penyusunan laporan keuangan, manajemen bertanggung jawab untuk menilai kemampuan Bank dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha, dan menggunakan basis akuntansi kelangsungan usaha, kecuali manajemen memiliki intensi untuk melikuidasi Bank atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Tanggung jawab auditor terhadap audit atas laporan keuangan

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor independen yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit yang ditetapkan oleh IAPI akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan tersebut.

Responsibilities of management and those charged with governance for the financial statements (continued)

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting, unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing established by the IICPA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Tanggung jawab auditor terhadap audit atas laporan keuangan (lanjutan)

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian atas pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Bank.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.

Auditor's responsibilities for the audit of the financial statements (continued)

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to such risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.*

Tanggung jawab auditor terhadap audit atas laporan keuangan (lanjutan)

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga: (lanjutan)

- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Bank untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor independen kami ke pengungkapan terkait dalam laporan keuangan atau, jika pengungkapan tersebut tidak memadai, memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor independen kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Bank tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur, dan isi laporan keuangan secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

Report No. 00023/2.1505/AU.1/07/0242-3/1/II/2026 (continued)

Auditor's responsibilities for the audit of the financial statements (continued)

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also: (continued)

- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our independent auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusion is based on the audit evidence obtained up to the date of our independent auditor's report. However, future events or conditions may cause the Bank to cease to continue as going concern.*
- *Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Laporan Auditor Independen (lanjutan)

Laporan No. 00023/2.1505/AU.1/07/0242-3/1/II/2026 (lanjutan)

Tanggung jawab auditor terhadap audit atas laporan keuangan (lanjutan)

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan kepada pihak tersebut seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal-hal tersebut yang paling signifikan dalam audit atas laporan keuangan periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama tersebut dalam laporan auditor independen kami kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal audit utama tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal tidak boleh dikomunikasikan dalam laporan auditor independen kami karena konsekuensi yang merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

Independent Auditor's Report (continued)

Report No. 00023/2.1505/AU.1/07/0242-3/1/II/2026 (continued)

Auditor's responsibilities for the audit of the financial statements (continued)

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe such key audit matters in our independent auditor's report unless laws or regulations preclude public disclosure about such key audit matters or when, in extremely rare circumstances, we determine that a key audit matter should not be communicated in our independent auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

2. IKHTISAR INFORMASI KEBIJAKAN AKUNTANSI YANG MATERIAL

a. Pernyataan atas Penyusunan Laporan Keuangan

Laporan keuangan disusun dan disajikan sesuai dengan Standar Akuntansi Keuangan di Indonesia, yang mencakup Pernyataan dan Interpretasi yang dikeluarkan oleh Dewan Standar Akuntansi Keuangan Ikatan Akuntan Indonesia (DSAK-IAI) dan peraturan Bapepam-LK No. VIII.G.7 lampiran keputusan Ketua Bapepam-LK No. KEP-347/BL/2012 tanggal 25 Juni 2012 tentang "Pedoman atas Penyajian dan Pengungkapan Laporan Keuangan Emiten atau Perusahaan Publik".

b. Dasar Penyajian Laporan Keuangan

Laporan keuangan disusun berdasarkan harga perolehan, kecuali untuk aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain dan aset serta liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi. Laporan keuangan disusun berdasarkan akuntansi berbasis akrual, kecuali laporan arus kas.

Laporan arus kas disusun dengan menggolongkan transaksi ke dalam aktivitas operasi, investasi dan pendanaan. Laporan arus kas disusun menggunakan metode langsung. Untuk penyajian laporan arus kas, kas dan setara kas terdiri dari kas, giro pada Bank Indonesia, giro pada bank lain, dan investasi jangka pendek likuid lainnya dengan jangka waktu 3 (tiga) bulan atau kurang sejak tanggal perolehan yang tidak digunakan sebagai jaminan atau tidak dibatasi penggunaannya.

Pos-pos dalam penghasilan komprehensif lain disajikan terpisah antara akun-akun yang akan direklasifikasi ke laba rugi dan akun-akun yang tidak akan direklasifikasikan ke laba rugi.

Penyusunan laporan keuangan sesuai dengan Standar Akuntansi Keuangan di Indonesia mengharuskan penggunaan estimasi dan asumsi. Hal tersebut juga mengharuskan manajemen untuk membuat pertimbangan dalam proses penerapan kebijakan akuntansi. Area yang kompleks atau memerlukan tingkat pertimbangan yang lebih tinggi atau area di mana asumsi dan estimasi dapat berdampak signifikan terhadap laporan keuangan diungkapkan di Catatan 3 "Sumber Ketidakpastian Estimasi dan Pertimbangan Akuntansi".

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION

a. Statement of Financial Statement Preparation

The financial statements have been prepared and presented in accordance with Indonesian Financial Accounting Standards, which include the Statements and Interpretations issued by the Indonesian Accounting Standards Board (DSAK-IAI) and Indonesian Capital Market Supervisory Agency (Bapepam-LK) Regulation No. VIII.G.7 appendix of the Decision of the Chairman of Bapepam-LK No. KEP-347/BL/2012 dated June 25, 2012 regarding the "Guidelines on Financial Statements Presentations and Disclosures for Issuers or Public Companies".

b. Basis of Presentation of The Financial Statements

The financial statements have been prepared under the historical cost, except for financial assets at fair value through other comprehensive income and financial assets and liabilities at fair value through profit or loss. The financial statements are prepared under the accrual basis of accounting, except for the statement of cash flows.

The statement of cash flows are prepared by classifying transactions into operating, investing and financing activities. The statement of cash flows are prepared using the direct method. For the statement of cash flows, cash and cash equivalents consist of cash, current accounts with Bank Indonesia, current accounts with other banks, and other short-term liquid investments with maturities of 3 (three) months or less from the acquisition date which are not used as collateral nor restricted to use.

The items under other comprehensive income are presented separately between items to be reclassified to profit or loss and those items not to be reclassified to profit or loss.

The preparation of financial statements in accordance with Indonesian Financial Accounting Standards requires the use of estimates and assumptions. It also requires management to make judgments in the process of applying accounting policies. The areas that are complex or require higher level of consideration or areas where assumptions and estimates could have a significant impact on financial statements are disclosed in Note 3 "Use of Critical Accounting Estimates and Judgements".

2. IKHTISAR INFORMASI KEBIJAKAN AKUNTANSI YANG MATERIAL (lanjutan)

b. Dasar Penyajian Laporan Keuangan (lanjutan)

Mata uang penyajian yang digunakan dalam laporan keuangan adalah mata uang Rupiah, yang juga merupakan mata uang fungsional Bank.

c. Aset dan Liabilitas Keuangan

i. Aset Keuangan

Bank mengklasifikasikan aset keuangannya dalam kategori (a) aset keuangan yang diukur pada nilai wajar melalui laba rugi, (b) aset keuangan yang diukur pada nilai wajar penghasilan komprehensif lainnya, dan (c) aset keuangan yang diukur pada biaya perolehan diamortisasi. Bank menggunakan 2 (dua) dasar untuk mengklasifikasikan aset keuangan yaitu model bisnis Bank dalam mengelola aset keuangan dan karakteristik arus kas kontraktual pembayaran pokok dan bunga (*solely payment of principal and interest (SPPI)*) dari aset keuangan.

Pengujian SPPI

Sebagai langkah pertama dari proses klasifikasi, Bank menilai persyaratan kontraktual keuangan untuk mengidentifikasi apakah mereka memenuhi pengujian SPPI.

Pokok pinjaman untuk tujuan pengujian ini didefinisikan sebagai nilai wajar dari aset keuangan pada pengakuan awal dan dapat berubah selama umur aset keuangan (misalnya, jika ada pembayaran pokok atau amortisasi premi/diskon).

Elemen bunga yang paling signifikan dalam perjanjian kredit biasanya adalah pertimbangan atas nilai waktu dari uang dan risiko kredit. Untuk membuat penilaian SPPI, Bank menerapkan pertimbangan dan memperhatikan faktor-faktor yang relevan seperti mata uang dimana aset keuangan didenominasikan dan periode pada saat suku bunga ditetapkan.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

b. Basis of Presentation of The Financial Statements (continued)

The presentation currency used in these financial statements is Indonesian Rupiah, which is also the functional currency of the Bank.

c. Financial Assets and Liabilities

i. Financial Assets

The Bank classifies its financial assets in the following categories of (a) financial assets at fair value through profit or loss, (b) financial assets at fair value through other comprehensive income, and (c) financial assets at amortized cost. Bank uses 2 (two) bases for classifying financial assets, namely the Bank's business model in managing financial assets and the characteristics of the contractual cash flow of principal and interest payments (*solely payment of principal and interest (SPPI)*) of financial assets.

SPPI Test

As the first step of the classification process, the Bank assesses the financial contractual requirements to identify whether they meet the SPPI testing.

The loan principal for testing purposes is defined as the fair value of the financial asset at initial recognition and is subject to change over the life of the financial asset (for example, if there are principal payments or amortization of premium/discount).

The most significant element of interest in a loan agreement is usually a consideration of the time value of money and credit risk. To make an SPPI test, the Bank applies considerations and takes into account relevant factors such as the currency in which the financial asset is denominated and the period when the interest rate is set.

Pengujian SPPI (lanjutan)

Sebaliknya, persyaratan kontraktual yang memberikan eksposur lebih dari *de minimis* atas risiko atau volatilitas dalam arus kas kontraktual yang tidak terkait dengan dasar pengaturan pinjaman, tidak menimbulkan arus kas kontraktual SPPI atas jumlah saldo. Dalam kasus seperti itu, aset keuangan diharuskan untuk diukur pada nilai wajar melalui laba rugi (*fair value through profit or loss* (FVTPL)).

Penilaian Model Bisnis

Bank menentukan model bisnisnya berdasarkan tingkat yang paling mencerminkan bagaimana Bank mengelola kelompok aset keuangannya untuk mencapai tujuan bisnisnya.

Model bisnis Bank tidak dinilai berdasarkan masing-masing instrumennya, tetapi pada tingkat portofolio secara agregat yang lebih tinggi dan didasarkan pada faktor-faktor yang dapat diamati seperti:

- Bagaimana kinerja model bisnis dan aset keuangan yang dimiliki dalam model bisnis tersebut dievaluasi dan dilaporkan kepada personel manajemen kunci;
- Risiko yang mempengaruhi kinerja model bisnis (dan aset keuangan yang dimiliki dalam model bisnis tersebut) dan, khususnya, bagaimana cara risiko tersebut dikelola;
- Bagaimana para manajer bisnis dikompensasi (misalnya, apakah kompensasi didasarkan pada nilai wajar dari aset yang dikelola atau pada arus kas kontraktual yang tertagih);
- Frekuensi, nilai, dan waktu penjualan yang diharapkan, juga merupakan aspek penting dari penilaian Bank.

c. Financial Assets and Liabilities (continued)

SPPI Test (continued)

Conversely, contractual terms that provide more than de minimis exposure to risk or volatility in contractual cash flows that are not related to the basis of the loan arrangement, do not generate SPPI's contractual cash flows on the total balance. In such cases, financial assets are required to be measured at fair value through profit or loss (FVTPL).

Business Model Assessment

The Bank determines its business model based on the level that best reflects how the Bank manages its group of financial assets to achieve its business objectives.

The Bank's business model is not assessed based on each of its instruments, but at a higher aggregate portfolio level and is based on observable factors such as:

- *How is the performance of the business model and the financial assets held in the business model are evaluated and reported to key management personnel;*
- *Risks that affect the performance of the business model (and the financial assets held under that business model) and, in particular, how those risks are managed;*
- *How business managers are compensated (for example, whether compensation is based on the fair value of assets under management or on contractual cash flows collectible);*
- *The expected frequency, value and timing of sales are also important aspects of the Bank's assessment.*

Business Model Assessment (continued)

The assessment of a business model is based on a fairly expected scenario without considering the "worst case" or "stress case" scenarios. If the post-recognition cash flows are realized in a different manner than originally expected, the Bank does not change the classification of the remaining financial assets in such business model, but includes that information in assessing new or recently purchased financial assets.

a. Financial Assets at Fair Value through Profit or Loss

Financial assets are measured at fair value through profit or loss unless tests of business model and contractual cash flow tests show that financial assets are classified at amortized cost or fair value through other comprehensive income.

This classification is intended for financial instruments held for trading or at initial recognition determined by the Bank to be measured at fair value through profit or loss.

Financial assets that are categorized as held for trading if they are acquired or held primarily for the purpose of selling or repurchasing in the near future or if they are part of a specific portfolio of jointly managed financial instruments and there is evidence of recent short-term profit-taking patterns.

iv. Modifikasi atas Arus Kas Aset Keuangan

Penilaian apakah suatu aset keuangan telah dimodifikasi baik secara substansial maupun tidak substansial dilakukan oleh unit bisnis yang berwenang melakukan modifikasi atau restrukturisasi aset keuangan pada saat unit bisnis tersebut melakukan tindakan modifikasi atau restrukturisasi atas suatu aset keuangan.

Modifikasi aset keuangan dianggap substansial dan Bank akan berhenti mengakui aset keuangan awal ketika:

- a. aset keuangan (atau bagiannya) berakhir, yaitu jika debitur secara hukum dibebaskan dari tanggung jawab utama atas aset tersebut (atau bagiannya), baik melalui proses hukum maupun oleh kreditur pembuatan kontrak kredit baru (sebagai contoh, opsi *equity conversion*); atau
- b. terdapat konversi mata uang.

Bank kemudian akan mengukur aset keuangan yang telah dimodifikasi baik secara substansial maupun tidak substansial dengan cara berikut:

- a. Modifikasi Aset Keuangan yang Substansial
 1. Saat arus kas kontraktual atas aset keuangan direnegosiasi atau dimodifikasi (antara lain ketika kredit direstrukturisasi) dimana renegosiasi atau modifikasi tersebut menghasilkan penghentian pengakuan aset keuangan, Bank akan mencatat aset keuangan tersebut sebagai aset keuangan baru/modifikasian pada tanggal modifikasi/negosiasi.
 2. Selisih jumlah tercatat bruto aset keuangan awal dengan nilai wajar aset modifikasian diakui di laba rugi.

c. Financial Assets and Liabilities (continued)

iv. Cashflows Modification of Financial Assets

An assessment of whether a financial asset has been modified substantially or not substantially is carried out by a business unit authorized to modify or restructure financial assets when the business unit carries out modification or restructuring of a financial asset.

Modifications to financial assets are considered substantial and the Bank will stop recognizing the original financial assets when:

- a. the financial asset (or part thereof) expires, that is, if the debtor is legally released from primary responsibility for the asset (or part thereof), either through legal process or by the creditor entering into a new credit contract (for example, the equity conversion option); or
- b. there is a currency conversion.

The bank will then measure the modified financial assets either substantially or not substantially in the following manner:

- a. Substantial Modification of Financial Assets
 1. When the contractual cash flows on a financial asset are renegotiated or modified (for example, when credit is restructured) where the renegotiation or modification results in derecognition of the financial asset, the Bank will record the financial asset as a new/modified financial asset on the modification/negotiation date.
 2. The difference between the gross carrying amount of the original financial asset and the fair value of the modified asset is recognized in profit or loss.

a. Modifikasi Aset Keuangan yang Substansial (lanjutan)

3. Pendapatan atau biaya transaksi yang terjadi sehubungan dengan kejadian modifikasi diakui sebagai bagian dari keuntungan atau kerugian atas modifikasi tersebut.
4. Selanjutnya, Bank melakukan penilaian apakah aset keuangan baru/modifikasi merupakan aset yang berasal dari aset keuangan memburuk.
5. Pengakuan pendapatan bunga atas aset yang berasal dari aset keuangan memburuk ditentukan berdasarkan suku bunga efektif yang telah disesuaikan dengan risiko kredit (*risk-adjusted effective interest rate*) untuk mendiskontokan arus kas aset keuangan yang telah dimodifikasi.

b. Modifikasi Aset Keuangan yang Tidak Substansial

1. 3. Metode penurunan nilai

Bank melakukan evaluasi penurunan nilai dengan metode sebagai berikut:

a) Metode individual

Bank mengevaluasi penurunan nilai secara individual apabila Bank memiliki informasi yang wajar dan mendukung untuk mengukur kerugian kredit ekspektasian sepanjang umurnya pada instrumen secara individual dan aset keuangan memiliki kriteria sebagai berikut:

- 1) aset keuangan per debitur memiliki nilai *outstanding* lebih dari Rp500;
- 2) aset keuangan termasuk dalam kategori *stage 3*;
- 3) terdapat bukti objektif terjadinya peristiwa yang merugikan dan berdampak pada estimasi arus kas masa datang.

Jika aset keuangan yang dievaluasi secara individual terdapat bukti objektif penurunan nilai namun tidak terdapat kerugian penurunan nilai, maka aset keuangan tersebut tetap dimasukkan ke dalam klasifikasi aset keuangan yang akan dievaluasi penurunan nilainya secara individual. Namun Bank membentuk cadangan kerugian penurunan nilai atas aset keuangan tersebut berdasarkan *probability of default* yang dihasilkan dari evaluasi penurunan nilai kredit secara kolektif.

3. Impairment method

The Bank evaluates for impairment using the following methods:

a) Individual method

The Bank evaluates impairment individually if the Bank has reasonable and supportive information to measure lifetime expected credit losses on individual instruments and financial assets have the following criteria:

- 1) the financial assets per debtor have an outstanding value of more than Rp500;
- 2) financial assets are included in the stage 3 category;
- 3) there is objective evidence of an adverse event that has an impact on the estimated future cash flows.

If a financial asset assessed as individual has objective evidence of impairment but there is no impairment loss, the financial asset is still classified as a financial asset that is assessed for impairment individually. However, the Bank provide allowance for impairment loss on these financial assets based on a probability of default resulting from a collective assessment of impairment losses.

3. Metode penurunan nilai (lanjutan)

Bank melakukan evaluasi penurunan nilai dengan metode sebagai berikut: (lanjutan)

b) Metode kolektif

Bank mengevaluasi penurunan nilai secara kolektif apabila aset keuangan memiliki kesamaan dalam karakteristik risiko dengan tujuan untuk memfasilitasi analisis yang didesain untuk memungkinkan peningkatan risiko kredit secara signifikan dapat diidentifikasi tepat waktu.

Evaluasi penurunan nilai secara kolektif didasarkan pada konsep *Probability of Default* (PD), *Loss-Given Default* (LGD) dan *Exposure at Default* (EAD) yang mempertimbangkan informasi masa lalu, terkini dan masa mendatang.

d. Penentuan Nilai Wajar

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Pengukuran nilai wajar berdasarkan asumsi bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi di:

- pasar utama untuk aset dan liabilitas tersebut, atau
- jika terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

Nilai wajar suatu aset dan liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset atau liabilitas tersebut, dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

c. Financial Assets and Liabilities (continued)

viii. Impairment of Financial Assets (continued)

3. Impairment method (continued)

The Bank evaluates for impairment using the following methods: (continued)

b) Collective method

The Bank evaluates impairment collectively when the financial assets have similar risk characteristics with the aim of facilitating analysis designed to enable a timely identification of significant increases in credit risk.

The evaluation of collective impairment is based on the concepts of *Probability of Default* (PD), *Loss-Given Default* (LGD) and *Exposure at Default* (EAD) which take into account past, current and future information.

d. Determination of Fair Value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

A fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability should be measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

d. Penentuan Nilai Wajar (lanjutan)

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomis dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Nilai wajar untuk instrumen keuangan yang diperdagangkan di pasar aktif, seperti efek-efek, ditentukan berdasarkan nilai pasar yang berlaku pada tanggal laporan posisi keuangan menggunakan harga yang dipublikasikan secara rutin dan berasal dari sumber yang terpercaya, seperti Bloomberg, Reuters atau harga yang diberikan oleh broker (*quoted price*).

Instrumen keuangan dianggap memiliki kuotasi di pasar aktif, jika harga kuotasi tersedia sewaktu-waktu dan dapat diperoleh secara rutin dari bursa, pedagang efek (*dealer*), perantara efek (*broker*) dan harga tersebut mencerminkan transaksi pasar yang aktual dan rutin dalam suatu transaksi yang wajar. Jika kriteria di atas tidak terpenuhi, maka pasar aktif dinyatakan tidak tersedia. Indikasi-indikasi dari pasar tidak aktif adalah terdapat selisih yang besar antara harga penawaran dan permintaan atau kenaikan signifikan dalam selisih harga penawaran dan permintaan dan hanya terdapat beberapa transaksi terkini.

Untuk efek-efek yang tidak mempunyai harga pasar, estimasi atas nilai wajar efek-efek ditetapkan dengan mengacu pada nilai wajar instrumen lain yang substansinya sama atau dihitung berdasarkan arus kas yang diharapkan terhadap aset bersih efek-efek tersebut.

e. Transaksi dengan Pihak-Pihak Berelasi

Bank melakukan transaksi dengan pihak-pihak berelasi, yang didefinisikan antara lain:

 - iii. personil manajemen kunci entitas pelapor atau entitas induk dari entitas pelapor.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

d. Determination of Fair Value (continued)

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The fair value of financial instruments traded in active markets, such as securities, is determined based on quoted market prices at the statement of financial position date from credible sources, such as quoted market prices from Bloomberg, Reuters or broker's quoted price.

A financial instrument is regarded as quoted in an active market, if quoted prices are readily and regularly available from an exchange, dealer, broker and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indications that a market is inactive are when there is a wide bid-offer spread, significant increase in the bid-offer spread or there are few recent transactions.

For securities with no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which substantially has the same characteristics or calculated based on the expected cash flows of the underlying net asset base of the securities.

e. Related Parties Transactions

The Bank enter into transactions with related parties, which are defined as follows:

Securities are initially measured at fair value plus directly attributable transaction costs, except for those measured at fair value through profit or loss.

For securities which are traded in organised financial markets, fair value is generally determined by reference to quoted market prices by the stock exchanges at the close of business on the statement of financial position date. For securities with no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which substantially have the same characteristic or calculated based on the expected cash flows of the underlying net asset base of the securities. Any permanent impairment in the fair value of securities is charged to current year's statement of profit or loss.

Reclassification of securities to held-to-maturity classification from available-for-sale are recorded at fair value. Unrealized gains or losses are recorded in the equity section and will be amortized over the remaining lives of the securities using the effective interest rate method through the statement of profit or loss.

I. Aset Tetap (lanjutan)

Pembelian barang inventaris akan dikapitalisir menjadi aset tetap apabila kriteria nilai perolehannya sebesar Rp2 atau lebih per satuan/aset, sedangkan inventaris yang dibeli dengan harga kurang dari Rp2 dicatat oleh unit kerja aset dan operasional kantor pusat sebagai beban pada laporan laba rugi.

Biaya perbaikan dan perawatan dibebankan langsung ke laporan laba rugi pada saat terjadinya, sedangkan penambahan dalam jumlah signifikan dikapitalisasi apabila kemungkinan besar Bank akan mendapatkan manfaat ekonomi masa depan dari aset tersebut yang melebihi standar kinerja yang diperkirakan sebelumnya dan disusutkan sepanjang sisa masa manfaat aset tetap terkait.

Apabila suatu aset tetap tidak lagi digunakan atau dijual, nilai perolehan dan akumulasi penyusutan aset tersebut dikeluarkan dari pencatatannya sebagai aset tetap, dan laba atau rugi yang terjadi diperhitungkan dalam laporan laba rugi tahun berjalan.

Biaya perolehan hak atas tanah dalam bentuk hak guna usaha, hak guna bangunan dan hak pakai diakui sebagai aset tetap. Biaya perolehan tersebut merupakan biaya yang dapat diatribusikan secara langsung untuk memperoleh hak atas tanah tersebut termasuk biaya pengurusan legal hak atas tanah ketika tanah diperoleh pertama kali.

Hak atas tanah dalam bentuk hak guna usaha, hak guna bangunan dan hak pakai tidak disusutkan, kecuali terdapat bukti yang mengindikasikan bahwa perpanjangan atau pembaruan hak atas tanah tersebut kemungkinan besar atau pasti tidak diperoleh.

Estimasi masa manfaat ekonomis, metode penyusutan, dan nilai residu aset tetap dikaji ulang pada setiap akhir periode pelaporan dan disesuaikan secara prospektif.

Nilai tercatat aset tetap dikaji ulang setiap tanggal laporan posisi keuangan untuk menilai apakah aset tetap tersebut nilai tercatatnya lebih tinggi dari estimasi jumlah yang dapat diperoleh kembali (*estimated recoverable amount*) dari aset tetap tersebut.

Jika nilai tercatat aset tetap melebihi taksiran jumlah yang dapat diperoleh kembali dari aset tetap tersebut, nilai tercatat aset tetap harus diturunkan menjadi nilai yang dapat diperoleh kembali dari aset tetap tersebut.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

I. Fixed Assets (continued)

The purchases of inventory will be capitalized to a fixed asset if the cost of the acquisition value is Rp2 or higher per unit/asset, while inventories purchased for less than Rp2 are recorded by the asset and operations unit head office as an expense in the statement of profit or loss.

The cost of repairs and maintenance is charged directly to the statement of profit or loss as incurred, while significant addition are capitalized when it is probable that future economic benefits will be greater than the initial performance standards set previously and depreciated over the remaining useful lives of related fixed assets.

When fixed assets are retired or otherwise disposed of, their carrying values and the related accumulated depreciation are removed from the record as fixed assets, and the resulting gains or losses are recognized in the current year statement of profit or loss.

Land cost of land rights in the form of business usage rights, building usage rights and usage rights is recognized as fixed assets. This cost is the directly attributable cost to acquire the landrights including the legal cost of obtaining legal land rights when the land is first acquired.

Land rights in the form of business usage rights, building usage rights and usage rights not depreciated, unless there is evidence to indicate that the extension or renewal of land rights is likely to or definitely not obtained.

The estimated useful lives, depreciation method, and residual value of fixed assets are reviewed at the end of each reporting period and are adjusted prospectively.

The carrying amounts of fixed assets are reviewed at each statement of financial position date to assess whether they are recorded in excess of their estimated recoverable amounts.

If the carrying value exceeds this estimated recoverable amount, assets are written down to their recoverable amount.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

m. Aset dan Liabilitas Sewa

m. Lease Assets and Liabilities

Bank mengakui aset hak guna pada tanggal dimulainya sewa. Aset hak guna diukur pada biaya perolehan, dikurangi akumulasi penyusutan dan kerugian penurunan nilai, dan disesuaikan untuk setiap pengukuran kembali liabilitas sewa. Liabilitas sewa merupakan jumlah pembayaran sewa yang masih harus dibayar hingga akhir masa sewa yang didiskontokan dengan menggunakan suku bunga pinjaman inkremental. Biaya aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang dibayarkan, biaya pemulihan dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai sewa dikurangi insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama jangka waktu yang lebih pendek antara masa sewa dengan estimasi masa manfaat aset, sebagai berikut:

The Bank recognizes the rights of use assets on the inception date of the lease. Rights of use assets are measured at cost, less accumulated depreciation and impairment losses, and adjusted for any remeasurement of the lease liabilities. Lease liabilities are the amount of lease payments accrued until the end of the lease term, discounted using the incremental borrowing interest rate. The cost of rights of use assets includes the amount of lease liability recognized, initial direct costs paid, recovery costs and lease payments made on or before the start date of the lease less lease incentives received. Rights of use assets are depreciated using the straight-line method over the shorter period between the lease term and the estimated useful life of the asset, as follows:

	Masa manfaat/ Useful lives (Tahun)/(Years)	
Bangunan	3 - 5	Buildings
Kendaraan	3	Vehicles

Jika kepemilikan aset sewa dialihkan ke Bank pada akhir masa sewa atau pembayaran sewa mencerminkan pelaksanaan opsi pembelian, penyusutan dihitung menggunakan estimasi masa manfaat ekonomis aset. Aset hak guna diuji penurunan nilainya sesuai dengan PSAK 236, "Penurunan Nilai Aset".

If ownership of the leased asset is transferred to the Bank at the end of the lease term or the lease payment reflects the exercise of the purchase option, depreciation is calculated using the estimated economic benefit of the asset. Rights of use assets are tested for impairment in accordance with PSAK 236, "Impairment of Assets".

Pada tanggal dimulainya sewa, Bank mengakui liabilitas sewa yang diukur pada nilai kini dari pembayaran sewa masa depan yang akan dilakukan selama masa sewa. Pembayaran sewa termasuk pembayaran tetap (termasuk pembayaran tetap secara-substansi) dikurangi piutang insentif sewa, pembayaran sewa variabel yang bergantung pada indeks atau suku bunga, dan jumlah yang diharapkan akan dibayar dalam jaminan nilai residu. Pembayaran sewa juga termasuk harga eksekusi opsi pembelian yang wajar jika dipastikan akan dilakukan oleh Bank dan pembayaran penalti untuk mengakhiri sewa, jika jangka waktu sewa mencerminkan Bank mengeksekusi opsi penghentian sewa. Pembayaran sewa variabel yang tidak tergantung pada indeks atau suku bunga diakui sebagai beban pada periode di mana peristiwa atau kondisi yang memicu pembayaran terjadi.

At the inception date of the lease, the Bank recognizes lease liabilities at the present value of future lease payments that will be made over the lease term. Lease payments include fixed payments (including substantially fixed payments) less lease incentive receivables, variable lease payments that are index or interest rate dependent, and the amount expected to be paid in a residual value guarantee. Lease payments also include the reasonable exercise price for the purchase option if it is determined to be made by the Bank and the payment of a penalty to terminate the lease, if the lease term reflects the Bank exercising the lease termination option. Variable lease payments that are independent of indexes or interest rates are recognized as an expense in the period in which the event or condition that triggers the payment occurs.

m. Aset dan Liabilitas Sewa (lanjutan)

Dalam menghitung nilai kini dari pembayaran sewa, Bank menggunakan suku bunga pinjaman inkremental penyewa pada tanggal dimulainya sewa karena suku bunga implisit dalam sewa tidak dapat ditentukan. Setelah tanggal dimulainya sewa, jumlah liabilitas sewa ditingkatkan untuk mencerminkan pertambahan bunga dan dikurangi pembayaran sewa yang dilakukan. Selain itu, jumlah tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan jangka waktu sewa, perubahan pembayaran sewa, atau perubahan dalam penilaian opsi untuk membeli aset pendasar.

Sewa jangka pendek dengan durasi kurang dari 12 bulan dan sewa aset bernilai rendah, serta elemen-elemen sewa tersebut, sebagian atau seluruhnya tidak menerapkan prinsip-prinsip pengakuan yang ditentukan oleh PSAK 116 akan diperlakukan sama dengan sewa operasi. Bank akan mengakui pembayaran sewa tersebut dengan dasar garis lurus selama masa sewa dalam laporan laba rugi. Beban ini diungkapkan pada beban umum dan administrasi.

Penerapan pencatatan PSAK 116 berlaku untuk seluruh sewa (kecuali sebagaimana yang disebutkan sebelumnya), yaitu sebagai berikut:

- (a) Mengungkapkan aset hak guna sebagai bagian dari aset tetap dan liabilitas sewa diungkapkan sebagai bagian dari liabilitas lain-lain dalam laporan posisi keuangan, yang diukur pada nilai kini pembayaran sewa masa depan;
- (b) Mencatat penyusutan aset hak guna dan bunga atas liabilitas sewa dalam laporan laba rugi;
- (c) Memisahkan jumlah total pembayaran ke bagian pokok (disajikan dalam kegiatan pendanaan) dan bunga (disajikan dalam kegiatan operasional) dalam laporan arus kas.

n. Aset Tak Berwujud

Aset tak berwujud diakui jika, dan hanya jika, biaya perolehan aset tersebut dapat diukur secara andal dan kemungkinan besar Bank akan memperoleh manfaat ekonomis masa depan dari aset tersebut.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

m. Lease Assets and Liabilities (continued)

In calculating the present value of lease payments, the Bank uses the incremental borrowing interest rate of the lessee at the start date of the lease because the interest rate implicit in the lease cannot be determined. After the commencement date of the lease, the amount of the lease liability is increased to reflect the increase in interest and less lease payments made. In addition, the carrying amount of the lease liability is remeasured if there are modifications, changes in the term of the lease, changes in lease payments, or changes in the valuation of the option to purchase the underlying asset.

Short-term leases with a duration of less than 12 months and leases of low value assets, as well as elements of the lease, partially or wholly do not apply the recognition principles stipulated by PSAK 116 will be treated the same as operating. Bank will recognize such lease payments on a straight-line basis over the lease term in the statement of profit or loss. These expenses are disclosed under general and administrative expenses.

The application of PSAK 116 listing applies to all leases (except as stated earlier), which are as follows:

- (a) Disclose rights of use assets as part of fixed assets and lease liabilities are disclosed as part of other liabilities in the statement of financial position, measured at the present value of future lease payments.
- (b) Record depreciation of rights of use assets and interest on lease liabilities in the statements of profit or loss;
- (c) Separating the total payment amount into principal (presented in financing activities) and interest (presented in operating activities) in the statement of cash flows.

n. Intangible Assets

Intangible assets are recognized if, and only if, its cost can be measured reliably and it is probable that expected future benefits that are attributable to it will flow to the Bank.

u. Surat Berharga yang Diterbitkan

Surat berharga yang diterbitkan pada pengukuran awal disajikan sebesar nilai wajar dikurangi dengan biaya transaksi yang dapat diatribusikan langsung dengan perolehan/penerbitan surat berharga yang diterbitkan.

Surat berharga yang diterbitkan diklasifikasikan sebagai liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi. Lihat Catatan 2.c.ii.b untuk kebijakan akuntansi untuk liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi.

v. Pinjaman yang Diterima

Pinjaman yang diterima merupakan dana yang diterima dari bank lain dengan liabilitas pembayaran kembali sesuai dengan persyaratan perjanjian pinjaman.

Pada pengukuran awal, pinjaman yang diterima disajikan sebesar nilai wajar dikurangi dengan biaya transaksi yang dapat diatribusikan langsung dengan perolehan/penerbitan pinjaman yang diterima. Pinjaman yang diterima diklasifikasikan sebagai liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi.

w. Perpajakan

Beban pajak terdiri dari pajak kini dan pajak tangguhan. Pajak diakui dalam laporan laba rugi, kecuali jika pajak tersebut terkait dengan transaksi atau kejadian yang langsung diakui ke ekuitas. Dalam hal ini, pajak tersebut masing-masing diakui dalam penghasilan komprehensif lain atau ekuitas.

Manajemen Bank mengevaluasi secara periodik implementasi terhadap peraturan perpajakan yang berlaku terutama yang memerlukan interpretasi lebih lanjut mengenai pelaksanaannya termasuk juga evaluasi terhadap surat ketetapan pajak yang diterima dari kantor pajak. Lebih lanjut, Bank membentuk cadangan, jika dianggap perlu, berdasarkan jumlah yang diestimasi akan dibayarkan ke kantor pajak.

u. Securities Issued

Securities issued are initially measured at fair value less directly attributable transaction costs. Subsequently, transactions costs are amortized using the effective interest rate up to the maturity of securities issued.

Securities issued are classified as financial liabilities at amortized cost. Refer to Note 2.c.ii.b for the accounting policy of financial liabilities measured at amortized cost.

v. Borrowings

In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

The Bank's management periodically evaluates the implementation of prevailing tax regulations especially those that are subject to further interpretation on its implementation, including evaluation on tax assessment letters received from tax authorities. w. Perpajakan (lanjutan)

Pajak penghasilan tangguhan diakui sepenuhnya, dengan menggunakan metode liabilitas untuk semua perbedaan temporer yang berasal dari selisih antara dasar pengenaan pajak aset dan liabilitas dengan nilai tercatatnya pada laporan keuangan. Namun, liabilitas pajak penghasilan tangguhan tidak diakui jika berasal dari pengakuan awal *goodwill*. Pajak penghasilan tangguhan juga tidak diperhitungkan jika pajak penghasilan tangguhan tersebut timbul dari pengakuan awal aset atau pengakuan awal liabilitas dalam transaksi yang bukan kombinasi bisnis yang pada saat transaksi tidak mempengaruhi laba akuntansi maupun laba kena pajak/rugi pajak.

Aset pajak tangguhan diakui apabila terdapat kemungkinan besar bahwa jumlah laba fiskal pada masa datang akan memadai untuk mengkompensasi aset pajak tangguhan yang muncul akibat perbedaan temporer tersebut.

Pajak tangguhan dihitung dengan menggunakan tarif pajak yang berlaku atau secara substansial diberlakukan pada periode dimana aset tersebut direalisasi atau liabilitas tersebut diselesaikan. Perubahan nilai tercatat aset dan liabilitas pajak tangguhan yang disebabkan oleh perubahan tarif pajak dibebankan pada tahun berjalan, kecuali untuk transaksi-transaksi yang sebelumnya telah langsung dibebankan atau dikreditkan ke ekuitas.

Koreksi atas liabilitas pajak diakui pada saat surat ketetapan pajak diterima, atau apabila diajukan keberatan dan/atau banding, maka koreksi diakui pada saat keputusan atas keberatan dan/atau banding tersebut diterima. Manajemen juga dapat membentuk pencadangan terhadap liabilitas pajak di masa depan sebesar jumlah yang diestimasikan akan dibayarkan ke kantor pajak jika berdasarkan evaluasi pada tanggal laporan posisi keuangan terdapat risiko pajak yang *probable*. Asumsi dan estimasi yang digunakan dalam perhitungan pembentukan cadangan tersebut memiliki unsur ketidakpastian.

Utang pajak penghasilan badan dan utang pajak lainnya Bank disajikan sebagai "Utang pajak" di laporan posisi keuangan. Aset pajak tangguhan disajikan bersih setelah dikurangi dengan liabilitas pajak tangguhan di laporan posisi keuangan.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

w. Taxation (continued)

Deferred income tax is provided in full, using the liability method, on temporary differences which arise from the difference between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred tax assets are recognized if it is probable that future taxable income will be sufficient to compensate deferred tax assets arising on the temporary differences.

Deferred tax is calculated using tax rates enacted or substantively applied to the period during which the asset is realized or the liability is settled. The changes to the carrying value of deferred tax assets and liabilities due to the changes of tax rates are charged in the current year, except for transactions which previously have been directly charged or credited to equity.

Amendments to taxation obligations are recorded when an assessment is received or, if appealed against, when the result of the appeal is determined. Management provides provision for future tax liability at the estimated amount that will be payable to the tax office if there is a probable tax exposure, based on management's assessment as of the date of statement of financial position. Assumptions and estimation used in the provisioning calculation may involve element of uncertainty.

Corporate tax payables and other tax payables of the Bank are presented as "Taxes payable" in the statement of financial position. Deferred tax asset is presented net of the deferred tax liabilities in the statement of financial position.

x. Pendapatan dan Beban Bunga

Pendapatan dan beban bunga untuk semua instrumen keuangan dengan *interest bearing* dihitung menggunakan metode suku bunga efektif dan dicatat sebagai "Pendapatan bunga" dan "Beban bunga" di dalam laporan laba rugi.

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari aset keuangan atau liabilitas keuangan dan metode untuk mengalokasikan pendapatan bunga atau beban bunga selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat untuk memperoleh nilai tercatat bersih dari aset keuangan atau liabilitas keuangan. Pada saat menghitung suku bunga efektif, bank mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, namun tidak mempertimbangkan kerugian kredit di masa datang. Perhitungan ini mencakup seluruh komisi, provisi, dan bentuk lain yang diterima oleh para pihak dalam kontak yang merupakan bagian tak terpisahkan dari suku bunga efektif, biaya transaksi, dan seluruh premi atau diskon lainnya.

Jika aset keuangan atau kelompok aset keuangan serupa telah diturunkan nilainya sebagai akibat kerugian penurunan nilai, maka pendapatan bunga yang diperoleh setelahnya diakui atas bagian aset keuangan yang tidak mengalami penurunan nilai dari aset keuangan yang mengalami penurunan nilai, berdasarkan suku bunga yang digunakan untuk mendiskontokan arus kas masa datang dalam menghitung kerugian penurunan nilai.

y. Pendapatan Provisi dan Komisi

Pendapatan provisi dan komisi dan biaya transaksi yang dapat diatribusikan secara langsung yang berkaitan dengan kegiatan pemberian kredit diakui sebagai bagian/(pengurang) dari biaya perolehan kredit dan akan diakui sebagai pendapatan bunga dengan cara diamortisasi berdasarkan metode suku bunga efektif.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

x. Interest Income and Expense

Interest income and expense for all interest-bearing financial instruments are recognized as "Interest income" and "Interest expense" in the statement of profit or loss using the effective interest method.

The effective interest method is a method of calculating the amortized cost of financial assets and liabilities and recognizing the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Bank estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all commissions, provision and other fees received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognized on the non-impaired portion of the impaired financial assets using the rate of interest used to discount the future cash flows for measuring the impairment loss.

y. Provision Income and Expense

Fees and commissions income and transaction cost that are directly attributable to lending activities are recognized as a part/(deduction) of outstanding loan and will be recognized as interest income by amortising the carrying value of loan using effective interest rate method.

y. Pendapatan Provisi dan Komisi (lanjutan)

Untuk kredit yang diberikan yang dilunasi sebelum jatuh temponya, saldo pendapatan provisi dan/atau komisi dan biaya transaksi yang dapat diatribusikan secara langsung yang belum diamortisasi, diakui pada saat kredit yang diberikan dilunasi.

Pendapatan provisi dan komisi lainnya yang tidak berkaitan langsung dengan kegiatan perkreditan atau jangka waktu tertentu diakui pada saat terjadinya transaksi.

z. Imbalan Kerja

Imbalan Kerja Jangka Pendek

Imbalan kerja jangka pendek diakui pada saat terhutang.

Imbalan Kerja Jangka Panjang dan Imbalan Pasca Kerja

Imbalan kerja jangka panjang dan imbalan pasca kerja, seperti pensiun, uang pisah, uang kompensasi, dan hak-hak lainnya dihitung berdasarkan Peraturan Bank.

Bank menetapkan program imbalan pasca kerja karyawan manfaat pasti yang bersifat non iuran (*non-contributory*). Sesuai dengan Undang-Undang, Bank harus menyediakan program dengan imbalan yang minimal sama dengan imbalan pensiun yang diatur dalam Undang-Undang. Imbalan pensiun sesuai dengan Undang-Undang adalah program imbalan pasti.

Liabilitas imbalan kerja merupakan nilai kini liabilitas imbalan pasti pada tanggal laporan posisi keuangan dikurangi dengan nilai wajar aset program, serta disesuaikan dengan keuntungan atau kerugian aktuarial dan biaya jasa lalu yang belum diakui. Nilai kini liabilitas imbalan pasti dihitung sekali setahun oleh aktuaris independen dengan menggunakan metode *projected unit credit*.

Nilai kini liabilitas imbalan pasti ditentukan dengan mendiskontokan estimasi arus kas masa depan dengan menggunakan tingkat bunga obligasi pemerintah dalam mata uang Rupiah sesuai dengan mata uang dimana imbalan tersebut akan dibayarkan dan yang memiliki jangka waktu yang sama dengan liabilitas imbalan pensiun yang bersangkutan.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

y. Provision Income and Expense (continued)

The direct attributable unamortized fees and commissions relating to loans which are settled prior to maturity are recognized upon settlement date of such loans.

Other fees and commissions income which are not directly related to lending activities or specific periods are recognized as revenue on the transaction date.

Short-term Employee Benefits

Short-term employee benefits are recognized when it is payable.

Long-term Employee Benefits and Post-Employment Benefits

Long-term employee benefits and post-employment benefits, such as pensions, severance pay, service pay, and other benefits are calculated in accordance with Bank's Regulations.

The Bank determines a defined non-contributory post employment benefit plan. In accordance with the Law, the Bank must provide a program with minimum benefits equal to the pension benefits provided for under the Law. Pension benefits in accordance with Law is a defined benefit plan.

The employee benefits liabilities represent the present value of the defined benefit liabilities at the date of statement of financial position, less the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service cost. The present value of defined benefit liabilities is calculated annually by an independent actuary using the projected unit credit method.

The present value of the defined benefit liabilities is determined by discounting the estimated future cash outflows using interest rates of high quality corporate bonds that are denominated in the currency in which the benefit will be paid, and that have terms to maturity approximating the terms of the related pension liability.

3. SUMBER KETIDAKPASTIAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI

Beberapa estimasi dan asumsi dibuat dalam rangka penyusunan laporan keuangan dimana dibutuhkan pertimbangan manajemen dalam menentukan metodologi yang tepat untuk penilaian aset dan liabilitas.

Manajemen membuat estimasi dan asumsi yang berimplikasi pada pelaporan nilai aset dan liabilitas atas tahun keuangan periode-periode selanjutnya. Semua estimasi dan asumsi yang diharuskan oleh PSAK adalah estimasi terbaik yang didasarkan standar yang berlaku. Estimasi dan pertimbangan dievaluasi secara terus menerus dan berdasarkan pengalaman masa lalu dan faktor-faktor lain termasuk harapan atas kejadian yang akan datang.

Walaupun estimasi dan asumsi ini dibuat berdasarkan pengetahuan terbaik manajemen atas kejadian dan tindakan saat ini, hasil yang timbul mungkin berbeda dengan estimasi dan asumsi semula.

Sumber utama ketidakpastian estimasi

a. Cadangan Kerugian Penurunan Nilai Aset Keuangan

Evaluasi cadangan kerugian penurunan nilai secara kolektif meliputi kerugian kredit yang melekat pada portofolio tagihan dengan karakteristik ekonomi yang serupa ketika terdapat bukti objektif bahwa telah terjadi penurunan nilai tagihan dalam portofolio tersebut, namun penurunan nilai secara individu belum dapat diidentifikasi. Dalam menentukan perlunya untuk membentuk cadangan kerugian penurunan nilai secara kolektif, manajemen mempertimbangkan faktor-faktor seperti kualitas kredit, besarnya portofolio, konsentrasi kredit, dan faktor-faktor ekonomi. Dalam mengestimasi cadangan yang dibutuhkan, asumsi-asumsi dibuat untuk menentukan model kerugian bawaan dan untuk menentukan parameter input yang diperlukan, berdasarkan pengalaman historis, kondisi ekonomi saat ini, dan prakiraan kondisi ekonomi di masa mendatang (*forecasting*).

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Several estimates and assumptions are made in the framework of the preparation of financial statements where management is required when determining appropriate methodologies for valuation of assets and liabilities.

Management makes estimates and assumptions that have implications for reporting the value of assets and liabilities over the financial year and subsequent periods. All the estimates and assumptions required by PSAK are the best estimates based on applicable standards. Estimates and considerations are continuously evaluated and are based from past experience and other factors including expectations of future events.

Although these estimates and assumptions are based on management's best knowledge of current events and actions, the results may differ from their original estimates and assumptions.

The key sources of estimation uncertainty

a. Allowance for Impairment losses of Financial Assets

Collectively assessed impairment allowances cover credit losses inherent in portfolios with similar economic characteristics when there is objective evidence to suggest that the impairment exists within the portfolio, but the individual impaired items cannot yet be identified. In determining the need to establish allowance for collective impairment, management considers factors such as credit quality, size of portfolio, credit concentrations, and economic factors. In estimating the required allowance, the assumptions are made to determine default and loss model to determine the required input parameters, based on historical experience, current economic conditions, and forecasting of future economic conditions.

3. SUMBER KETIDAKPASTIAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI (lanjutan)

Sumber utama ketidakpastian estimasi (lanjutan)

b. Nilai Wajar Instrumen Keuangan

Dalam menentukan nilai wajar aset dan liabilitas keuangan yang tidak mempunyai harga pasar, Bank menggunakan teknik penilaian seperti yang dijelaskan dalam Catatan 2.d untuk instrumen keuangan yang jarang diperdagangkan dan memiliki informasi harga yang terbatas, nilai wajar yang kurang objektif dan membutuhkan berbagai tingkat penilaian tergantung pada likuiditas, konsentrasi, faktor ketidakpastian pasar, asumsi harga dan risiko lainnya.

c. Imbalan Kerja

Perhitungan aktuaria menggunakan asumsi-asumsi seperti tingkat diskonto, tingkat pengembalian investasi, tingkat kenaikan gaji, tingkat kematian, tingkat pengunduran diri, dan lain-lain (lihat Catatan 2.z dan 24). Perubahan asumsi ini akan mempengaruhi nilai liabilitas imbalan kerja.

Bank menentukan tingkat diskonto yang sesuai pada akhir periode pelaporan, yakni tingkat suku bunga yang harus digunakan untuk menentukan nilai kini arus kas keluar masa depan estimasian yang diharapkan untuk menyelesaikan liabilitas imbalan kerja. Dalam menentukan tingkat suku bunga yang sesuai, Bank mempertimbangkan tingkat suku bunga obligasi pemerintah yang didenominasikan dalam mata uang imbalan akan dibayar dan memiliki jangka waktu yang serupa dengan jangka waktu liabilitas imbalan kerja yang terkait. Asumsi kunci liabilitas imbalan jangka panjang lainnya sebagian ditentukan berdasarkan kondisi pasar saat ini.

d. Penyusutan Aset Tetap dan Amortisasi Aset Tak Berwujud

Biaya perolehan aset tetap dan aset tidak berwujud disusutkan dan diamortisasi dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap dan aset tidak berwujud antara 4 sampai dengan 20 tahun sesuai dengan Catatan 2.l dan 2.n.

Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan dan amortisasi masa depan mungkin direvisi.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

The key sources of estimation uncertainty (continued)

b. Fair Value of Financial Instruments

In determining the fair value of financial assets and liabilities that do not have a market value, the Bank uses assessment techniques as described in Note 2.d for financial instruments that are traded infrequently and limited available price, fair value is less objective and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, price assumptions and other risks.

c. Employee Benefits

The actuarial calculations use assumptions such as discount rate, expected rate of return on investment, future salary increase, mortality rate, resignation rate, and others (see Notes 2.z and 24). Any changes in those assumptions will impact the liability balance of employee benefits liabilities.

The Bank determines the appropriate discount rate at the end of each year including interest rate that should be used to determine the present value of estimated future cash outflows expected to settle the pension liabilities. In determining the appropriate discount rate, the Bank considers the interest rates of Government Bonds denominated in the similar currency with payments that will be made and have terms to maturity approximating the terms of the related employee benefit liability. Other key assumptions for pension liabilities are determined based in part on current market conditions.

d. Depreciation of Fixed Assets and Amortization of Intangible Assets

Cost of acquisition of fixed assets are depreciated using the straight-line method based on their estimated economic useful life. Bank management estimates the useful lives of the assets between 4 (four) to 20 (twenty) years in accordance with Notes 2.l and 2.n.

Changes in the level of usage and technological developments could affect the economic useful lives and residual value of assets, and therefore future depreciation charges may be revised.

Sumber utama ketidakpastian estimasi (lanjutan)

e. Aset Pajak Tangguhan

Aset pajak tangguhan diakui atas jumlah pajak penghasilan terpulihkan (*recoverable*) pada periode mendatang sebagai akibat perbedaan temporer. Justifikasi manajemen diperlukan untuk menentukan jumlah aset pajak tangguhan yang dapat diakui, sesuai dengan perkiraan waktu dan tingkat laba fiskal di masa mendatang sejalan dengan strategi rencana perpajakan ke depan.

f. Pajak Penghasilan

Bank mengakui liabilitas atas pajak penghasilan badan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan.

g. Menentukan Jangka Waktu Kontrak dengan Opsi Perpanjangan dan Penghentian Kontrak - Bank Sebagai Lessee

Bank menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, Bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk menghentikan sewa, jika cukup wajar untuk tidak dilakukan.

Bank memiliki beberapa kontrak sewa yang mencakup opsi perpanjangan dan penghentian jangka waktu sewa. Bank menerapkan penilaian dalam mengevaluasi apakah dapat dipastikan jika akan menggunakan opsi untuk memperpanjang atau menghentikan sewa. Hal tersebut dilakukan dengan mempertimbangkan seluruh fakta dan keadaan yang relevan yang memberikan insentif ekonomi untuk melakukan perpanjangan atau penghentian sewa. Setelah tanggal dimulainya, Bank menilai kembali masa sewa, jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali dan mempengaruhi apakah lessee cukup pasti untuk mengeksekusi opsi memperpanjang atau menghentikan sewa.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

The key sources of estimation uncertainty (continued)

e. Deferred Tax Assets

Deferred tax assets are recognized for all deductible temporary differences, as long as it is likely that taxable income will be available so that the temporary differences can be used. Significant estimates by management is required in determining the amount of deferred tax assets that can be recognized, based on current usage and the level of taxable income and future tax planning strategies.

f. Income Tax

The Bank recognizes corporate income tax liabilities based on an estimate of whether there will be an additional corporate income tax.

g. Determine Term of Contract with Option to Extend and Terminate The Contract - The Bank as the Lessee

The Bank determines the lease term as the term of the lease that non-cancellable, along with the period covered by the option to extend the lease if it is certain to be exercised, or any period covered by the option to terminate the lease, if it is reasonably reasonable not to do so.

The Bank has several lease contracts which include an option to extend and terminate the lease term. The Bank applies its judgment in evaluating whether it can be ascertained if it will exercise the option to extend or terminate the lease. This is done by considering all relevant facts and circumstances that provide economic incentives to extend or terminate the lease. After the commencement date, the Bank reassesses the lease term, if there is a significant event or change in circumstances which is under its control and affects whether the lessee is certain enough to exercise the option to extend or terminate the lease.

38. RISIKO KREDIT

Risiko kredit merupakan risiko yang terjadi akibat kegagalan debitur dan/atau pihak lain dalam memenuhi kewajibannya kepada Bank. Untuk mengelola risikonya, Bank mengukur risiko kredit dari portofolio yang ada baik secara kuantitatif maupun kualitatif. Hal ini untuk memastikan kemungkinan kerugian dari tidak dibayarnya kredit yang diberikan menjadi seminimal mungkin, baik untuk debitur individual maupun secara keseluruhan.

Dalam melakukan pengelolaan risiko kredit, Bank berfokus pada beberapa unsur utama yang meliputi sumber daya risiko yang sadar risiko, kebijakan dan prosedur perkreditan yang mengutamakan prinsip kehati-hatian, proses persetujuan kredit yang transparan dan berjenjang oleh Komite Kredit, kriteria dan alat ukur risiko yang jelas, penyebaran risiko yang merata, administrasi dan dokumentasi yang lengkap serta pengawasan kredit secara berkesinambungan untuk menjaga kualitas kredit yang diberikan.

Bank melakukan pengawasan berkesinambungan untuk mengidentifikasi secara dini potensi risiko kredit yang mungkin timbul sehingga dapat dilakukan langkah-langkah penyelamatan maupun penyelesaian yang efisien dan efektif.

Dalam mengelola risiko kredit pensiun, Bank juga mempertimbangkan kinerja sumber pembayaran dari klaim asuransi. Secara berkala, Bank menilai kemampuan pembayaran dari asuransi atas klaim yang telah di tagihkan kepada asuradur dan melakukan penyesuaian cadangan kerugian penurunan nilai ketika bank menilai adanya pihak asuransi yang tidak dapat membayarkan klaim tersebut.

Sistem pengelolaan manajemen risiko kredit Bank telah dibakukan dalam suatu pedoman dan dikaji secara periodik.

38. CREDIT RISK

Credit risk is the risk which is caused by the failure of the debtor and/or other parties to meet obligations to the Bank. To manage the risks, the Bank measures the credit risk from existing portfolio both quantitatively and qualitatively. This is to minimize possibility of losses from loans default, both for individual and overall debtors.

In conducting credit risk management, the Bank focuses on several key elements that include risk-conscious risk resources, prudent banking policies and procedures, a transparent and tiered credit approval process by the Credit Committee, clear criteria and risk measurement tools, equitable distribution of risks, complete administration and documentation as well as continuous credit monitoring to maintain the loans.

The Bank conducts ongoing monitoring to identify early potential credit risks that may arise in order to carry out efficient and effective rescue and resolution measures.

In the managing pension credit risk, the Bank also take into consideration the performance of payment sources arising from insurance claims. Periodically, the bank evaluates the capacity of insurance companies to fulfill repayment obligations for submitted claims and makes requisite adjustments to the allowance for impairment losses when instances arise where insurers are unable to meet their payment obligations.

The Bank's credit risk management system has been standardized in a guideline and reviewed periodically.

38. RISIKO KREDIT (lanjutan)

a.(ii) Analisis eksposur maksimum terhadap risiko kredit setelah memperhitungkan pendukung kredit lainnya

Nilai tercatat dari aset keuangan Bank selain kredit yang diberikan dan efek-efek yang dibeli dengan janji dijual kembali menggambarkan eksposur maksimum atas risiko kredit.

Untuk kredit yang diberikan segmen Retail dan Mikro, Bank menggunakan agunan untuk meminimalkan risiko kredit. Bank menetapkan jenis dan nilai agunan yang dijamin sesuai skema kredit antara lain *physical collateral* (tanah, bangunan) dan *financial collateral* (tabungan, giro, deposito berjangka).

Apabila terjadi *default* (gagal bayar), Bank akan menggunakan agunan tersebut sebagai pilihan terakhir untuk pemenuhan kewajiban *counterparty*.

Untuk segmen Pensiunan, Bank meminimalkan risiko kredit dengan mewajibkan nasabahnya untuk menggunakan rekening Bank sebagai rekening penerimaan gaji pensiun. Untuk setiap kontrak kredit yang diberikan, Bank juga mewajibkan nasabahnya untuk memiliki asuransi jiwa.

b. Konsentrasi risiko aset keuangan dengan eksposur risiko kredit lokasi geografis

Analisis paparan maksimum eksposur untuk risiko kredit berdasarkan lokasi geografis tanpa memperhitungkan adanya agunan yang dikuasai atau *credit enhancement* lainnya pada tanggal 31 Desember 2025 dan 2024 adalah sebagai berikut:

38. CREDIT RISK (continued)

a.(ii) Analysis of maximum exposure to credit risk after taking into account other credit enhancements

The carrying amount of the Bank's financial assets other than loans and securities purchased under agreements to resell represents the maximum exposure to credit risk.

For loans in Retail and Micro segment, the Bank uses collateral to minimize credit risk. The Bank determines the types and values of collateral pledged under the credit scheme, among others, physical collateral (land, building) and financial collateral (savings deposits, demand deposits, time deposits).

In the event of default, the Bank will use the collateral as the last resort in recovering the obligation of the counterparty.

For Pension segment, the Bank minimizes credit risk by requiring its customers to use a bank account for the receipt of pensioner salaries. Additionally, for every credit contract given, the Bank also requires its customers to have life insurance.

b. Concentration of risks of financial assets with credit risk exposure geographic location

The analysis of maximum exposure for credit risk based on geographic location without taking into account any collateral held or other credit enhancement as of December 31, 2025 and 2024 is as follows:

Analisis Kualitas Kredit

Pengukuran Kerugian Kredit Ekspektasian

a. Peningkatan Risiko Kredit Secara Signifikan

Ketika menentukan apakah risiko gagal bayar pada instrumen keuangan telah meningkat secara signifikan sejak pengakuan awal, Bank mempertimbangkan informasi yang wajar dan didukung, serta relevan yang tersedia tanpa biaya atau upaya yang berlebihan. Hal tersebut mencakup informasi dan analisis kuantitatif dan kualitatif, berdasarkan pada pengalaman historis dan penilaian pakar kredit dan termasuk perkiraan masa depan (*forward-looking*).

Tujuan dari penilaian ini adalah untuk mengidentifikasi apakah peningkatan risiko kredit secara signifikan atas eksposur telah terjadi dengan membandingkan:

1. *Probability of default (PD)* atas umur tersisa pada tanggal pelaporan; dengan
2. *Probability of default (PD)* atas umur tersisa yang diestimasi pada saat pengakuan awal eksposur (jika relevan, disesuaikan dengan perubahan ekspektasi pembayaran dimuka).

Credit Quality Analysis

Measurement of Expected Credit Losses

a. Significant Increase on Credit Risk

When determining whether the risk of default on financial instruments has increased significantly since initial recognition, the Bank considers reasonable and supported, relevant information available without excessive costs or efforts. This includes quantitative and qualitative information and analysis, based on historical experience and credit expert judgement and including forward-looking estimates.

The purpose of this assessment is to identify whether a significant increase in credit risk over exposure has occurred by comparing:

1. *Probability of default (PD)* for the remaining aging at the reporting date; with
2. *Probability of default (PD)* for the estimated remaining aging at initial recognition of the exposure (if relevant, adjusted with changes in expectations of prepayment).

Analisis Kualitas Kredit (lanjutan)

Pengukuran Kerugian Kredit Ekspektasian (lanjutan)

a. Peningkatan Risiko Kredit Secara Signifikan (lanjutan)

Bank juga menggunakan kriteria berikut dalam menentukan apakah peningkatan risiko kredit secara signifikan atas eksposur telah terjadi:

1. Pengujian kuantitatif berdasarkan perubahan *probability of default* (PD)
2. Indikator kualitatif
3. Tertunggak lebih dari 30 hari.

b. Penentuan Struktur *Probability of Default*

Bank menggunakan model statistik untuk menganalisa data yang dikumpulkan dan menghasilkan perkiraan *probability of default* (PD) atas umur tersisa dan bagaimana hal ini diperkirakan akan berubah sebagai akibat dari berlalunya waktu.

c. Penentuan Struktur *Probability of Default*

Analisa ini mencakup identifikasi dan kalibrasi hubungan antara perubahan tingkat gagal bayar dan perubahan dalam faktor-faktor makro ekonomi utama serta analisa mendalam tentang dampak faktor-faktor lain tertentu (misalkan restrukturisasi) pada risiko gagal bayar.

d. Penentuan Terjadinya Peningkatan Risiko Kredit Secara Signifikan

Kriteria untuk menentukan apakah risiko kredit telah meningkat secara signifikan bervariasi untuk setiap portofolio dan termasuk perubahan kuantitatif pada PD dan faktor kualitatif, termasuk penentuan berdasarkan status hari tunggakan.

Risiko kredit dari eksposur tertentu dianggap telah meningkat secara signifikan sejak pengakuan awal jika, berdasarkan permodelan kuantitatif Bank, *probability of default* (PD) atas umur tersisa telah meningkat signifikan.

38. CREDIT RISK (continued)

d. Credit quality from financial assets (continued)

Credit Quality Analysis (continued)

Measurement of Expected Credit Losses (continued)

a. Significant Increase on Credit Risk (continued)

The Bank also uses the following criteria in determining whether a significant increase in credit risk over exposure has occurred:

1. Quantitative testing based on changes in the *probability of default* (PD)
2. Qualitative indicators
3. Overdue for 30 days.

b. Determination of Probability of Default Structure

The bank uses a statistical model to analyze the data collected and produce an estimate of the *probability of default* (PD) for the remaining life and how this is expected to change as a result of the passage of time.

c. Determination of Probability of Default Structure

This analysis includes the identification and calibration of the relationship between changes in default rates and changes in key macroeconomic factors as well as an in-depth analysis of the impact of certain other factors (eg restructuring) on the risk of default.

d. Determination of Significant Increase in Credit Risk

Criteria for determining whether credit risk has increased significantly varies for each portfolio and includes quantitative changes in PD and qualitative factors, including determination based on arrears day status.

Credit risk from certain exposures is considered to have increased significantly since initial recognition if, based on the Bank's quantitative modeling, the *probability of default* (PD) for the remaining life has increased significantly.

e. Penentuan Terjadinya Peningkatan Risiko Kredit Secara Signifikan

Bank juga dapat menggunakan penilaian dari analisis kredit dan, jika mungkin, pengalaman historis yang relevan, dalam menentukan bahwa mungkin eksposur telah mengalami peningkatan risiko kredit yang signifikan berdasarkan indikator kualitatif tertentu yang dianggap dapat mengindikasikan hal tersebut dan pengaruhnya mungkin tidak sepenuhnya tercermin dalam analisis kuantitatif secara tepat waktu.

Bank menentukan bahwa peningkatan risiko kredit secara signifikan belum terjadi apabila masih kurang dari 30 hari tunggakan. Hari tunggakan ditentukan dengan menghitung jumlah hari sejak tanggal jatuh tempo awal dimana pembayaran penuh belum diterima. Tanggal jatuh tempo ditentukan tanpa mempertimbangkan masa tenggang yang mungkin tersedia bagi peminjam.

Bank memantau efektivitas kriteria yang digunakan dalam mengidentifikasi peningkatan risiko kredit yang signifikan dengan cara review berkala.

f. Modifikasi Aset Keuangan

Ketentuan kontraktual pinjaman dapat dimodifikasi untuk beberapa alasan, termasuk perubahan kondisi pasar, retensi pelanggan dan faktor-faktor lain yang tidak terkait dengan penurunan kredit saat pinjaman yang ketentuan kontraktualnya dimodifikasi dapat menyebabkan pinjaman awal dihentikan pengakuannya dan pinjaman hasil modifikasi diakui sebagai pinjaman baru pada nilai wajar.

38. CREDIT RISK (continued)

d. Credit quality from financial assets (continued)

Credit Quality Analysis (continued)

Measurement of Expected Credit Losses (continued)

e. Determination of Significant Increase in Credit Risk

The Bank can also use the judgment of credit analysts and, if possible, relevant historical experience, in determining that exposure may have experienced a significant increase in credit risk based on certain qualitative indicators that are considered to indicate this and their effects may not be fully reflected in quantitative analysis in a comprehensive manner on time.

The Bank determines that a significant increase in credit risk has not occurred if it is still less than 30 days overdue. Arrears days are determined by calculating the number of days from the initial due date where full payment has not been received. The due date is determined without considering the grace period that might be available to the borrower.

The Bank monitors the effectiveness of the criteria used in identifying significant increases in credit risk by periodic review.

f. Modification of Financial Assets

The contractual terms of the loan can be modified for several reasons, including changes in market conditions, customer retention and other factors not related to the current credit decline. Loans with modified contractual terms can cause the initial loan to be derecognized and the loan as a result of the modification is recognized as a new loan at fair value.

f. Modifikasi Aset Keuangan (lanjutan)

Ketika ketentuan kontraktual pinjaman dimodifikasi dan tidak mengakibatkan penghentian pengakuan, penentuan terjadinya peningkatan risiko kredit secara signifikan dilakukan dengan cara membandingkan:

- sisa PD sepanjang umur pada tanggal pelaporan berdasarkan ketentuan yang dimodifikasi; dengan
- sisa PD sepanjang umur yang diestimasi berdasarkan data pada saat pengakuan awal dan ketentuan kontraktual awal.

g. Definisi Gagal Bayar (Default)

Bank menganggap aset keuangan dalam keadaan *default* (gagal bayar) ketika:

- Debitur tidak mungkin membayar kewajiban kreditnya kepada secara penuh, tanpa bantuan (*recourse*) dari kelompok usahanya; atau
- Debitur telah melewati jatuh tempo lebih dari 90 hari atas kewajiban kredit material apapun kepada kelompok usahanya.

Dalam menilai apakah debitur dalam keadaan *default* (gagal bayar), Bank mempertimbangkan indikator berikut:

- Kuantitatif - seperti status tunggakan; dan
- Berdasarkan data yang dikembangkan secara internal dan diperoleh dari sumber eksternal.

38. CREDIT RISK (continued)

d. Credit quality from financial assets (continued)

Credit Quality Analysis (continued)

Measurement of Expected Credit Losses (continued)

f. Modification of Financial Assets (continued)

When the contractual terms of the loan are modified and do not result in termination of recognition, determining the occurrence of a significant increase in credit risk is done by comparing:

- remaining lifetime PD at reporting date based on modified provisions; with
- remaining lifetime PD estimated based on data at initial recognition and initial contractual provisions.

g. Definition of Default

The Bank considers financial assets as *default* when:

- The debtor is unlikely to fully paid its loan obligations, without support (*recourse*) from the business group; or
- The debtor has more than 90 days past due for any material loan obligations to its business group.

In assessing whether a debtor is in *default*, the Bank considers the following indicators:

- Quantitative - such as overdue status; and
- Based on data developed internally and obtained from external sources.

Analisis Kualitas Kredit (lanjutan)

Input, Asumsi, dan Teknik yang digunakan dalam mengestimasi penurunan nilai

a. Penggunaan informasi perkiraan masa depan (*forward-looking*)

Bank menggunakan informasi *forward-looking* dalam menilai apakah telah terjadinya peningkatan risiko kredit secara signifikan dan pengukuran kerugian kredit ekspektasian. Berdasarkan saran dari Komite Manajemen Risiko, pakar ekonomi dan pertimbangan berbagai informasi aktual dan perkiraan eksternal, Bank merumuskan pandangan dasar (*base case*) tentang pergerakan variabel ekonomi yang relevan di masa depan serta perkiraan skenario lain yang mungkin terjadi. Proses ini meliputi pengembangan dua atau lebih skenario ekonomi tambahan dan mempertimbangkan probabilitas relatif dari keluaran (*output*) yang mungkin. Informasi eksternal mencakup data ekonomi dan perkiraan yang diterbitkan oleh berbagai pihak seperti badan pemerintah dan analisis sektor swasta dan akademisi terpilih.

Pandangan dasar (*base case*) mencerminkan keluaran dengan probabilitas yang paling tinggi dan digunakan dalam perencanaan strategis dan anggaran. Skenario yang lain, mencerminkan keluaran yang lebih optimis dan keluaran yang lebih pesimis.

38. CREDIT RISK (continued)

d. Credit quality from financial assets (continued)

Credit Quality Analysis (continued)

Inputs, Assumptions, and Techniques used in estimating impairment

a. Use of forward-looking formation

The Bank uses forward-looking information in assessing whether there has been a significant increase in credit risk and in measuring expected credit losses. Based on suggestions from the Risk Management Committee, economic experts and consideration of various actual and external forecast information, the Bank formulates a basic view (*base case*) on the movement of relevant economic variables in the future as well as estimates of other possible scenarios. This process involves developing two or more additional economic scenarios and considering the relative probability of the possible outputs. External information includes economic data and forecasts published by various parties such as government agencies and selected private sector analysts and academics.

The base case reflects the output with the highest probability and is used in strategic planning and budgeting. The other scenario reflects a more optimistic output and a more pessimistic outcome.

Analisis Kualitas Kredit (lanjutan)

Input, Asumsi, dan Teknik yang digunakan dalam mengestimasi penurunan nilai (lanjutan)

b. Pengukuran Kerugian Kredit Ekspektasi (lanjutan)

Parameter ini umumnya berasal dari model statistik yang dikembangkan secara internal dan data historis lainnya. Parameter ini disesuaikan untuk mencerminkan informasi *forward-looking*.

Estimasi PD adalah estimasi pada tanggal tertentu, yang dihitung berdasarkan model peringkat statistik, dan dinilai menggunakan rating yang disesuaikan dengan berbagai kategori dari debitur dan eksposur. Model statistik ini didasarkan pada data yang disusun secara internal yang terdiri dari faktor kuantitatif dan kualitatif.

LGD adalah besarnya kerugian jika terjadi gagal bayar. Parameter LGD diestimasi secara historis berdasarkan tingkat pemulihan atas klaim terhadap debitur yang gagal bayar. Model LGD mempertimbangkan struktur, jaminan, senioritas klaim, industri debitur, dan biaya pemulihan setiap jaminan yang merupakan bagian integral dari aset keuangan.

EAD merepresentasikan estimasi eksposur jika terjadi gagal bayar. EAD suatu aset keuangan adalah jumlah tercatat bruto. Untuk komitmen pinjaman dan jaminan keuangan, EAD mencakup jumlah yang telah ditarik, serta jumlah potensial di masa depan yang akan ditarik, yang diestimasi berdasarkan pengamatan historis dan perkiraan berwawasan ke depan (*forward-looking*).

Ketika pemodelan parameter dilakukan secara kolektif, instrumen keuangan dikelompokkan berdasarkan kesamaan karakteristik risiko yang meliputi:

- Jenis instrumen;
- Kolektabilitas;
- Tanggal pengakuan awal;
- Sisa waktu jatuh tempo.

38. CREDIT RISK (continued)

d. Credit quality from financial assets (continued)

Credit Quality Analysis (continued)

Inputs, Assumptions, and Techniques used in estimating impairment (continued)

b. Measurement of Expected Credit Loss (continued)

These parameters generally come from internally developed statistical models and other historical data. This parameter is adjusted to reflect forward-looking information.

Estimated PD is an estimate at a specific date, which is calculated based on a statistical ranking model, and is assessed using a rating adjusted for various categories of debtors and exposures. This statistical model is based on internally compiled data consisting of quantitative and qualitative factors.

LGD is the amount of loss in the event of default. The LGD parameter is estimated historically based on the rate of recovery of claims against default debtors. The LGD model takes into account the structure, guarantees, seniority of claims, the debtor's industry, and the cost of recovery of each guarantee that is an integral part of a financial asset.

EAD represents the estimated exposure in the event of default. The EAD of a financial asset is the gross carrying amount. For loan commitments and financial guarantees, EAD includes the amount that has been drawn, as well as the potential future amount to be withdrawn, which is estimated based on historical observations and forward-looking estimates.

When parameter modeling is carried out collectively, financial instruments are grouped based on common risk characteristics which include:

- *Instrument type;*
- *Collectability;*
- *Initial recognition date;*
- *Remaining maturity.*

39. RISIKO LIKUIDITAS

Risiko likuiditas merupakan risiko akibat ketidakmampuan Bank untuk memenuhi liabilitas yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank.

Pengelolaan risiko likuiditas antara lain dilakukan melalui upaya peningkatan pelayanan kepada nasabah penyimpan dalam rangka menjaga stabilitas dan kontinuitas jumlah simpanan, kebijakan penempatan dana pada instrumen yang aman dan likuid, kebijakan *contingency funding plan*, dan pemantauan posisi likuiditas secara harian serta evaluasi posisi likuiditas melalui rapat *Asset Liability Committee* ("ALCO") secara rutin.

39. LIQUIDITY RISK

Liquidity risk is a risk due to the inability of the Bank to meet the maturing obligations from cash flow funding and/or of high quality liquid assets that can be pledged, without disrupting the activities and the Bank's financial condition.

Liquidity risk management, among others, is done through efforts to improve services to depositors in order to maintain stability and continuity of deposits, fund placement policies on safe and liquid instruments, contingency funding plan policy, and monitoring of daily liquidity position and evaluation of liquidity position through Asset Liability Committee ("ALCO") meetings on a regular basis.

40. RISIKO TINGKAT SUKU BUNGA

Bank melakukan pengukuran risiko tingkat suku bunga dengan menggunakan metodologi yang dapat mengidentifikasi risiko tingkat suku bunga dari portofolio aset dan liabilitas yang sensitif terhadap perubahan suku bunga serta menentukan besaran risiko terhadap Bank.

Untuk mengendalikan risiko tingkat suku bunga tersebut, Bank menjadikan tingkat suku bunga penjaminan dari Lembaga Penjaminan Simpanan sebagai salah satu acuan dalam menetapkan tingkat suku bunga dana pihak ketiga dan tingkat suku bunga kredit. Selain itu, penghimpunan dana Bank selalu dikaitkan dengan kemampuan penyalurannya, serta diupayakan tidak terjadi negative interest gap sehingga net interest margin yang diperoleh Bank selalu dalam kondisi positif dan risiko tingkat suku bunga dapat ditekan seminimal mungkin.

Tabel di bawah ini mengikhtisarkan aset dan liabilitas keuangan Bank pada nilai tercatat, yang dikategorikan berdasarkan jangka waktu kontrak pada tanggal 31 Desember 2025 dan 2024:

40. INTEREST RATE RISK

The Bank assesses interest rate risk using a methodology that identifies interest rate risk from asset and liability portfolios that are sensitive to changes in interest rates and determines the amount of risk to the Bank.

To control the interest rate risk, the Bank sets the guarantee interest rate of the Deposit Insurance Corporation as one of the references in determining the interest rate of third party funds and the loan interest rate. In addition, the collection of the Bank's funds is always associated with the ability of distribution, as well as attempted non-negative interest gap so that the net interest margin obtained by the Bank is always in a positive condition and interest rate risk can be minimized.

The table below summarizes the Bank's financial assets and liabilities at their carrying values, categorized under contract terms as of December 31, 2025 and 2024, respectively:

Berikut metode dan asumsi yang digunakan untuk perkiraan nilai wajar:

Nilai wajar aset dan liabilitas keuangan tertentu selain efek-efek, kredit yang diberikan dan surat berharga yang diterbitkan mendekati nilai tercatat karena instrumen keuangan tersebut memiliki jangka waktu jatuh tempo yang singkat dan/atau suku bunganya sering ditinjau ulang.

Nilai wajar dari kredit yang diberikan dengan suku bunga mengambang dan nilai tercatat atas kredit jangka pendek dengan suku bunga tetap adalah perkiraan yang layak atas nilai wajar. Nilai wajar dari kredit jangka panjang yang diberikan dengan suku bunga tetap dengan mendiskonto arus kas masa depan menggunakan tingkat suku bunga yang tersedia untuk pinjaman dengan persyaratan, risiko kredit dan sisa jangka waktu jatuh tempo yang serupa.

Nilai wajar dari efek-efek yang diukur pada nilai wajar melalui penghasilan komprehensif lain, yang diukur pada nilai wajar melalui laba rugi, dan biaya perolehan amortisasi dinilai menggunakan harga kuotasi pasar.

41. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES (continued)

The following table presents assets and liabilities recognized at fair value based on the hierarchy used by the Bank to determine and disclose the fair value of assets and liabilities: (continued)

The following are the methods and assumptions used for the fair value estimates:

The fair value of certain financial assets and liabilities except for securities, loans and securities issued approximates the carrying amount because those financial instruments have short-term maturities and/or interest rates are frequently reviewed.

The fair value of loans with floating rates and the carrying value of short-term fixed-rate loans is a fair estimate of fair value. The fair value of long-term loans are provided at a fixed rate by discounting future cash flows using the interest rates available for the loan on terms, credit risks and remaining maturities of a similar nature.

The fair value of securities at fair value through other comprehensive income, at fair value through profit or loss, and amortized cost is valued using the market quotation price.

Hal audit utama (lanjutan)

Cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah

Penjelasan atas hal audit utama:

Seperti yang dijelaskan dalam Catatan 12 atas laporan keuangan konsolidasian terlampir, pada tanggal 31 Desember 2025, total kredit yang diberikan dan piutang/pembiayaan syariah Grup adalah Rp1.849.967.956 juta dengan cadangan kerugian penurunan nilai atau kerugian kredit ekspektasian ("KKE") atas kredit yang diberikan dan piutang/pembiayaan syariah adalah sebesar Rp48.033.747 juta dan ditetapkan berdasarkan Pernyataan Standar Akuntansi Keuangan (PSAK) yang berlaku.

Untuk menentukan penyisihan kerugian penurunan nilai, Grup mengadopsi model kompleks yang menggunakan sejumlah parameter yang bergantung pada data input internal dan eksternal, melibatkan penilaian dan asumsi manajemen yang subjektif dengan tingkat ketidakpastian yang tinggi.

Kredit yang diberikan

Penerapan model KKE oleh Grup dalam menghitung penyisihan kerugian kredit dari kredit yang diberikan adalah signifikan bagi audit kami karena melibatkan pelaksanaan pertimbangan manajemen yang signifikan. Area pertimbangan yang utama termasuk: menentukan segmentasi kredit berdasarkan risiko kredit, menentukan model untuk perhitungan KKE, menentukan definisi gagal bayar, identifikasi eksposur kredit yang mengalami pemburukan kualitas kredit secara signifikan dan menentukan asumsi signifikan yang digunakan pada model KKE, termasuk faktor ekonomi makro berorientasi masa depan.

Allowance for impairment losses on loans and sharia receivables/financing

Description of key audit matter:

As described in Note 12 to the accompanying consolidated financial statements, as of 31 December 2025, the Group's loans and sharia financing/receivables was Rp1,849,967,956 million and the allowance for impairment losses or expected credit losses ("ECL") on loans and sharia financing/receivables was Rp48,033,747 million and was determined based on the applicable Statement of Financial Accounting Standards (SFAS).

To determine the allowance for impairment losses, the Group adopted a complex model that used a number of parameters relied on internal and external data inputs and involved subjective management judgment and assumptions subject to high degree of uncertainty.

Loans

The Group's application of the ECL in calculating the allowance for credit losses of loans to customers is significant to our audit as it involves the exercise of significant management judgment. Key areas of judgment include: determining credit segmentation based on credit risk, determining the model to calculate ECL, defining default, identification of credit exposures with significant deterioration in credit quality and determining significant assumptions used in the ECL model, including forward-looking macroeconomic factors.

Kami menguji pengendalian umum teknologi informasi (TI) atas sistem perhitungan penyisihan kerugian penurunan nilai serta pengendalian aplikasi TI atas kelengkapan data.

Kami juga menguji tiga tahapan kualitas kredit portofolio sesuai dengan kriteria tahapan (*staging*) yang ditetapkan oleh manajemen untuk kredit yang diberikan. Kami juga menguji konsistensi antara pengalaman historis dan kondisi sekarang dengan kerugian terkini pada portofolio serta menilai kewajaran penyesuaian asumsi masa depan, analisis faktor ekonomi makro, dan beberapa skenario probabilitas tertimbang untuk kredit yang diberikan.

Untuk penyisihan penurunan nilai yang ditentukan secara individual, kami menguji sampel kredit yang diberikan untuk mengevaluasi apakah identifikasi dilakukan secara tepat waktu terhadap eksposur dengan penurunan kualitas kredit yang signifikan atau yang telah mengalami penurunan nilai. Untuk kredit yang diberikan yang diidentifikasi mengalami penurunan nilai, kami menilai asumsi utama atas arus kas masa depan yang akan diterima yang berasal dari kegiatan operasi, termasuk nilai jaminan yang dapat direalisasikan berdasarkan informasi pasar yang tersedia atau penilaian yang dilakukan oleh pakar manajemen atau manajemen sendiri.

We tested the information technology (IT) general controls over the allowance for impairment losses calculation system as well as the IT application controls over the completeness of the data.

We also tested the classification into the three-stage credit quality of loan portfolios in accordance with staging criteria established by the management regarding loans. We evaluated consistency of historical experience and the current circumstances with recent losses in the portfolios and assessed the reasonableness of forward-looking adjustments, macroeconomic factor analysis and probability-weighted multiple scenarios for loans.

With respect to individually assessed allowance for impairment losses, we tested a sample of loans to evaluate whether the timely identification was made for exposures with significant deterioration in credit quality or exposures which have been impaired. For loans identified to be impaired, we assessed key assumptions on the expected future cash flows from operating activities, including the realizable value of realizable collateral based on available market information or valuation prepared by the management's expert or the management itself.

Valuasi estimasi terbaik liabilitas kontrak asuransi dan marjin jasa kontraktual

Penjelasan atas hal audit utama:

Seperti yang dijelaskan dalam Catatan 27, liabilitas kontrak asuransi, atas laporan keuangan konsolidasian, nilai liabilitas kontrak asuransi, yang terutama terdiri dari liabilitas estimasi terbaik dan marjin jasa kontraktual masing-masing sebesar Rp32.164.590 juta dan Rp3.295.245 juta pada tanggal 31 Desember 2025.

Liabilitas estimasi terbaik (LET)

Kewajiban untuk menentukan penyelesaian klaim masa depan melibatkan model dalam menentukan penyelesaian arus kas yang kompleks dan sensitif terhadap asumsi ekonomi dan non-ekonomi yang ditetapkan oleh manajemen. Diperlukan pertimbangan dalam menetapkan asumsi ekonomi, khususnya tingkat diskonto (termasuk penyesuaian premi ilikuiditas) dan asumsi imbal hasil investasi dan dalam menentukan asumsi non-ekonomi sehubungan dengan mortalitas, morbiditas (termasuk biaya klaim medis), persistensi, dan beban (termasuk atribusi PSAK 117).

Terdapat risiko bahwa asumsi tidak mencerminkan lingkungan ekonomi dan demografi serta pengalaman operasional Grup. Dikarenakan adanya unsur pertimbangan dalam penetapan asumsi non-ekonomi dan sensitivitas atas saldo kontrak asuransi terhadap perubahan kecil dalam asumsi, maka terdapat risiko inheren atas estimasi oleh manajemen di area ini.

Valuation of the best estimate insurance contract liabilities and contractual service margin

Description of the key audit matter:

As described in Note 27, insurance contract liabilities, to the consolidated financial statements, the insurance contract liabilities mainly consist of the best estimate liabilities and contractual service margin of Rp32,164,590 million and Rp3,295,245 million, respectively, as of 31 December 2025.

Best estimate liabilities (BEL)

The determination of the BEL is calculated using complex fulfilment cashflow models and is sensitive to economic and non-economic assumptions set by management. Judgment is involved in setting economic assumptions, particularly discount rates (including the illiquidity premium adjustment) and investment return assumptions and in determining non-economic assumptions with respect to mortality, morbidity (including medical claims costs), persistency, and expenses (including SFAS 117 attribution).

There is a risk that assumptions do not reflect the economic environment and the Group's demographic and operating experience. Due to the element of judgment in setting non-economic assumptions and the sensitivity of the insurance contract balances to small changes in assumptions, there is an inherent risk of management's estimation in this area.

Liabilitas estimasi terbaik (LET) (lanjutan)

Kami menganggap integritas dan kesesuaian atas model dalam menentukan penyelesaian arus kas yang digunakan dalam saldo LET sangat penting dalam penilaian saldo kontrak asuransi. Kami juga mempertimbangkan risiko-risiko utama terkait kesesuaian pengaturan asumsi ekonomi dan non ekonomi, model yang diterapkan pada model penyelesaian arus kas, kelengkapan dan keakuratan data pemegang polis sebagai signifikan.

Marjin jasa kontrak (MJK)

Amortisasi dari MJK diukur dari servis yang diberikan, sesuai dengan unit jasa pertanggungan, dan sesuai dengan saldo awal MJK yang disesuaikan dengan mutasi selama periode, termasuk penambahan terhadap MJK selama periode dari bisnis baru, akresi bunga untuk kontrak asuransi yang diukur menggunakan Model Pengukuran Umum (MPU), perubahan nilai wajar dari aset yang mendasari untuk kontrak yang diukur dengan Pendekatan Biaya Variabel (PBV) dan perubahan dalam arus kas pemenuhan yang terjadi dari perubahan asumsi non-ekonomi, dan untuk PBV, perubahan asumsi ekonomi, yang terkait dengan jasa masa depan.

Perhitungan MJK adalah kompleks dan melibatkan asumsi yang mengandung subjektivitas dalam menentukan unit jasa pertanggungan dan pergerakan dalam MJK.

Description of the key audit matter: (continued)

Best estimate liabilities (BEL) (continued)

We consider the integrity and appropriateness of fulfilment cashflow models used to determine BEL to be critical to the valuation of insurance contract balances. We also consider the key risks that relate to appropriateness of economic and non-economic assumption settings, model applied to the fulfilment cashflow models, completeness and accuracy of policyholder data as significant.

Contractual service margin (CSM)

The release of CSM is measured based on the level of service provided, as measured by coverage units, and is based on the opening CSM adjusted for movements in the period, including additions to the CSM during the period in respect of new business, interest accretion for contracts measured using General Measurement Model (GMM), the change in fair value of underlying items for contracts measured using Variable Fee Approach (VFA) and changes in fulfilment cashflows arising from changes in non-economic assumptions, and for VFA, changes in economic assumptions, that relate to future service.

The calculations of CSM are complex and involved subjectivity of assumptions in determining coverage units and movements in the CSM.

Best estimate liabilities (BEL)

We gained an understanding of management's valuation of the best estimate insurance contract liabilities. We evaluated the valuation of the best estimate insurance contract liabilities, by involving auditor's expert. We obtained an understanding over management's process for setting economic and non-economic assumptions. For economic assumptions, we tested discount rates (along with the illiquidity premium assumptions) and investment return assumptions for a sample of currencies by reference to yield curves and compared the information used to the prevailing SFAS. For non-economic assumptions, we compared the key assumptions other than expense assumptions set by management with the results of management's experience, and regulatory developments around product featured and compared the expense assumptions to the historical and current expenses levels and policy relating to the attribution of expenses to insurance contracts.

We tested that the assumptions used in the models were consistent with approved basis. We obtained an understanding of management's processes over the appropriateness of model changes, completeness and accuracy of policy data.

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting, unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Tanggung jawab auditor terhadap audit atas laporan keuangan konsolidasian

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor independen yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit yang ditetapkan oleh IAPI akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian atas pengendalian internal.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing established by the IICPA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to such risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or override of internal control.*

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga: (lanjutan)

- Memeroleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektivitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor independen kami ke pengungkapan terkait dalam laporan keuangan atau, jika pengungkapan tersebut tidak memadai, memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor independen kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usaha.

Auditor's responsibilities for the audit of the consolidated financial statements (continued)

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also: (continued)

- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our independent auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusion is based on the audit evidence obtained up to the date of our independent auditor's report. However, future events or conditions may cause the Group to cease to continue as going concern.*

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe such key audit matters in our independent auditor's report unless laws or regulations preclude public disclosure about such key audit matters or when, in extremely rare circumstances, we determine that a key audit matter should not be communicated in our independent auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1. INFORMASI UMUM (lanjutan)

b. Penggabungan usaha

Pada akhir bulan Februari 1998, Pemerintah Republik Indonesia (selanjutnya disebut "Pemerintah") mengumumkan rencana untuk melakukan restrukturisasi atas Bank Peserta Penggabungan.

Sehubungan dengan rencana restrukturisasi tersebut, Pemerintah mendirikan Bank Mandiri pada bulan Oktober 1998 dengan melakukan penyeteroran tunai dan pengalihan saham Pemerintah pada Bank Peserta Penggabungan (Catatan 40a dan 40b). Selisih antara harga transfer dan nilai buku saham pada saat restrukturisasi tidak dihitung karena dinilai tidak praktis. Seluruh kerugian yang timbul selama periode restrukturisasi diakui dalam Program Rekapitalisasi.

Rencana restrukturisasi tersebut dirancang untuk menggabungkan usaha Bank Peserta Penggabungan ke dalam Bank Mandiri pada bulan Juli 1999 dan rekapitalisasi Bank Mandiri. Restrukturisasi Bank Peserta Penggabungan ke dalam Bank Mandiri juga mencakup:

- i. Restrukturisasi kredit yang diberikan;
- ii. Restrukturisasi aset non-kredit yang diberikan;
- iii. Rasionalisasi kantor cabang di dalam dan luar negeri;
- iv. Rasionalisasi sumber daya manusia.

Berdasarkan Akta Notaris Sutjipto, S.H., No. 100 tanggal 24 Juli 1999, Bank Peserta Penggabungan secara hukum melakukan penggabungan usaha ke dalam Bank Mandiri. Akta Penggabungan Usaha tersebut disahkan oleh Menteri Kehakiman Republik Indonesia dengan Surat Keputusan No. C-13.781.HT.01.04.TH.99 tanggal 29 Juli 1999 dan disetujui oleh Gubernur Bank Indonesia dengan Surat Keputusan No. 1/9/KEP.GBI/1999 tanggal 29 Juli 1999. Penggabungan tersebut dinyatakan sah oleh Kepala Kantor Departemen Perindustrian dan Perdagangan Jakarta Selatan melalui Surat Keputusan No. 09031827089 tanggal 31 Juli 1999.

b. Merger

At the end of February 1998, the Government of the Republic of Indonesia (hereinafter referred to as "Government") announced its plan to restructure the Merged Banks.

In connection with the restructurisation plan, the Government established Bank Mandiri in October 1998 through the payment of cash and the transfer the Government's shares of the Merged Banks (Note 40a and 40b). The difference between the transfer price and the book value of the shares at the time of the restructurisation was not calculated as it was considered not practicable to do so. All losses incurred during the year of restructuring were recognised in the Recapitalisation Program.

The restructurisation plan was designed to merge the Merged Banks' business into Bank Mandiri on July 1999 and the recapitalisation of Bank Mandiri. The restructurisation of the Merged Banks into Bank Mandiri also covered the following:

- i. Restructurisation of loans;
- ii. Restructurisation of non-loan assets;
- iii. Rationalisation of domestic and overseas offices;
- iv. Rationalisation of human resources.

Based on the Notarial Deed of Sutjipto, S.H., No. 100 dated 24 July 1999, the Merged Banks were legally merged into Bank Mandiri. The Merger Deed was legalised by the Ministry of Justice of the Republic of Indonesia in its Decision Letter No. C-13.781.HT.01.04.TH.99 dated 29 July 1999 and approved by the Governor of Bank Indonesia in its Decision Letter No. 1/9/KEP.GBI/1999 dated 29 July 1999. The merger was declared effective by the Department Chief of the South Jakarta Industry and Trade Office in its Decision Letter No. 09031827089 dated 31 July 1999.

- Full Retrospective Approach (FRA) method for traditional products with General Measurement Model (GMM) for Cohort issue from 1 January 2017 until 31 December 2023 (i.e., Cohort Post 2017).
- Modified Retrospective Approach (MRA) method for all Unit Link Products with Variable Fee Approach (VFA) measurement model for all Cohort issue from inception date until 31 December 2023.
- Fair Value Approach (FVA) method for traditional products with GMM model measurement model for Cohort issue from inception until 31 December 2016 (i.e., Cohort Pre 2017).

c. Instrumen keuangan (lanjutan)

i. Aset keuangan (lanjutan)

Grup menggunakan 2 (dua) dasar untuk mengklasifikasikan aset keuangan yaitu model bisnis Grup dalam mengelola aset keuangan dan karakteristik arus kas kontraktual pembayaran pokok dan bunga (*Solely Payment of Principal and Interest* ("SPPI")) dari aset keuangan.

Pengujian SPPI

Sebagai langkah pertama dari proses klasifikasi, Grup menilai persyaratan kontraktual keuangan untuk mengidentifikasi apakah mereka memenuhi pengujian SPPI.

Pokok pinjaman untuk tujuan pengujian ini didefinisikan sebagai nilai wajar dari aset keuangan pada pengakuan awal dan dapat berubah selama umur aset keuangan (misalnya, jika ada pembayaran pokok atau amortisasi premi/diskon).

Elemen bunga yang paling signifikan dalam perjanjian kredit biasanya adalah pertimbangan atas nilai waktu dari uang dan risiko kredit. Untuk membuat penilaian SPPI, Grup menerapkan pertimbangan dan memperhatikan faktor-faktor yang relevan seperti mata uang dimana aset keuangan didenominasikan dan periode pada saat suku bunga ditetapkan.

Penilaian model bisnis

Grup menentukan model bisnisnya berdasarkan tingkat yang paling mencerminkan bagaimana Grup mengelola kelompok atas aset keuangannya untuk mencapai tujuan bisnisnya.

Model bisnis Grup tidak dinilai berdasarkan masing-masing instrumennya, tetapi pada tingkat portofolio secara agregat yang lebih tinggi dan didasarkan pada faktor-faktor yang dapat diamati seperti:

- Bagaimana kinerja model bisnis dan aset keuangan yang dimiliki dalam model bisnis tersebut dievaluasi dan dilaporkan kepada personel manajemen kunci;

c. Financial instruments (continued)

i. Financial assets (continued)

The Group used 2 (two) methods to classify its financial assets, which based on the Group's business model in managing the financial asset, and the contractual cash flow of the financial assets *Solely Payment of Principal and interest* ("SPPI").

SPPI test

As a first step of its classification process, the Group assesses the contractual terms of financial to identify whether they meet the SPPI test.

Principal, for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant element of interest within a credit contract are typically the consideration for the time value of money and credit risk. To perform the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

Business model assessment

The Group determines its business model at the level that best reflects how the group manages a group of financial assets to achieve its business objective.

The Group's business model is not assessed by each instrument, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;

c. Instrumen keuangan (lanjutan)

i. Aset keuangan (lanjutan)

Penilaian model bisnis (lanjutan)

Model bisnis Grup tidak dinilai berdasarkan masing-masing instrumennya, tetapi pada tingkat portofolio secara agregat yang lebih tinggi dan didasarkan pada faktor-faktor yang dapat diamati seperti: (lanjutan)

- Risiko yang mempengaruhi kinerja model bisnis (dan aset keuangan yang dimiliki dalam model bisnis tersebut) dan khususnya, bagaimana cara risiko tersebut dikelola;
- Bagaimana manajer bisnis dikompensasi (misalnya, apakah kompensasi didasarkan pada nilai wajar dari aset yang dikelola atau pada arus kas kontraktual yang tertagih);
- Frekuensi, nilai dan waktu penjualan yang diharapkan, juga merupakan aspek penting dari penilaian Grup.

Penilaian model bisnis didasarkan pada skenario yang diharapkan secara wajar tanpa mempertimbangkan skenario "worst case" atau "stress case".

Jika arus kas setelah pengakuan awal direalisasikan dengan cara yang berbeda dari yang awal diharapkan, Grup tidak mengubah klasifikasi aset keuangan dimiliki yang tersisa dalam model bisnis tersebut, tetapi memasukkan informasi tersebut dalam melakukan penilaian atas aset keuangan yang baru atau yang baru dibeli selanjutnya.

(a) Aset keuangan yang diukur pada nilai wajar melalui laba rugi

Aset keuangan diukur pada nilai wajar melalui laba rugi kecuali tes model bisnis dan tes arus kas kontraktual menunjukkan bahwa aset keuangan masuk ke dalam klasifikasi diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain.

Klasifikasi ini ditujukan untuk instrumen keuangan yang dimiliki untuk diperdagangkan atau pada saat pengakuan awal telah ditetapkan oleh Grup untuk diukur pada nilai wajar melalui laba rugi.

c. Financial instruments (continued)

i. Financial assets (continued)

Business model assessment (continued)

The Group's business model is not assessed by each instrument, but at a higher level of aggregated portfolios and is based on observable factors such as: (continued)

- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular the way those risks are managed;
- How business managers are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected);
- The expected frequency, value, and timing of sales are also important aspects of the Group's assessment.

The business model assessment is based on reasonably expected scenarios without taking "worst case" or "stress case" scenarios into account.

If cash flows after initial recognition are realised in a way that is different from the Group's initial expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

(a) Financial assets measured at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless the business model test and the contractual cash flow test show that financial assets entering into classifications are measured at amortised cost or fair value through other comprehensive income.

This classification is intended for held for trading financial instruments or at the time of initial recognition has been determined by the Group to be measured at fair value through profit or loss.

iii. Penghentian pengakuan

Penghentian Pengakuan Aset Keuangan

Penghentian pengakuan aset keuangan dilakukan ketika hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir, atau ketika aset keuangan tersebut telah ditransfer dan secara substansial seluruh risiko dan manfaat atas kepemilikan aset tersebut telah ditransfer (jika, secara substansial seluruh risiko dan manfaat tidak ditransfer, maka Grup melakukan evaluasi untuk memastikan keterlibatan berkelanjutan atas kendali yang masih dimiliki tidak mencegah penghentian pengakuan).

Agunan yang diserahkan oleh Grup di dalam perjanjian efek-efek yang dijual dengan janji untuk dibeli kembali dan transaksi *securities lending* dan *borrowing* tidak dihentikan pengakuannya karena Grup secara substansial masih memiliki seluruh risiko dan manfaat atas agunan tersebut, berdasarkan kesepakatan bahwa harga pembelian kembali telah ditentukan di awal, sehingga kriteria penghentian pengakuan tidak terpenuhi.

Aset keuangan yang dialihkan kepada pihak ketiga tetapi tidak memenuhi syarat penghentian pengakuan disajikan di dalam laporan posisi keuangan konsolidasian sebagai "Aset lain-lain - Tagihan atas efek-efek dan obligasi pemerintah yang diagunkan", dimana pihak penerima memiliki hak untuk menjual atau mentransfer kembali.

iii. Penghentian pengakuan (lanjutan)

Hapus buku

Dalam hal penghapusbukuan aset keuangan merupakan kelanjutan dari tindakan penyelesaian aset keuangan dengan cara pengambilalihan agunan, maka jumlah yang dihapusbuku adalah sebesar selisih kurang antara nilai wajar agunan yang diambil alih setelah memperhitungkan taksiran biaya penjualan dengan nilai tercatat aset keuangan.

Aset keuangan dapat dihapusbuku apabila cadangan kerugian penurunan nilai telah dibentuk 100%.

Penghapusbukuan dilakukan secara keseluruhan terhadap nilai tercatat aset keuangan dengan mendebit cadangan kerugian penurunan nilai.

iv. Modifikasi atas arus kas aset keuangan

Penilaian apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan, dilakukan oleh unit bisnis yang berwenang melakukan restrukturisasi aset keuangan tersebut.

Grup mengakui aset keuangan dimodifikasi atau direstrukturisasi secara substansial dan menghasilkan penghentian pengakuan ketika:

- (a) aset keuangan (atau bagiannya) berakhir, yaitu jika debitur secara hukum dibebaskan dari tanggung jawab utama atas aset tersebut (atau bagiannya), baik melalui proses hukum maupun oleh kreditur pembuatan kontrak kredit baru (sebagai contoh, opsi *equity conversion*); atau
- (b) terdapat konversi mata uang.

iii. Derecognition (continued)

Write-offs

In the case of financial assets' write-off is a continuation of the financial assets' settlement by taking over collaterals, the written-off amount is approximately equal to the difference between the fair value of repossessed assets after taking into account the financial assets' cost of sales and carrying amount.

Financial assets can be written-off when the allowance for impairment losses have been 100% established.

Full write-off is done to the financial assets' carrying amount by debiting the allowance for impairment losses.

iv. Modification of financial assets cash flow

An assessment of whether a financial asset has been modified or restructured substantially or not substantially derecognised is carried out by a business unit whose authorised to modify or restructure financial assets.

Modifications or restructuring to financial assets are considered substantial and the Group will cease to recognize the original financial assets when:

- (a) *the financial asset (or portion thereof) expires, that is, if the debtor is legally released from primary responsibility for the asset (or any portion thereof), either by legal process or by the creditor entering into a new credit contract (for example, the equity conversion option); or*
- (b) *there is a currency conversion.*

Grup menilai apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan dengan cara berikut:

- (a) Modifikasi aset keuangan yang menghasilkan penghentian pengakuan aset keuangan
 1. Saat arus kas kontraktual atas aset keuangan direstrukturisasi atau dimodifikasi (antara lain ketika kredit direstrukturisasi) dimana restrukturisasi atau modifikasi tersebut menghasilkan penghentian pengakuan aset keuangan, Grup akan mencatat aset keuangan tersebut sebagai aset keuangan baru/modifikasian pada tanggal modifikasi/restrukturisasi.
 2. Selisih nilai tercatat aset keuangan sebelum modifikasi/restrukturisasi dengan nilai wajar aset setelah modifikasi/restrukturisasi diakui di laba rugi.
 3.  1. When the contractual cashflow on a financial asset is restructured or modified (including when a credit is restructured) and the restructuring or modification results in derecognition of the financial asset, therefore the Group will record the financial asset as a new/modified financial asset on the modification/restructuring date.
 2. The difference between the gross amount of the initial financial assets and the fair value of the modified or restructuring assets recorded as profit or loss.
 3. Grup menilai apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan dengan cara berikut: (lanjutan)

(a) Modifikasi aset keuangan yang menghasilkan penghentian pengakuan aset keuangan (lanjutan)

7. Pengakuan pendapatan bunga atas aset yang berasal dari aset keuangan memburuk ditentukan berdasarkan suku bunga efektif yang telah disesuaikan dengan risiko kredit (*risk-adjusted effective interest rate*) untuk mendiskontokan arus kas aset keuangan yang telah dimodifikasi.

(b) Modifikasi aset keuangan yang tidak menghasilkan penghentian pengakuan aset keuangan

1. Saat Grup melakukan renegotiasi atau modifikasi arus kas kontraktual atas aset keuangan (antara lain ketika kredit direstrukturisasi) yang tidak memenuhi kriteria modifikasi aset keuangan yang substansial di atas, maka restrukturisasi atau modifikasi tersebut tidak menghasilkan penghentian pengakuan aset keuangan.

2. Jumlah tercatat bruto aset keuangan dihitung sebesar nilai kini (*net present value*) dari arus kas neto kontraktual yang telah dimodifikasi atau direstrukturisasi yang didiskontokan menggunakan suku bunga efektif awal.

3. Grup kemudian mengakui keuntungan atau kerugian dari modifikasi (yaitu sebesar perubahan jumlah tercatat bruto aset keuangan) dalam laporan laba rugi.

4. Pendapatan atau biaya transaksi yang terjadi sehubungan dengan kejadian modifikasi diakui sebagai penyesuaian terhadap jumlah tercatat aset keuangan yang telah dimodifikasi dan diamortisasi selama sisa jangka waktu aset keuangan modifikasi tersebut dengan menggunakan suku bunga efektif awal.

(b) Non-substantial modification of financial assets

1. When the Group renegotiates or modifies contractual cash flows of financial assets (including when loans are restructured) that do not meet the criteria for substantial modification of financial assets above, the restructuring or modification does not result in derecognition of the financial assets.

2. The gross carrying amount of financial assets is computed at the net present value of modified or restructured contractual cash flows, discounted at the initial effective interest rate.

3. The Group then recognizes the gain or loss from the modification (i.e the change in the gross carrying amount of the financial asset) in the profit or loss.

4. Transaction income or costs incurred in connection with a modification event are recognised as an adjustment to the carrying amount of the modified financial asset and amortised over the remaining term of the modified financial asset using the initial effective interest rate.

v. Reklasifikasi aset keuangan

Grup akan mereklasifikasi seluruh aset keuangan yang terkena dampak dari perubahan model bisnis. Perubahan tujuan model bisnis Grup harus berdampak sebelum tanggal reklasifikasi.

Yang bukan merupakan perubahan model bisnis adalah:

v. Reclassification of financial assets

The Group is allowed to reclassify the financial assets owned if the Group changes the business model for managing the financial assets and the Group is not allowed to reclassify the financial liabilities.

Hak yang berkekuatan hukum berarti:

- a. tidak terdapat kontinjensi di masa yang akan datang, dan
- b. hak yang dapat dipaksakan secara hukum pada kondisi-kondisi berikut ini:
 - i. kegiatan bisnis normal;
 - ii. kondisi kegagalan usaha; dan
 - iii. kondisi gagal bayar atau bangkrut.

viii. Cadangan kerugian penurunan nilai aset keuangan

Penerapan PSAK 109 "Instrumen Keuangan" telah mengubah metode perhitungan kerugian penurunan nilai dari pendekatan kerugian yang telah terjadi (*incurred loss*) dalam PSAK 239 "Instrumen Keuangan: Pengakuan dan Pengukuran" dengan pendekatan kerugian kredit ekspektasian.

Ruang lingkup penurunan nilai

- a) Aset keuangan dalam klasifikasi selain yang diukur pada nilai wajar melalui laba rugi
 - 1) Penurunan nilai atas aset keuangan pada biaya perolehan diamortisasi diakui sebagai pengurang dari nilai tercatat aset di dalam laporan posisi keuangan konsolidasian, dan diakui di dalam laporan laba rugi konsolidasian sebagai "Beban Pembentukan Cadangan Kerugian Penurunan Nilai".
 - 2) Penurunan nilai atas aset keuangan (di luar instrumen ekuitas) yang diukur pada nilai wajar melalui penghasilan komprehensif lain diakui sebagai penambah dari penghasilan komprehensif lainnya di dalam laporan posisi keuangan konsolidasian (tidak mengurangi jumlah tercatat aset keuangan dalam laporan keuangan) sebagai "Keuntungan/Kerugian yang Belum Direalisasikan", dan diakui di dalam laporan laba rugi konsolidasian sebagai "Beban Pembentukan Cadangan kerugian penurunan nilai".

c. Financial instruments (continued)

vii. Offsetting financial instruments (continued)

This means that the right to offset:

- a. must not be contingent on a future event, and
- b. must be legally enforceable in all of the following circumstances:
 - i. the normal course of business;
 - ii. the event of default; and
 - iii. the event of insolvency or bankruptcy.

viii. Allowance for impairment losses of financial assets

The implementation of SFAS 109 "Financial Instruments" has changed the method of calculating impairment losses from the incurred loss approach in SFAS 239 "Financial Instruments: Recognition and Measurement" with the expected credit loss approach.

Scope of impairment

- a) Financial assets in other than those measured at fair value through profit or loss
 - 1) Impairment of financial assets at amortised cost is recognised as a deduction from the asset's carrying amount in the consolidated statement of financial position, and recognised in the consolidated income statement as "Allowance for Impairment Losses".
 - 2) Impairment of financial assets (excluding equity instruments) measured at fair value through other comprehensive income is recognised as an addition to other comprehensive income in the consolidated statement of financial position (not reducing the carrying amount of financial assets in the financial statements) as "Unrealised Gain or Loss " and recognised in the consolidated income statement as "Allowance for Impairment Losses".

Grup menggunakan kriteria tambahan untuk menentukan kualitas aset instrumen keuangan sesuai dengan Peraturan Otoritas Jasa Keuangan (POJK) No. 40/POJK.03/2019 tanggal 19 Desember 2019 tentang Penilaian Kualitas Aset Bank Umum.

Selanjutnya, Grup mengelompokkan aset keuangan berdasarkan hasil evaluasi tersebut yang mencerminkan tingkat risiko kredit aset keuangan.

a) Stage 1

Pada tanggal evaluasi penurunan nilai, risiko kredit atas instrumen keuangan tidak meningkat secara signifikan sejak pengakuan awal.

- c) The lender, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider if the borrower is not having that financial difficulty;
- d) There is a probability that the borrower will enter bankruptcy or other financial reorganisation;
- e) The disappearance of an active market for that financial asset because of financial difficulties; or
- f) Purchase or issuance of financial asset at significant discount which reflects the credit loss that occurs.

The Group uses additional criteria to determine the quality of financial instrument assets in accordance with the Financial Services Authority Regulation (POJK) No. 40/POJK.03/2019 dated 19 December 2019 concerning Asset Quality Assessment for Commercial Banks.

Furthermore, the Group classifies financial assets based on the evaluation results, which reflect the level of credit risk of the financial assets.

a) Stage 1

At the evaluation date of impairment, credit risk on financial instruments does not increase significantly since initial recognition.

Metode penurunan nilai

Grup melakukan evaluasi penurunan nilai dengan metode sebagai berikut:

a. Metode Individual

Kriteria individual

Grup mengevaluasi penurunan nilai secara individual apabila Grup memiliki informasi yang wajar dan didukung untuk mengukur kerugian kredit ekspektasian sepanjang umurnya pada instrumen secara individual dan aset keuangan memiliki kriteria sebagai berikut:

- a. Aset keuangan per debitur memiliki nilai *outstanding* kumulatif lebih dari Rp25.000 (dua puluh lima miliar Rupiah);
- b. Kredit segmen *Corporate*, *Kelembagaan*, *Financial Institutions*, *Commercial*, dan *SME Banking*; dan
- c. Aset keuangan termasuk dalam kategori *stage 2* akibat dari restrukturisasi, *stage 3*, atau *POCI*.

Grup juga dapat menetapkan aset keuangan untuk dievaluasi secara individual meskipun aset keuangan dimaksud belum memiliki kriteria untuk dievaluasi secara individual.

Jika aset keuangan terdapat bukti objektif penurunan nilai dari aset keuangan yang dievaluasi secara individual namun tidak terdapat kerugian penurunan nilai, maka aset keuangan tersebut tetap dimasukkan ke dalam klasifikasi aset keuangan yang akan dievaluasi penurunan nilainya secara individual. Namun, Grup membentuk cadangan kerugian penurunan nilai atas aset keuangan tersebut berdasarkan *probability of default* yang dihasilkan dari evaluasi penurunan nilai kredit secara kolektif.

Impairment method

The Group evaluates the impairment using the following methods:

a. Individual Method

Individual criteria

The Group evaluates impairment individually when the Group has reasonable and supportable information to measure the lifetime expected credit losses on an individual instrument and the financial assets have the following criteria:

- a. Financial assets per debtor with a cumulative outstanding amount of more than Rp25,000 (twenty five billion Rupiah);
- b. Loans for the *Corporate*, *Institutional*, *Financial Institutions*, *Commercial*, and *SME Banking* segments; and
- c. Financial assets fall into the *stage 2* category as a result of a restructuring, *stage 3*, or *POCI*.

The Group may also designate financial assets to be evaluated individually even though the financial assets have not yet meet criteria for individual evaluation.

If a financial asset has objective evidence of impairment from a financial asset that is evaluated individually but there is no impairment loss, the financial asset is still classified as a financial asset that will be assessed for impairment individually. However, the Group establishes allowance for impairment losses on these financial assets based on the probability of default resulting from a collective evaluation of loans impairment.

Metode penurunan nilai (lanjutan)

Grup melakukan evaluasi penurunan nilai dengan metode sebagai berikut: (lanjutan)

a. Metode Individual (lanjutan)

Evaluasi Penurunan Nilai

Evaluasi penurunan nilai secara individual didasarkan pada konsep estimasi jumlah probabilitas tertimbang kerugian aset keuangan. Konsep tersebut menggunakan pembobotan masing-masing dari 3 (tiga) skenario yaitu skenario optimis, skenario normal, dan skenario pesimis.

1. Optimis

Skenario dengan asumsi terdapat kenaikan atau ekspansi dalam perekonomian yang berakibat pada menguatnya nilai variabel seperti pertumbuhan ekonomi meningkat atau apresiasi nilai tukar.

2. Normal

Skenario yang memiliki peluang terbesar untuk terjadi dibandingkan 2 (dua) skenario lainnya. Nilai variabel dalam skenario *baseline* adalah hasil proyeksi dengan asumsi pergerakan ekonomi tanpa adanya peristiwa luar biasa, guncangan atau gejolak ekonomi.

3. Pesimis

Skenario dengan asumsi terdapat pelemahan atau kontraksi dalam perekonomian yang berakibat melemahnya nilai variabel seperti penurunan pertumbuhan ekonomi atau depresiasi nilai tukar.

Impairment method (continued)

The Group evaluates the impairment using the following methods: (continued)

a. Individual Method (continued)

Impairment Evaluation

Individual impairment evaluation is based on the concept of an estimated weighted probability of loss of financial assets. This concept uses the weighting of each of the 3 (three) scenarios, which are the optimistic scenario, the normal scenario, and the pessimistic scenario.

1. Optimistic

A scenario with the assumption that there is an increase or expansion in the economy which results in the strengthening of variable values such as increased economic growth or exchange rate appreciation.

2. Normal

The scenario that has the greatest chance of occurring compared to the other 2 (two) scenarios. The variable value in the baseline scenario is the projection result assuming economic movements without any extraordinary events, shocks or economic turmoil.

3. Pessimistic

Scenarios with the assumption that there is a weakening or contraction in the economy that results in weakening of variable values such as a decrease in economic growth or depreciation of the exchange rate.

Setiap skenario menghasilkan nilai kini arus kas yang didiskontokan, dimana arus kas tersebut didasarkan pada seluruh informasi yang tersedia dengan *experienced credit judgement* serta mencerminkan seluruh informasi yang memperhatikan berbagai faktor seperti:

1. Kekuatan finansial dan kemampuan debitur untuk membayar kembali kewajiban.
2. Jenis dan jumlah agunan.

Metode evaluasi penurunan nilai secara individual didasarkan pada 2 (dua) konsep, yaitu estimasi jumlah kerugian aset keuangan dan estimasi jumlah yang dapat diperoleh kembali.

Metode yang digunakan adalah *discounted cash flow* atau metode *fair value of collateral*. Bank menggunakan metode *fair value of collateral* sebagai arus kas masa datang apabila memenuhi salah satu kondisi berikut:

Each scenario provides a discounted present value of cash flows, where the cash flows are based on all available information with experienced credit judgment and reflect all information that takes into account various factors such as:

1. Financial strength and the debtor's repayment capacity.
2. Type and amount of collateral.
3. Availability of warranty.
4. Customers' future business prospects.
5. Probability of collateral sale.
6. Historical losses.
7. Relevant macroeconomic factors.

The difference between the weighted probability and the total outstanding of financial assets reflects the amount of the individual impairment loss.

The individual impairment evaluation method is based on 2 (two) concepts, which are the estimated amount of loss on financial assets and the estimated amount that can be recovered.

The method used are discounted cash flow or fair value of collateral method. The Bank uses the fair value of collateral method as future cash flows if it meets one of the following conditions:

1. Loans is collateral dependent, if loans repayment source only from collateral;
2. It is difficult to reliably determine the amount and timing of receipt of the estimated cash flow from loan principal and/or interest; and/or

Metode *Basel* dilakukan dengan menentukan hubungan antara PD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan. Model *Basel* yang telah didapatkan digunakan sebagai dasar penentuan nilai PD dari setiap debitur.

Metode *Vasicek* adalah metode penentuan PD menggunakan formula korelasi aset yang telah ditentukan oleh *Basel Committee*.

Metode *Roll Rate Transition Matrix* menggunakan *historical transition bucket* PD. *Bucket* PD yang digunakan dalam perhitungan *historical* adalah sebagai berikut:

1. *Bucket* 1: Lancar
2. *Bucket* 2: 1-30 days past due (dpd)
3. *Bucket* 3: 31-60 dpd
4. *Bucket* 4: 61-90 dpd
5. *Bucket* 5: > 90 dpd

PD *Forward-Looking Macro Adjustment* adalah metode yang digunakan untuk menentukan nilai PD *forward looking* dari pendekatan baik *Basel* maupun *Roll Rate* berdasarkan hubungan historis antara makro ekonomi dengan nilai PD Bank

b. Loss Given Default

Bank menggunakan metode *Basel* dan *Historical* dalam menentukan nilai LGD dari setiap debitur. LGD menggambarkan persentase nominal fasilitas yang tidak akan dapat dipulihkan oleh Bank terhadap debitur *default*. LGD biasa dihitung dengan formula *1-Recovery Rate*. *Recovery rate* dihitung mempertimbangkan *Time Value of Money* dari pengembalian kewajiban yang telah *default*. Tingkat suku bunga yang digunakan untuk menghitung *Time Value of Money* dari *Recovery* adalah *Effective Interest Rate* (EIR).

3. *Bucket* 3: 31-60 dpd
4. *Bucket* 4: 61-90 dpd
5. *Bucket* 5: > 90 dpd

PD *Forward-Looking Macro Adjustment* is a method used to determine the *forward looking* PD value of both *Basel* and *Roll Rate* approaches based on the *historical relationship* between the macro economy and the PD value of the Bank.

b. Loss Given Default

The Bank uses *Basel* and *Historical* methods in determining the LGD value of each debtor. LGD describes the nominal percentage of the facility that the Bank will not be able to recover against the default debtor. Regular LGD is calculated with formula *1-Recovery Rate*. The recovery rate is calculated by considering the *Time Value of Money* from the recovery of the default obligation. The interest rate used to calculate the *Time Value of Money* of *Recovery* is the *Effective Interest Rate* (EIR).

b. Loss Given Default (lanjutan)

Metode *Basel* dilakukan dengan menentukan hubungan antara LGD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan. Model *Basel* yang telah didapatkan digunakan sebagai dasar penentuan nilai LGD dari setiap debitur.

Metode *Historical* dilakukan dengan menghitung rata-rata nilai LGD dalam periode jangka panjang pada segmen yang dimaksud.

Forward-Looking Macro Adjustment pada LGD adalah metode yang digunakan untuk menentukan nilai LGD *forward looking* berdasarkan hubungan historis antara makroekonomi dengan nilai LGD Bank. Jika tidak didapatkan hubungan antara makroekonomi dengan nilai LGD Bank, maka Bank tidak dapat menggunakan *Forward-Looking* dalam penentuan nilai LGD.

c. Exposure at Default

Dalam menentukan nilai EAD dari setiap debitur, Bank menggunakan metode *Basel*, *Prepayment Rate* dan *Expected Lifetime*. EAD menggambarkan *exposure* yang akan ditanggung Bank jika terdapat debitur yang *default*.

Metode *Basel* dalam perhitungan EAD dilakukan dengan menentukan hubungan antara EAD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan.

The *Basel* method is carried out by determining the relationship between a debtor's LGD and the internal characteristics of the debtor concerned. The *Basel* model that has been obtained is used as the basis for determining the LGD value of each debtor.

Historical method is done by calculating the average value of LGD in the long term observation period in the respective segment.

Forward-Looking Macro Adjustment in LGD is a method used to determine the forward looking LGD value based on the historical relationship between macroeconomics and the Bank's LGD value. If there is no relationship between macroeconomics and the Bank's LGD value, the Bank may not use *Forward-Looking* in determining the LGD value.

c. Exposure at Default

In determining the EAD value of each debtor, the Bank uses the *Basel*, *Prepayment Rate*, and *Expected Lifetime* method. EAD describes the exposure that will be borne by the Bank if there is a debtor become defaults.

The *Basel* method in calculating EAD is performed by determining the relationship between a debtor's EAD and the internal characteristics of the respective debtor.

In general, the formula for calculating collective ECL is the multiplication of *Probability of Default*, *Loss Given Default*, and *Exposure at Default*.

The probability weighted in the calculation of impairment has been determined by the Group which includes the percentage of optimistic, normal, and pessimistic scenarios.

The total weighted of the estimated cash flow becomes a deduction from the carrying amount of the loans, where the difference will be the allowance for impairment on loans.

Interest income before and after impairment

Prior to impairment (stage 1 and 2), interest income is calculated using the effective interest method, by applying an effective interest rate to the gross carrying amount of financial assets except for financial assets purchased or originated from impaired financial assets.

Kontrak jaminan keuangan dan komitmen

Kontrak jaminan keuangan adalah kontrak yang mengharuskan penerbit untuk melakukan pembayaran yang ditetapkan untuk mengganti uang pemegang kontrak atas kerugian yang terjadi karena debitur tertentu gagal untuk melakukan pembayaran pada saat jatuh tempo, sesuai dengan ketentuan dari instrumen utang.

Jaminan keuangan tersebut diberikan kepada bank-bank, lembaga keuangan dan badan-badan lainnya atas nama debitur untuk menjamin kredit dan fasilitas-fasilitas perbankan lainnya.

Jaminan keuangan awalnya diakui dalam laporan keuangan konsolidasian sebesar nilai wajar pada tanggal jaminan diberikan. Nilai wajar dari jaminan keuangan pada saat dimulainya transaksi pada umumnya sama dengan provisi yang diterima untuk jaminan diberikan dengan syarat dan kondisi normal.

Setelah pengakuan awal, liabilitas Bank atas jaminan tersebut diukur pada jumlah yang lebih tinggi antara jumlah awal, dikurangi amortisasi provisi dan estimasi terbaik dari jumlah yang diharapkan akan terjadi untuk menyelesaikan jaminan tersebut. Estimasi ini ditentukan berdasarkan pengalaman transaksi yang sejenis dan kerugian historis masa lalu, dilengkapi dengan penilaian manajemen.

Estimasi ini ditentukan berdasarkan kemiripan transaksi dan sejarah kerugian di masa lalu, dilengkapi dengan justifikasi dari manajemen. Pendapatan provisi yang diperoleh diamortisasi selama jangka waktu jaminan dengan menggunakan metode garis lurus.

Financial guarantee contracts and
commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the contracts holder for a loss incurred because a specified debtor defaulted to make payments when due, in accordance with the terms of a debt instrument.

Such financial guarantees are given to banks, financial institutions and other institutions on behalf of customers to secure loans and other banking facilities.

Financial guarantees are initially recognised in the consolidated financial statements at fair value on the date which the guarantee was given. The fair value of a financial guarantee at inception is likely to equal with the provision received because all guarantees are agreed on arm's length terms.

Subsequent to initial recognition, the Bank's liabilities under such guarantees are measured at the higher amount between the initial amount, less amortisation of provision recognised, and the best estimates of the amount required to settle the guarantee. These estimation are determined based on experience of similar transactions and history of past losses, supplemented by the judgement from management.

These estimation are determined based on experience of similar transactions and history of past losses, supplemented by the judgement from management. The provision income earned is amortised over the period of guarantees using the straight-line method.

c. Instrumen keuangan (lanjutan)

xi. Penentuan nilai wajar (lanjutan)

Ketika tidak terdapat pasar aktif atau harga suatu instrumen keuangan yang identik tidak dapat diobservasi, Grup dapat mengukur nilai wajar menggunakan teknik penilaian sesuai jenis instrumen keuangan.

Grup dapat melakukan pengukuran nilai wajar, dengan hirarki sebagai berikut:

1. Input *Level 1*, yaitu harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses Grup pada tanggal pengukuran.
2. Input *Level 2*, yaitu input selain harga kuotasian yang termasuk dalam *level 1* yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung atau tidak langsung.
3. Input *Level 3*, yaitu input yang tidak dapat diobservasi untuk aset atau liabilitas.

Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:

- Di pasar utama untuk aset dan liabilitas tersebut; atau
- Jika tidak terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

Nilai wajar suatu aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset dan liabilitas tersebut dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomi dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

(continued)**

c. Financial instruments (continued)

xi. Determination of fair value (continued)

When there is no active market or the price of an identical financial instrument cannot be observed, the Group can measure fair value using valuation techniques according to the type of financial instrument.

The Group can measure fair value, with the following hierarchy:

1. Input *Level 1*, the quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.
2. Input *Level 2*, the input other than quoted price included in level 1 that can be observed for assets or liabilities, either directly or indirectly.
3. Input *Level 3*, the unobservable input for an asset or liability.

A fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability should be measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset at its highest and best use or by selling it to another market participant that would use the asset at its highest and best use.

c. Instrumen keuangan (lanjutan)

xi. Penentuan nilai wajar (lanjutan)

Nilai wajar untuk instrumen keuangan yang diperdagangkan di pasar aktif, seperti efek-efek dan obligasi pemerintah, ditentukan berdasarkan nilai pasar yang berlaku pada tanggal laporan posisi keuangan konsolidasian menggunakan harga yang dipublikasikan secara rutin dan berasal dari sumber yang terpercaya, seperti Bloomberg, Reuters atau harga yang diberikan oleh broker (harga kuotasian). Investasi dalam unit reksa dana dinyatakan sebesar nilai pasar sesuai nilai aset bersih dari reksa dana pada tanggal laporan posisi keuangan konsolidasian.

Instrumen keuangan dianggap memiliki kuotasi di pasar aktif, jika harga kuotasi tersedia sewaktu-waktu dan dapat diperoleh secara rutin dari bursa, pedagang efek (*dealer*), perantara efek (*broker*) dan harga tersebut mencerminkan transaksi pasar yang aktual dan rutin dalam suatu transaksi yang wajar. Jika kriteria di atas tidak terpenuhi, maka pasar aktif dinyatakan tidak tersedia. Indikasi-indikasi dari pasar tidak aktif adalah terdapat selisih yang besar antara harga penawaran dan permintaan atau kenaikan signifikan dalam selisih harga penawaran dan permintaan dan hanya terdapat beberapa transaksi terkini.

Untuk efek-efek yang tidak mempunyai harga pasar, estimasi atas nilai wajar efek-efek ditetapkan dengan mengacu pada nilai wajar instrumen lain yang substansinya sama atau dihitung berdasarkan arus kas yang diharapkan terhadap aset bersih efek-efek tersebut.

Untuk obligasi pemerintah yang tidak memiliki nilai pasar, estimasi nilai wajar ditentukan dengan menggunakan model internal berdasarkan nilai kini dari arus kas masa depan yang diharapkan (*pendekatan next-repricing method*) dengan menggunakan faktor *deflator*.

c. Financial instruments (continued)

xi. Determination of fair value (continued)

The fair value of financial instruments traded in active markets, such as marketable securities and government bonds, is determined based on quoted market prices at the consolidated statement of financial position date using price that published regularly and from credible sources such as quoted market prices from Bloomberg, Reuters or broker's quoted price. Investments in mutual fund units are stated at market value, in accordance with the net value of mutual fund assets at the consolidated statement of financial position date.

A financial instrument is deemed to be quoted in an active market if quoted prices are available at any time and can be obtained regularly from stock exchanges, dealers, and brokers and these prices reflect actual and regular market transactions in a fair transaction. If the criteria above are not met, the active market is declared unavailable. Indications of an inactive market are that there is a large gap between the bid and ask prices or a significant increase in the difference between the bid and ask prices, and there are only a few recent transactions.

For marketable securities with no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which substantially has the same characteristic or calculated based on the expected cash flows of the underlying net asset base of the marketable securities.

For government bonds with no quoted market prices, a reasonable estimate of the fair value is determined using the internal model based on the present value of expected future cash flows using the next-repricing method approach with a deflator factor.

Untuk pengukuran instrumen keuangan yang menggunakan biaya perolehan diamortisasi (aset keuangan instrumen utang yang diklasifikasikan sebagai biaya perolehan diamortisasi dan nilai wajar melalui penghasilan komprehensif lain, serta liabilitas keuangan yang diukur pada biaya perolehan diamortisasi), perubahan arus kas kontraktual masa depan dari instrumen keuangan tersebut yang terjadi akibat reformasi suku bunga (perubahan suku bunga acuan kontraktual dari sebelumnya suku bunga LIBOR menjadi suku bunga acuan alternatif) akan mengubah tingkat suku bunga efektif instrumen keuangan tersebut. Perubahan arus kas kontraktual tersebut tidak mempengaruhi biaya perolehan diamortisasi instrumen keuangan dimaksud, dan tidak berdampak pada laba atau rugi (penerapan praktis). Penerapan praktis tersebut dapat diterapkan jika dan hanya jika 2 (dua) persyaratan berikut terpenuhi:

1. Perubahan arus kas kontraktual tersebut diperlukan sebagai akibat langsung dari reformasi acuan suku bunga; dan
2. Suku bunga acuan alternatif pengganti secara ekonomis setara (*economically equivalent*) dengan suku bunga acuan yang digunakan sebelumnya.

d. Prinsip-prinsip konsolidasian

Laporan keuangan konsolidasian meliputi laporan keuangan Bank Mandiri dan Entitas Anak yang mayoritas sahamnya dimiliki atau dikendalikan oleh Bank Mandiri.

Pengendalian didapat ketika Bank terekspos atau memiliki hak atas imbal hasil variabel dari keterlibatannya dengan Entitas Anak dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kekuasaannya atas Entitas Anak.

Bank mengendalikan Entitas Anak jika dan hanya jika Bank memiliki hak berikut ini:

- a) Kekuasaan atas Entitas Anak (hak yang ada saat ini yang mempengaruhi kemampuan kini untuk mengarahkan aktivitas relevan yang secara signifikan mempengaruhi imbal hasil Entitas Anak).
- b) Eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan Entitas Anak.
- c) Kemampuan untuk menggunakan kekuasaannya atas Entitas Anak untuk mempengaruhi jumlah imbal hasil Bank.

xii. Interest rate benchmark reform

For the measurement of financial instruments using amortised cost (financial assets of debt instruments classified as amortised cost and fair value through other comprehensive income, as well as financial liabilities measured at amortised cost), changes in the future contractual cash flows of those financial instruments occurs as a result of interest rate reform (change in the contractual benchmark interest rate from the previous LIBOR interest rate to an alternative benchmark interest rate) will change the effective interest rate of the financial instrument. The change in contractual cash flows does not affect the amortised cost of the financial instrument, and has no impact on profit or loss (practical expedient). Such practical expedient can be applied if and only if the following 2 (two) requirements are met:

1. The change in contractual cash flows is necessary as a direct result of the reform of benchmark interest rates; and
2. The alternative reference interest rate is economically equivalent to the previously used benchmark interest rate.

d. Principles of consolidation

The consolidated financial statements include the financial statement of Bank Mandiri and its Subsidiaries in which the majority shares are owned or controlled by Bank Mandiri.

Control is presumed to exist where the Bank is exposed, or has rights, to variable returns from its involvement with the Subsidiaries and has ability to use its power to affect its returns from its involvement with the Subsidiaries.

The Bank controls the Subsidiaries if and only if the Bank acquires these rights:

- a) Power over the Subsidiaries (has existing rights that affect the current ability to direct the relevant activities, that significantly affect the Subsidiaries' returns).
- b) Exposure or rights of variable returns from its involvement with the Subsidiaries.
- c) The ability to use its power over the Subsidiaries to affect the amount of the Bank's returns.

d. Prinsip-prinsip konsolidasian (lanjutan)

Pada laporan keuangan konsolidasian Bank Mandiri, semua saldo dan transaksi yang signifikan antar perusahaan yang dikonsolidasi telah dieliminasi. Kepentingan non-pengendali atas laba bersih Entitas Anak disajikan sebagai pengurang dari laba bersih konsolidasian untuk mendapatkan jumlah laba yang menjadi hak pemilik entitas Bank. Kepentingan non-pengendali dalam aset bersih disajikan sebagai bagian dari ekuitas kecuali kepentingan non-pengendali yang berasal dari konsolidasi atas reksa dana disajikan sebagai bagian dari liabilitas dalam laporan posisi keuangan konsolidasian.

Laporan keuangan konsolidasian disusun dengan menggunakan kebijakan akuntansi yang sama untuk peristiwa dan transaksi sejenis dalam kondisi yang sama. Kebijakan akuntansi yang digunakan dalam laporan keuangan konsolidasian telah diterapkan secara konsisten oleh Entitas Anak, kecuali bila dinyatakan lain.

Bila pengendalian atas suatu entitas diperoleh atau berakhir dalam tahun berjalan, hasil usaha entitas tersebut dimasukkan dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian sejak tanggal pengendalian dimulai atau sampai dengan tanggal pengendalian berakhir.

Transaksi kombinasi bisnis entitas sepengendali, berupa pengalihan bisnis yang dilakukan dalam rangka reorganisasi entitas-entitas yang berada dalam suatu kelompok usaha yang sama, bukan merupakan perubahan kepemilikan dalam arti substansi ekonomi, sehingga transaksi tersebut tidak dapat menimbulkan laba atau rugi bagi kelompok usaha secara keseluruhan ataupun bagi entitas individual dalam kelompok usaha tersebut.

Oleh karena transaksi kombinasi bisnis entitas sepengendali tidak mengakibatkan perubahan substansi ekonomi kepemilikan atas bisnis yang dipertukarkan, maka transaksi tersebut diakui pada jumlah tercatat berdasarkan metode penyatuan kepemilikan.

Perubahan dalam bagian kepemilikan Bank pada Entitas Anak yang tidak mengakibatkan hilangnya pengendalian dicatat sebagai transaksi ekuitas, dalam hal ini transaksi dengan pemilik dalam kapasitasnya sebagai pemilik. Setiap perbedaan antara jumlah kepentingan nonpengendali disesuaikan dan nilai wajar imbalan yang diberikan atau diterima diakui secara langsung dalam ekuitas dan diatribusikan pada pemilik Entitas Induk.

d. Principles of consolidation (continued)

In the consolidated financial statements of Bank Mandiri, all significant inter-company balances and transactions have been eliminated. The non-controlling interest net income of Subsidiaries is presented as a deduction to consolidated net income in order to present the Bank's income. Non-controlling interest in net assets is presented as part of equity in the consolidated statement of financial position, except for non-controlling interest from mutual fund consolidation is presented as part of liabilities in the consolidated statement of financial position.

The consolidated financial statements are prepared using a consistent accounting policy for transactions and events in similar circumstances. The accounting policies adopted in preparing the consolidated financial statements have been consistently applied by the Subsidiaries, unless otherwise stated.

If the control on an entity is obtained or ends in the current year, the entity's net income is included in the consolidated statement of profit or loss and other comprehensive income from the date of acquisition of the control or until the date the control ceased.

Business combination transaction amongst entities under common control, in the form of transfer of business conducted for the reorganisation of entities under common control, does not represent a change of ownership in terms of economic substance, therefore, there shall be no gain or loss recognised by the group as a whole and by individual entities within the group.

Since the business combination transaction amongst entities under common control does not cause any change in the economic substance of ownership of the transferred business, therefore the transaction is recognised at book value using the pooling interest method.

Changes in the Bank's ownership interest in Subsidiaries that do not result in a loss of control are accounted for as an equity transaction, in this case a transaction with owners in their capacity as owners. Any difference between the amount of the adjusted non-controlling interest and the fair value of the consideration paid or received shall be recognised directly in equity and attributable to the owners of the Parent Entity.

r. Aset tetap, aset dan liabilitas sewa dan aset takberwujud

i. Aset tetap dan perangkat lunak

Pada tanggal 1 April 2016, Grup melakukan perubahan kebijakan akuntansi atas tanah dari model biaya menjadi model revaluasi. Tanah disajikan sebesar nilai wajar.

Penilaian terhadap tanah dilakukan oleh penilai independen eksternal yang memiliki sertifikasi. Penilaian atas aset tersebut dilakukan secara berkala untuk memastikan bahwa nilai wajar aset yang direvaluasi tidak berbeda secara material dengan nilai tercatatnya.

Jika nilai wajar dari aset yang direvaluasi mengalami perubahan yang signifikan dan fluktuatif, maka perlu direvaluasi secara tahunan, sedangkan jika nilai wajar dari aset yang direvaluasi tidak mengalami perubahan yang signifikan dan fluktuatif, maka perlu dilakukan revaluasi minimal 3 tahun sekali.

Kenaikan nilai tercatat yang timbul dari revaluasi tanah dicatat sebagai "Selisih bersih revaluasi aset tetap" dan disajikan sebagai "Penghasilan komprehensif lain". Penurunan nilai tercatat yang timbul dari revaluasi dicatat sebagai beban pada tahun berjalan. Apabila aset tersebut memiliki saldo "Selisih bersih revaluasi aset tetap" yang disajikan sebagai "penghasilan komprehensif lain", maka selisih penurunan nilai tercatat tersebut dibebankan terhadap "Selisih bersih revaluasi aset tetap" dan sisanya diakui sebagai beban tahun berjalan.

Grup melakukan revaluasi di tahun 2016 untuk tujuan akuntansi dan pajak dimana entitas memperoleh persetujuan dari otoritas perpajakan. Jumlah pajak yang telah dibayar diakui di penghasilan komprehensif lain dan terakumulasi dalam ekuitas dan di-offset pada bagian selisih bersih revaluasi aset tetap.

Aset tetap, kecuali tanah, dinyatakan sebesar biaya perolehan dikurangi akumulasi penyusutan dan penyisihan penurunan nilai. Biaya perolehan termasuk biaya penggantian bagian aset tetap saat biaya tersebut terjadi, jika memenuhi kriteria pengakuan aset tetap.

r. Fixed assets, leased assets and liabilities, and intangible assets

i. Fixed assets and software

On 1 April 2016, the Group changed their accounting policy relating to land from cost model into revaluation model. The land is stated at fair value.

Appraisal of the land is performed by a certified external independent appraiser. Assessment of those assets are conducted regularly to ensure that the fair value of the revaluated asset is not materially different from its carrying value.

If the fair value of the revalued asset change significantly and fluctuative, it is necessary to revalue the assets on an annual basis, whereas if the fair value of the revalued asset does not change significantly, it is necessary to revalue at a minimum every 3 years.

The increase in the carrying value arising from the revaluation of land is recorded as "Net differences in fixed assets revaluation" and is presented as "Other comprehensive income". Any impairment arising from the revaluation is recorded as expense of the current year. If the asset had a balance of "Net differences in fixed assets revaluation" that is presented as "other comprehensive income", then the impairment difference recorded is charged against "Net differences in fixed assets revaluation" and the rest is recognised as expense of the current year.

Group conducted revaluation in 2016, for accounting and tax purposes where the Group obtained approval from the tax authorities. The amount of taxes paid is recognised in other comprehensive income and accumulated in equity and offset against Net differences in fixed assets revaluation.

Fixed assets except for land are stated at cost less accumulated depreciation and impairment losses. Such cost includes the cost of replacing part of the fixed assets when that cost is incurred, if the recognition criteria are met.

Selanjutnya, pada saat inspeksi yang signifikan dilakukan, biaya inspeksi itu diakui ke dalam jumlah tercatat (*carrying amount*) aset tetap sebagai suatu penggantian jika memenuhi kriteria pengakuan. Semua biaya pemeliharaan dan perbaikan yang tidak memenuhi kriteria pengakuan diakui dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian pada saat terjadinya. Perangkat lunak diakui sebagai aset takberwujud.

Penyusutan dan amortisasi dihitung dengan menggunakan metode garis lurus selama umur manfaat ekonomis aset tetap dan aset takberwujud yang diestimasi. Estimasi umur manfaat ekonomis dan persentase penyusutan dan amortisasi per tahun adalah sebagai berikut:

	Tahun/ Years	Persentase/ Percentage	
Bangunan	20	5%	Buildings
Perlengkapan, peralatan kantor, komputer dan kendaraan bermotor	4-5	20% - 25%	Furniture and fixtures, office equipment, computer and vehicles
Perangkat lunak	5	20%	Software

Jumlah tercatat aset tetap dihentikan pengakuannya pada saat dilepaskan atau saat tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Laba atau rugi yang timbul dari penghentian pengakuan aset tetap (dihitung sebagai perbedaan antara jumlah neto hasil pelepasan dan jumlah tercatat dari aset tetap) dimasukkan dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian pada tahun berjalan aset tetap tersebut dihentikan pengakuannya.

Pada setiap akhir tahun buku, nilai residu, umur manfaat ekonomis dan metode penyusutan dikaji ulang dan jika tidak sesuai dengan keadaan akan disesuaikan secara prospektif.

Aset tetap dalam pembangunan dinyatakan sebesar biaya perolehan dan disajikan sebagai bagian dari aset tetap. Ketika aset dalam pembangunan telah selesai dan siap digunakan, akumulasi biaya perolehan direklasifikasikan ke akun aset tetap yang sebenarnya.

Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the fixed assets as a replacement if the recognition criteria are fulfilled. All other repair and maintenance costs that do not have future economic benefit are recognised in the consolidated statement of profit or loss and other comprehensive incomes as incurred. Software is recognised as intangible assets.

Depreciation and amortization are calculated using the straight-line method over the estimated useful life of fixed assets and intangible assets. The estimated useful life and percentage of depreciation and amortization per annum are as follows:

Fixed assets are derecognised upon disposal or when no future economic benefits are expected from their use or disposal. Any gain or loss arising from the derecognition of the fixed asset (calculated as the difference between the net disposal proceeds and the carrying amount of the fixed asset) is included in the consolidated statement of profit or loss and other comprehensive income in the year which the fixed asset is derecognised.

The fixed asset's residual values, useful life and methods of depreciation are reviewed, and adjusted prospectively if appropriate at the end of each financial year.

Construction in progress of fixed asset is stated at cost and presented as part of fixed assets. Accumulated costs are reclassified to the appropriate fixed assets account when the assets are substantially complete and ready for their intended use.

Sesuai dengan PSAK 216 "Aset Tetap", biaya perolehan hak atas tanah dalam bentuk hak guna usaha, hak guna bangunan dan hak pakai diakui sebagai aset tetap. Biaya perolehan tersebut merupakan biaya yang dapat diatribusikan secara langsung untuk memperoleh hak atas tanah tersebut termasuk biaya pengurusan legal hak atas tanah ketika tanah diperoleh pertama kali.

Hak atas tanah dalam bentuk hak guna usaha, hak guna bangunan dan hak pakai tidak disusutkan, kecuali terdapat bukti yang mengindikasikan bahwa perpanjangan atau pembaruan hak atas tanah tersebut kemungkinan besar atau pasti tidak diperoleh.

PSAK 236 "Penurunan Nilai Aset" mensyaratkan bahwa nilai tercatat aset tetap dikaji ulang setiap tanggal laporan posisi keuangan konsolidasian untuk menilai apakah aset tetap tersebut nilai tercatatnya lebih tinggi dari nilai terpulihkan (*recoverable amounts*) dari aset tetap tersebut. Jika nilai tercatat aset tetap melebihi taksiran nilai terpulihkan dari aset tetap tersebut, nilai tercatat aset tetap harus diturunkan menjadi nilai terpulihkan dari aset tetap tersebut.

ii. Aset dan liabilitas sewa

Grup telah menerapkan PSAK 116 "Sewa" sejak tanggal 1 Januari 2020.

PSAK 116 menerapkan persyaratan baru atau amendemen sehubungan dengan akuntansi sewa. Standar ini memperkenalkan perubahan signifikan untuk akuntansi penyewa dengan menghapus perbedaan antara sewa operasi dan pembiayaan, serta mensyaratkan pengakuan aset hak guna dan pengakuan liabilitas sewa pada saat dimulainya sewa untuk seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Berbeda dengan akuntansi penyewa, persyaratan untuk akuntansi pesewa sebagian besar tidak berubah.

i. Fixed assets and software (continued)

In accordance with SFAS 216 "Fixed Assets", the cost of land rights in the form of right to cultivate, right to build and use rights are recognised as fixed assets. The acquisition cost is the cost that are directly attributable to obtain land rights, including the cost of legal rights to the land when the land was first acquired.

Land rights in the form of right to cultivate, right to build and use rights are not amortised, unless there is evidence to indicate that the extension or renewal of land rights is likely to or definitely not obtained.

SFAS 236 "Impairment of Assets" requires that the carrying amounts of fixed assets are reviewed at each consolidated statement of financial position date to assess whether they are recorded in excess of their recoverable amounts of the fixed assets. If the carrying value exceeds this estimated recoverable amount, assets are written down to their recoverable amounts of the fixed assets.

ii. Leased assets and liabilities

The Group has implemented SFAS 116 "Lease" since 1 January 2020.

SFAS 116 applies new or amended requirements with respect to lease accounting. This standard introduces significant changes to lessee accounting by eliminating the distinction between operating and financing leases, and requires recognition of right-of-use assets and recognition of lease liabilities at lease inception for all leases, except for short-term leases and leases of low-value assets. In contrast to lessee accounting, the requirements for lessor accounting are mostly unchanged.

PSAK 116 menentukan apakah kontrak merupakan, atau mengandung sewa atas dasar jika penyewa memiliki hak untuk mengendalikan penggunaan aset selama suatu jangka waktu tertentu untuk dipertukarkan dengan imbalan.

Grup menggunakan tingkat diskonto tunggal untuk portofolio sewa dengan karakteristik yang hampir sama.

Grup menerapkan pendekatan pengakuan dan pengukuran tunggal untuk seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Grup mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak guna yang mewakili hak untuk menggunakan aset pendasar.

Grup mengakui aset hak guna pada tanggal dimulainya sewa. Aset hak guna diukur pada biaya perolehan, dikurangi akumulasi penyusutan dan kerugian penurunan nilai, dan disesuaikan untuk setiap pengukuran kembali liabilitas sewa. Liabilitas sewa merupakan jumlah pembayaran sewa yang masih harus dibayar hingga akhir masa sewa yang didiskontokan dengan menggunakan suku bunga pinjaman inkremental. Biaya aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang dibayarkan, biaya pemulihan dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai sewa dikurangi insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama jangka waktu yang lebih pendek antara masa sewa dengan estimasi masa manfaat aset, sebagai berikut:

ii. Leased assets and liabilities (continued)

SFAS 116 determines whether a contract is, or contains a lease on the basis that the lessee has the right to control the use of the asset for a specified period of time in exchange for certain consideration.

The Group uses a single discount rate for lease portfolios with similar characteristics.

The Group applies a single recognition and measurement approach to all leases, except for short-term leases and low-value asset leases. The Group recognises a lease liabilities to make lease payments and rights of use assets that represent the right to use the underlying asset.

The Group recognised the rights of use assets at the inception date of the lease. The rights of use assets are measured at cost, less accumulated depreciation and impairment losses, and adjusted for any remeasurement of the lease liabilities. Lease liabilities are the amount of lease payments accrued until the end of the lease term, discounted using the incremental loan interest rate. The cost of right of use assets includes the amount of lease liability recognised, initial direct costs paid, recovery costs and lease payments made on or before the start date of the lease less lease incentives received. Rights of use assets are depreciated using the straight-line method over the shorter period between the lease term and the estimated useful life of the asset, as follows:

Jika kepemilikan aset sewa dialihkan ke Grup pada akhir masa sewa atau pembayaran sewa mencerminkan pelaksanaan opsi pembelian, penyusutan dihitung menggunakan estimasi masa manfaat ekonomis aset. Aset hak guna diuji penurunan nilainya sesuai dengan PSAK 236 "Penurunan Nilai Aset".

Pada tanggal dimulainya sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini dari pembayaran sewa masa depan yang akan dilakukan selama masa sewa. Pembayaran sewa termasuk pembayaran tetap (termasuk pembayaran tetap secara-substansi) dikurangi piutang insentif sewa, pembayaran sewa variabel yang bergantung pada indeks atau suku bunga, dan jumlah yang diharapkan akan dibayar dalam jaminan nilai residu. Pembayaran sewa juga termasuk harga eksekusi opsi pembelian yang wajar jika dipastikan akan dilakukan oleh Grup dan pembayaran penalti untuk mengakhiri sewa, jika jangka waktu sewa mencerminkan Grup mengeksekusi opsi penghentian sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau suku bunga diakui sebagai beban pada periode di mana peristiwa atau kondisi yang memicu pembayaran terjadi.

Dalam menghitung nilai kini dari pembayaran sewa, Grup menggunakan suku bunga pinjaman inkremental penyewa pada tanggal dimulainya sewa karena suku bunga implisit dalam sewa tidak dapat ditentukan. Setelah tanggal dimulainya sewa, jumlah liabilitas sewa ditingkatkan untuk mencerminkan pertambahan bunga dan dikurangi pembayaran sewa yang dilakukan. Selain itu, jumlah tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan jangka waktu sewa, perubahan pembayaran sewa, atau perubahan dalam penilaian opsi untuk membeli aset pendasar.

**2. MATERIAL ACCOUNTING POLICY INFORMATION

ii. Leased assets and liabilities (continued)

If the ownership of the leased asset is transferred to the Group at the end of the lease term or the lease payments reflect the exercise of the purchase option, depreciation is calculated using the estimated useful life of the asset. Rights of use assets are assessed for impairment in accordance with SFAS 236 "Impairment of Assets".

At the inception date of the lease, the Group recognises lease liabilities which measured at the present value of future lease payments to be made over the lease term. Lease payments include fixed payments (including substantially fixed payments) less lease incentive receivables, variable lease payments that are index or interest rate dependent, and the amount expected to be paid in a residual value guarantee. Lease payments also include the reasonable exercise price for the purchase option if it is determined to be made by the Group and the payment of a penalty to terminate the lease, if the lease term reflects the Group exercising the lease termination option. Variable lease payments that are not dependent on an index or interest rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental loan interest rate of the lessee at the inception date of the lease because the interest rate implicit in the lease cannot be determined. After the inception date of the lease, the amount of the lease liability is increased to reflect the increase in interest and less lease payments made. In addition, the carrying amount of the lease liability is remeasured if there are modifications, changes in the term of the lease, changes in lease payments, or changes in the valuation of the option to purchase the underlying asset.

This expense is shown under general and administrative expenses in the income statement.

The implementation of SFAS 116 payment applies to all leases (except as stated earlier), as follows:

- (a) Present right of use assets as part of fixed assets and leased liabilities are presented as part of other liabilities in the consolidated statement of financial position, measured at the present value of future lease payments;

Intangible assets consist of software and *goodwill*.

Software purchased by the Bank and Subsidiaries is recorded at cost less accumulated amortization and accumulated impairment losses. Amortization method, estimated useful life and residual value are reviewed at end of reporting period and adjusted if necessary.

z. Liabilitas kontrak asuransi

Kontrak asuransi adalah kontrak yang diterbitkan oleh perusahaan asuransi dimana perusahaan asuransi menerima risiko asuransi yang signifikan dari pemegang polis. Risiko asuransi yang signifikan didefinisikan sebagai kemungkinan membayar manfaat yang signifikan kepada tertanggung apabila suatu kejadian atas risiko yang diasuransikan terjadi dibandingkan dengan manfaat minimum yang akan dibayarkan apabila risiko yang diasuransikan tidak terjadi. Skenario-skenario yang diperhatikan adalah skenario yang mengandung unsur komersial.

Sejak 1 Januari 2025

Berdasarkan PSAK 117, kontrak asuransi dikelompokkan menjadi kelompok-kelompok untuk tujuan pengukuran. Kelompok kontrak asuransi ditentukan dengan mengidentifikasi portofolio kontrak asuransi, di mana setiap portofolio terdiri dari kelompok kontrak dengan risiko yang serupa yang dikelola bersama. Portofolio tersebut dibagi lebih lanjut berdasarkan profitabilitas kontrak menjadi tiga kategori: kontrak yang merugikan, kontrak yang tidak memiliki risiko signifikan untuk menjadi merugikan, dan kontrak yang tersisa. Kontrak asuransi juga dikelompokkan menjadi kohort tahunan (yaitu berdasarkan tahun penerbitan). Portofolio kontrak reasuransi yang dimiliki dinilai untuk agregasi secara terpisah dari portofolio kontrak asuransi yang diterbitkan.

Kontrak asuransi diukur menggunakan Modal Pengukuran Umum (MPU), Pendekatan Biaya Variabel (PBV), atau *Premium Allocation Approach* (PAA). Entitas anak umumnya menggunakan MPU dan PBV (untuk kontrak yang memiliki fitur partisipasi langsung, misalnya kontrak *unit-link*), tergantung pada karakteristik spesifik dari kontrak asuransi tersebut.

y. Deposits from other banks (continued)

Included in the deposits from other banks are sharia deposits in a form of *wadiah* demand deposits.

Deposits from other banks are classified as financial liabilities at amortised cost. Incremental costs directly attributable to acquisition of deposits from other banks are included in the amount of deposits and amortised over the expected life of the deposits. Refer to Note 2c for the accounting policy for financial liabilities at amortised cost.

z. Insurance contract liabilities

Insurance contract is a contract issued by insurance companies which the insurer accepts significant insurance risk from the policyholders. Significant insurance risk is defined as the possibility of paying significantly more benefit to the policyholder upon the occurrence of insured event on the risk covered compared to the minimum benefit payable in a scenario where the insured event on the risk covered does not occur. Scenarios that are considered are those with commercial substance.

Since 1 January 2025

Under SFAS 117, insurance contracts are aggregated into groups for measurement purposes. Groups of insurance contracts are determined by identifying portfolios of insurance contracts, where each portfolio comprise group of contracts with similar risks which are managed together. The portfolios are further divided based on the profitability of contracts into three categories: onerous contracts, contracts with no significant risk of becoming onerous, and the remaining contracts. The insurance contracts are also grouped into annual cohorts (i.e. by year of issue). Portfolios of reinsurance contracts held are assessed for aggregation separately from portfolios of insurance contracts issued.

Insurance contracts are measured under the General Measurement Model (GMM), Variable Fee Approach ("VFA") or Premium Allocation Approach ("PAA"). The Subsidiary predominantly uses the GMM and VFA (for contract that have direct participation features, such as unit-linked contracts), depending on the specific characteristics of the insurance contracts.

z. Liabilitas kontrak asuransi (lanjutan)

Sejak 1 Januari 2025 (lanjutan)

Pengakuan awal dan batasan kontrak

Kelompok kontrak asuransi diukur pada pengakuan awal sebagai total dari:

- Arus kas pemenuhan, yang terdiri dari estimasi terbaik nilai kini arus kas masa depan dalam batas kontrak yang diharapkan akan muncul, serta penyesuaian risiko eksplisit untuk risiko non-keuangan; dan
- *Contractual Service Margin (CSM)* yang mewakili penundaan keuntungan yang muncul pada pengakuan awal.

Entitas anak mengakui kelompok kontrak asuransi yang diterbitkan dari yang paling awal di antara hal-hal berikut:

- Awal periode perlindungan kelompok kontrak;
- Tanggal ketika pembayaran premi pertama dari pemegang polis dalam kelompok jatuh tempo; dan
- Untuk kelompok kontrak yang merugikan, segera setelah fakta dan keadaan menunjukkan bahwa kelompok tersebut merugikan.

Batas kontrak mendefinisikan arus kas masa depan yang mana termasuk dalam pengukuran kontrak. Akhir batas kontrak dianggap terjadi pada saat Entitas Anak tidak lagi memiliki hak dan kewajiban substansial berdasarkan kontrak asuransi untuk memberikan layanan atau memaksa pemegang polis untuk membayar premi.

Liabilitas kepada pemegang polis Entitas Anak dicatat di laporan posisi keuangan konsolidasian sebagai bagian dari "Liabilitas Kontrak Asuransi" berdasarkan perhitungan aktuaris dengan menggunakan asumsi aktuarial.

Entitas Anak memisahkan jumlah yang diakui dalam laporan laba rugi dan penghasilan komprehensif lainnya menjadi hasil layanan asuransi, yang terdiri dari pendapatan asuransi dan biaya layanan asuransi, serta pendapatan atau biaya keuangan asuransi.

z. *Insurance contract liabilities* (continued)

Since 1 January 2025 (continued)

Initial recognition and contract boundary

Groups of insurance contracts are measured on initial recognition as the total of:

- *Fulfilment cash flows*, comprising the best estimate of the present value of future cash flows within the contract boundary that are expected to arise and an explicit risk adjustment for non-financial risk; and
- A *Contractual Service Margin (CSM)* that represents the deferral of any day-one gains arising on initial recognition.

The Subsidiary recognises groups of insurance contracts issued from the earliest of the following:

- The beginning of the coverage period of the group of contracts;
- The date when first premium payment from policyholder in the group becomes due; and
- For a group of onerous contracts, as soon as facts and circumstances indicate that the group is onerous.

The contract boundary defines which future cash flows are included in the measurement of a contract. The end of the contract boundary is considered to be at the point when the Subsidiary no longer has substantive rights and obligations under the insurance contract to provide services or compel the policyholder to pay premiums.

Liabilities to policyholders Subsidiary are recorded in the consolidated statement of financial position as part of "Insurance Contract Liabilities" based on actuarial calculations using actuarial assumptions.

The Subsidiary disaggregates the amounts recognised in the statement of profit or loss and other comprehensive income into a insurance service result, comprising insurance revenue and insurance service expenses, and insurance finance income or expenses.

Contractual Service Margin ("CSM")

CSM disesuaikan pada setiap periode pelaporan untuk perubahan arus kas masa depan yang diharapkan yang disebabkan oleh perubahan asumsi teknis atau asumsi estimasi terbaik (kematian, morbiditas, umur panjang, *lapse* atau penarikan, biaya. Namun, jika perubahan negatif pada arus kas masa depan yang didiskontokan lebih besar dari sisa CSM, selisihnya segera diakui dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian karena kontrak asuransi menjadi merugi dan CSM tidak boleh negatif. *Interest* juga diakumulasikan pada CSM dengan tingkat bunga yang dikunci pada saat pengakuan awal kontrak (yaitu tingkat diskonto yang digunakan pada saat awal untuk menentukan nilai sekarang dari arus kas masa depan yang diperkirakan).

CSM akan *released* ke laba atau rugi berdasarkan unit pertanggungan, mencerminkan jumlah manfaat yang diberikan dan durasi pertanggungan yang diharapkan dari kontrak yang tersisa dalam kelompok kontrak asuransi. Mengingat keragaman kontrak asuransi, definisi unit pertanggungan melibatkan penggunaan penilaian dengan mempertimbangkan tingkat pertanggungan yang ditetapkan dalam kontrak berdasarkan maksimum manfaat asuransi (misalnya manfaat kematian, saldo pinjaman yang belum dibayar, nilai akun pemegang polis ditambah manfaat kematian, maksimum manfaat kesehatan) dan durasi pertanggungan yang diharapkan dari kontrak.

Komponen kerugian

Entitas anak telah mengelompokkan kontrak yang merugikan pada pengakuan awal secara terpisah dari kontrak dalam portofolio yang sama yang tidak merugikan pada pengakuan awal. Kelompok yang tidak merugikan pada pengakuan awal juga dapat menjadi merugikan jika asumsi dan pengalaman berubah. Entitas Anak telah menetapkan komponen kerugian dari kewajiban untuk perlindungan yang tersisa untuk setiap kelompok merugikan yang menggambarkan kerugian masa depan yang diakui.

Komponen kerugian dilepaskan berdasarkan alokasi sistematis dari perubahan selanjutnya dalam arus kas pemenuhan kepada: (i) komponen kerugian; dan (ii) kewajiban untuk perlindungan yang tersisa, tidak termasuk komponen kerugian. Komponen kerugian juga diperbarui untuk perubahan selanjutnya dalam estimasi arus kas pemenuhan yang terkait dengan layanan masa depan.

**2. MATERIAL ACCOUNTING POLICY INFORMATION

z. Insurance contract liabilities (continued)

Since 1 January 2025 (continued)

Contractual Service Margin ("CSM")

The CSM is adjusted at each subsequent reporting period for changes in expected future cash flows driven by changes in technical assumptions or best estimate assumptions (death, morbidity, longevity, surrenders, expenses). However, if negative changes in future discounted cash flows are greater than the remaining CSM, the difference is immediately recognized in the consolidated statement of profit or loss and other comprehensive income as the insurance contract become onerous and the CSM cannot be negative. Interest is also accreted on the CSM at rates locked in at initial recognition of a contract (i.e., discount rate used at inception to determine the present value of the estimated future cash flows).

The CSM will be released into profit or loss based on coverage units, reflecting the quantity of the benefits provided and the expected coverage duration of the remaining contracts in the insurance group of contract. Given the variety of insurance contracts, the definition of coverage units involves the use of judgment by considering both the level of coverage defined within the contract based on the maximum of insurance benefit (e.g. a death benefit, outstanding loan balance, the policyholders' account value plus death benefit, maximum of health benefit) and the expected coverage duration of the contract.

Loss components

The Subsidiary has grouped contracts that are onerous at initial recognition separately from contracts in the same portfolio that are not onerous at initial recognition. Groups that were not onerous at initial recognition can also subsequently become onerous if assumptions and experience changes. The Subsidiary has established a loss component of the liability for remaining coverage for any onerous group depicting the future losses recognised.

The loss component is released based on a systematic allocation of the subsequent changes in the fulfilment cash flows to: (i) the loss component; and (ii) the liability for remaining coverage excluding the loss component. The loss component is also updated for subsequent changes in estimates of the fulfilment cash flows related to future service.

Entitas Anak menggunakan proporsi pada pengakuan awal untuk menentukan alokasi sistematis dari perubahan selanjutnya dalam arus kas masa depan antara komponen kerugian dan kewajiban untuk perlindungan yang tersisa, tidak termasuk komponen kerugian.

Setiap bunga, keuntungan atau kerugian dari kenaikan atau penurunan nilai pasar investasi dicatat sebagai pendapatan atau beban, disertai dengan pengakuan kenaikan atau penurunan liabilitas kepada pemegang polis *unit-link* di laporan laba rugi dan penghasilan komprehensif lain konsolidasian dan liabilitas kepada pemegang polis *unit-link* di laporan posisi keuangan konsolidasian.

Pendapatan dan biaya keuangan asuransi

Pendapatan atau biaya keuangan asuransi terdiri dari perubahan dalam jumlah tercatat dari kelompok kontrak asuransi yang timbul dari:

- Pengaruh nilai waktu uang dan perubahan dalam nilai waktu uang.
- Pengaruh risiko keuangan dan perubahan dalam risiko keuangan.

Sebelum 1 Januari 2025

Entitas Anak menerbitkan kontrak asuransi yang menerima risiko asuransi yang signifikan dari pemegang polis. Entitas Anak mendefinisikan risiko asuransi yang signifikan sebagai kemungkinan membayar manfaat pada saat terjadinya suatu kejadian yang diasuransikan, yang setidaknya 10% lebih besar dari manfaat yang dibayarkan jika kejadian yang diasuransikan tidak terjadi. Jika suatu kontrak asuransi tidak mengandung risiko asuransi yang signifikan, maka kontrak tersebut diklasifikasikan sebagai kontrak investasi.

Loss components (continued)

The systematic allocation of subsequent changes to the loss component results in the total amounts allocated to the loss component being equal to zero by the end of the coverage period of a group of contracts (since the loss component will have been materialised in the form of incurred claims). The Subsidiary uses the proportion on initial recognition to determine the systematic allocation of subsequent changes in future cash flows between the loss component and the liability for remaining coverage excluding the loss component.

Any interest, gain or loss due to increases or decreases in market value of investments are recorded as income or expense, with a corresponding recognition of increase or decrease in liability to unit-link policyholders in the statement of profit or loss and other comprehensive income and liability to unit-link policyholders in the consolidated statement of financial position.

Insurance finance income and expense

Insurance finance income or expenses comprise the change in the carrying amount of the group of insurance contracts arising from:

- The effect of the time value of money and changes in the time value of money.
- The effect of financial risk and changes in financial risk.

Before 1 January 2025

The Subsidiary issue insurance contracts that accepted significant insurance risk from the policyholders. The Subsidiary define significant insurance risk as the possibility of having to pay benefits on the occurrence of an insured event of at least 10% more than the benefits payable if the insured event did not occur. When an insurance contract does not have significant insurance risk, it is classified as investment contract.

Entitas Anak menerbitkan kontrak asuransi untuk produk asuransi tradisional dan produk asuransi yang dikaitkan dengan investasi. Kedua jenis produk ini mempunyai risiko asuransi yang signifikan.

Produk-produk dari Entitas Anak dibagi berdasarkan kategori sebagai berikut:

- Asuransi jiwa tradisional *non-participating*, memberikan perlindungan untuk menutupi risiko kematian, kecelakaan, penyakit kritis dan kesehatan dari pemegang polis. Jumlah uang pertanggungan akan dibayarkan pada saat terjadinya risiko yang ditanggung.
- Unit-link, produk asuransi dengan pembayaran premi tunggal maupun reguler yang dikaitkan dengan investasi yang memberikan kombinasi manfaat proteksi dan manfaat investasi.

Ketika sebuah kontrak telah diklasifikasi sebagai kontrak asuransi, reklasifikasi terhadap kontrak tersebut tidak dapat dilakukan kecuali ketentuan perjanjian kemudian diamendemen. Seluruh produk asuransi yang diterbitkan oleh Entitas Anak mempunyai risiko asuransi yang signifikan.

Entitas Anak memisahkan komponen deposit dari kontrak *unit-link* seperti yang disyaratkan oleh PSAK 104 jika kondisi-kondisi di bawah ini terpenuhi:

- Entitas Anak dapat mengukur komponen "deposit" secara terpisah (termasuk opsi penyerahan melekat, yaitu tanpa memperhitungkan komponen "asuransi");
- Kebijakan akuntansi Entitas Anak tidak mensyaratkan untuk mengakui semua hak dan liabilitas yang timbul dari komponen "deposit".

Entitas Anak tidak memisahkan komponen deposit dikarenakan hanya salah satu kondisi di atas yang terpenuhi.

Pengujian kecukupan liabilitas

Pengujian kecukupan liabilitas dilakukan pada tanggal pelaporan untuk kontrak secara individual ataupun per kelompok produk, ditentukan sesuai dengan cara Entitas Anak memperoleh, memelihara dan mengukur profitabilitas dari kontrak asuransi tersebut.

Sebelum 1 Januari 2025 (lanjutan)

Pengujian kecukupan liabilitas (lanjutan)

Untuk asuransi jiwa, liabilitas kepada pemegang polis khususnya liabilitas untuk klaim masa depan diuji untuk menentukan apakah liabilitas tersebut cukup untuk menutupi semua arus kas keluar di masa depan termasuk semua manfaat yang dijamin dan manfaat tambahan yang dijamin (jika ada), manfaat partisipasi yang tidak dijamin (jika ada), semua biaya untuk penerbitan polis dan pemeliharaan polis, serta mencerminkan arus kas masuk masa depan yaitu penerimaan premi masa depan.

Liabilitas dihitung berdasarkan diskonto dari arus kas untuk semua arus kas yang terkait yaitu arus kas keluar dan arus kas masuk seperti yang disebutkan di atas dengan menggunakan seperangkat asumsi estimasi terbaik terkini yang ditetapkan oleh aktuaris Entitas Anak, termasuk asumsi tingkat mortalita, morbidita, tingkat pembatalan polis, biaya, tingkat inflasi dan tingkat suku bunga. Entitas Anak yang bergerak dalam bidang asuransi jiwa menerapkan metode *Gross Premium Reserve* dalam perhitungan cadangan premi atas manfaat polis masa depan kepada pemegang polis dengan menggunakan asumsi aktuarial berdasarkan asumsi estimasi terbaik dan margin atas risiko pemburukan, sehingga pengujian kecukupan liabilitas tidak diperlukan lagi.

Reasuransi

Entitas Anak mereasuransikan sebagian porsi risikonya kepada perusahaan reasuradur. Jumlah premi yang dibayar atau porsi premi atas transaksi reasuransi prospektif diakui selama periode kontrak asuransi sesuai dengan proporsi jumlah proteksi reasuransi yang diterima.

ad. Perpajakan (lanjutan)

Bank Mandiri dan Entitas Anak menerapkan metode liabilitas laporan posisi keuangan (*balance sheet liability method*) untuk menentukan beban pajak penghasilan. Menurut metode liabilitas laporan posisi keuangan, aset dan utang pajak tangguhan diakui untuk semua perbedaan temporer antara nilai aset dan liabilitas yang tercatat di laporan posisi keuangan dengan dasar pengenaan pajak atas aset dan liabilitas tersebut pada setiap tanggal pelaporan. Metode ini juga mensyaratkan adanya pengakuan manfaat pajak di masa datang yang belum digunakan apabila besar kemungkinan bahwa manfaat tersebut dapat direalisasikan di masa yang akan datang.

Aset pajak tangguhan diakui apabila terdapat kemungkinan besar bahwa jumlah laba fiskal pada masa datang akan memadai untuk mengkompensasi aset pajak tangguhan yang muncul akibat perbedaan temporer.

Pajak tangguhan dihitung dengan menggunakan tarif pajak yang berlaku atau secara substansial diberlakukan pada periode dimana aset tersebut direalisasi atau liabilitas tersebut diselesaikan. Perubahan nilai tercatat aset dan liabilitas pajak tangguhan yang disebabkan oleh perubahan tarif pajak dibebankan pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian tahun berjalan, kecuali untuk transaksi-transaksi yang sebelumnya telah langsung dibebankan atau dikreditkan ke ekuitas.

Koreksi atas liabilitas pajak diakui pada saat surat ketetapan pajak diterima, atau apabila diajukan keberatan dan/atau banding, maka koreksi diakui pada saat keputusan atas keberatan dan/atau banding tersebut diterima. Manajemen juga dapat membentuk pencadangan terhadap liabilitas pajak di masa depan sebesar jumlah yang diestimasikan akan dibayarkan ke kantor pajak jika berdasarkan evaluasi pada tanggal laporan posisi keuangan konsolidasian terdapat risiko pajak yang *probable*. Asumsi dan estimasi yang digunakan dalam perhitungan pembentukan cadangan tersebut memiliki unsur ketidakpastian.

Taksiran pajak penghasilan Bank Mandiri dan Entitas Anak dihitung untuk masing-masing perusahaan sebagai badan hukum terpisah. Aset pajak kini (*current tax assets*) dan liabilitas pajak kini (*current tax liabilities*) untuk badan hukum yang berbeda tidak disalinghapuskan dalam laporan keuangan konsolidasian. Utang pajak penghasilan badan dan utang pajak lainnya Bank Mandiri dan Entitas Anak disajikan sebagai "Utang pajak" di laporan posisi keuangan konsolidasian.

ad. Income tax (continued)

Bank Mandiri and Subsidiaries apply the balance sheet liability method to determine income tax expense. Under the balance sheet liability method, deferred tax assets and liabilities are recognised for all temporary differences arising between the tax base of assets and liabilities and their carrying amount in the consolidated statement of financial position at each reporting date. This method also requires the recognition of unused future tax benefits, to the extent that realisation of such benefits are probable in the future.

Deferred tax assets are recognised only to the extent that is probable that future taxable income will be sufficient to compensate deferred tax asset arising from temporary differences.

Deferred tax is calculated using tax rates enacted or substantively applied to the period during which the asset is realised or the liability is settled. The changes to the carrying value of deferred tax assets and liabilities due to the changes of tax rates are charged in the current year, consolidated statement of profit or loss and other comprehensive income except for transactions which previously have been directly charged or credited to equity.

Adjustments to taxation obligations are recognised when tax assessment letter is received or, if objection/appeal is submitted, adjustments are recognised when the result of objection/appeal is received. Management provides provision for future tax liability at the estimated amount that will be payable to the tax office if there is a probable tax exposure, based on management's assessment as of the date of consolidated statement of financial position. Assumptions and estimation used in the calculation of provision may involve element of uncertainty.

The estimated corporate income tax of Bank Mandiri and Subsidiaries are calculated for each company as a separate legal entity. Current tax assets and current tax liabilities for different legal income entities cannot be set-off in the consolidated financial statements. Corporate tax payables and other tax payables of Bank Mandiri and Subsidiaries are presented as "Taxes payable" in the consolidated statement of financial position.

ae. Dana syirkah temporer

Dana *syirkah* temporer adalah dana yang diterima oleh Entitas Anak. Entitas Anak mempunyai hak untuk mengelola dan menginvestasikan dana, baik sesuai dengan kebijakan Entitas Anak atau kebijakan pembatasan dari pemilik dana, dengan keuntungan dibagikan sesuai dengan kesepakatan.

Deferred income tax assets and liabilities are offsetted if there is a legally enforceable right to offset current tax assets against current tax liabilities and if the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either for the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

ae. Temporary syirkah funds

Temporary *syirkah* funds represent funds received by a Subsidiary. The Subsidiary has the right to manage and invest funds in accordance with either the Subsidiary's policy or restriction set by the depositors with the agreed profit sharing.

Relationship between the Subsidiary and the owner of temporary *syirkah* funds are based on partnership *Mudharabah muthlaqah*, *Mudharabah muqayyadah* or *musyarakah*.

The examples of temporary *syirkah* funds are investment funds received from *Mudharabah muthlaqah*, *Mudharabah muqayyadah* and other similar accounts.

- 1) *Mudharabah muthlaqah* represents *Mudharabah* in which the fund owner (*shahibul maal*) entrusts the fund manager (*mudharib*/Subsidiary) in managing its investment.
- 2) *Mudharabah muqayyadah* represents *Mudharabah* in which the fund owner sets restrictions to the fund manager regarding, among others, the place, the means and/or the object of investment.

Temporary *syirkah* funds cannot be classified as liability because the Subsidiary does not have any liability to return the fund to the owners when experience losses, except for losses due to the Subsidiary's management negligence or default. On the other hand, temporary *syirkah* funds also cannot be classified as equity, because of the existence of maturity period and the depositors do not have the same rights as the shareholders, such as voting rights and the rights of realised gain from current asset and other non-investment accounts.

Pada saat menghitung suku bunga efektif, Grup mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, namun tidak mempertimbangkan kerugian kredit di masa datang. Perhitungan ini mencakup seluruh komisi, provisi dan bentuk lain yang diterima oleh para pihak dalam kontrak yang merupakan bagian tak terpisahkan dari suku bunga efektif, biaya transaksi dan seluruh premi atau diskon lainnya.

Jika aset keuangan atau kelompok aset keuangan serupa telah diturunkan nilainya sebagai akibat kerugian penurunan nilai, maka pendapatan bunga yang diperoleh setelahnya diakui atas bagian aset keuangan yang tidak mengalami penurunan nilai dari aset keuangan yang mengalami penurunan nilai, berdasarkan suku bunga yang digunakan untuk mendiskonto arus kas masa datang dalam menghitung kerugian penurunan nilai.

Pengakuan keuntungan transaksi *murabahah* dengan pembayaran tangguh atau secara angsuran dilakukan selama periode akad sesuai dengan metode tingkat imbal hasil efektif.

Berdasarkan PSAK 402, pendapatan *murabahah* yang termasuk margin ditangguhkan dan pendapatan administrasi, diakui dengan menggunakan metode setara tingkat imbal hasil efektif, yaitu tingkat imbal hasil setara yang akan mendiskonto secara tepat estimasi pembayaran atau penerimaan kas di masa datang sepanjang perkiraan umur instrumen keuangan tersebut atau, jika lebih tepat untuk masa yang lebih singkat untuk nilai tercatat bersih dari aset keuangan atau liabilitas keuangan.

Perhitungan dilakukan dengan memperhitungkan seluruh syarat dan ketentuan kontraktual dari instrumen keuangan dan biaya tambahan yang timbul secara langsung untuk instrumen tersebut dan merupakan bagian tidak terpisahkan dari tingkat imbal hasil.

Apabila manfaat pensiun lebih kecil dari pada manfaat menurut UU Cipta Kerja No. 11/2020, maka Bank dan Entitas Anak membayar kekurangan tersebut.

Program pensiun berdasarkan UU Ketenagakerjaan adalah program imbalan pasti karena UU Ketenagakerjaan menentukan rumus tertentu untuk menghitung jumlah minimum imbalan pensiun. Program pensiun iuran pasti adalah program pensiun yang iurannya ditetapkan dalam peraturan dana pensiun dan seluruh iuran serta hasil pengembangannya dibukukan pada rekening masing-masing peserta sebagai manfaat pensiun sebagaimana tercantum dalam UU No. 4 tahun 2023 tanggal 12 Januari 2023 tentang Pengembangan dan Penguatan Sektor Keuangan.

Pension liability (continued)

Bank Mandiri and Subsidiaries' pension liability have been calculated by comparing the benefit that will be received by an employee at normal pension age from the Pension Plans with the benefit that will be received as stipulated under the Employment Law No. 13/2003 which has been updated using the Employment Regulations No. 11/2020 as amended by UU No. 6/2023 regarding Government In Lieu Of Law No. 2 Of 2022 regarding Stipulation Employment Regulations Become Law based on the Collective Labor Agreement which was renewed at the end of 2021 after deducting accumulated employee contributions and the results of its investments. If the pension benefit from the Pension Plans is less than the benefit as required by the Employment Regulations No. 11/2020, the Bank and Subsidiaries will have to pay such shortage.

The pension plan based on the Labor Law is a defined benefit plan because the Labor Law sets a certain formula to calculate the minimum pension benefit. A defined contribution plan is a pension plan that defines an amount of pension contribution based on pension fund regulation and all contribution including investment return are recorded in its account's member as pension benefit as stated in Law No. 4 year 2023 dated 12 January 2023 regarding Development and Strengthening Financial Sector.

The defined benefit pension liability recognised in the consolidated statement of financial position is the present value of the defined benefit obligation at the consolidated statement of financial position date less the fair value of plan assets, adjusted with unrealised actuarial gains or losses and past service cost. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method on a regular basis for periods not exceeding one year. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the discount rate of government bonds' yield that are denominated in the currency in which the benefit will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Therefore, the transaction is recognised at carrying value based on the pooling of the interest method. The difference between the total consideration received or paid and the carrying amount of investment is recorded under equity and presented as a component of additional paid in capital.

In the Parent Entity financial information, the Bank records its investment value in the new entity at cost using the predecessor value, where the investment is recorded at book value.

ao. Non-current assets and liabilities (or disposal group) held for sale

Non-current assets (or disposal groups) held for sale are assets whose carrying amount will be recovered primarily through a sale transaction rather than through continued use in the business, and their sale is highly probable. These assets are recorded at the lower of carrying amount and fair value, with fewer costs to sell, except for assets such as deferred tax assets, assets related to employee benefits, and financial assets, which are specifically exempted.

Non-current assets (or disposal groups) held for sale are not depreciated or amortised while classified as held for sale. Impairment losses on non-current assets (or disposal groups) held for sale are recognised in the income statement as the difference between the carrying amount and the fair value less costs to sell. Gains on the difference between the carrying amount and the fair value, less costs to sell, are recognised in the income statement up to the amount of any previously recognised impairment loss.

Non-current assets (or disposal groups) held for sale are presented separately from other assets in the statement of financial position, and liabilities (or disposal groups) held for sale are presented separately from other liabilities in the statement of financial position.

**3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN
AKUNTANSI YANG PENTING**

Beberapa estimasi dan asumsi dibuat dalam rangka penyusunan laporan keuangan konsolidasian dimana dibutuhkan pertimbangan manajemen dalam menentukan metodologi yang tepat untuk penilaian aset dan liabilitas.

Manajemen membuat estimasi dan asumsi yang berimplikasi pada pelaporan nilai aset dan liabilitas atas tahun keuangan satu tahun ke depan. Semua estimasi dan asumsi yang diharuskan oleh Standar Akuntansi Keuangan di Indonesia adalah estimasi terbaik serta berdasarkan pada standar yang berlaku. Estimasi dan pertimbangan dievaluasi secara terus menerus dan berdasarkan pengalaman masa lalu dan faktor-faktor lain termasuk harapan atas kejadian yang akan datang.

Walaupun estimasi dan asumsi ini dibuat berdasarkan pengetahuan terbaik manajemen atas kejadian dan tindakan saat ini, hasil yang timbul mungkin berbeda dengan estimasi dan asumsi semula.

Sumber utama ketidakpastian estimasi

a. Cadangan kerugian penurunan nilai aset keuangan

Evaluasi atas kerugian penurunan nilai aset keuangan yang dicatat pada biaya perolehan diamortisasi dan efek utang yang diklasifikasikan sebagai nilai wajar melalui pendapatan komprehensif lain dijelaskan di Catatan 2c.

Cadangan kerugian penurunan nilai terkait dengan pihak lawan spesifik dalam seluruh cadangan kerugian penurunan nilai dibentuk atas tagihan yang penurunan nilainya dievaluasi secara individual berdasarkan estimasi terbaik manajemen atas nilai tunai arus kas yang diharapkan akan diterima. Dalam menghitung cadangan kerugian penurunan nilai, manajemen membuat pertimbangan mengenai kondisi keuangan dari pihak lawan dan nilai neto yang dapat direalisasi dari agunan yang diterima. Setiap aset yang mengalami penurunan nilai dievaluasi dan strategi penyelesaiannya serta estimasi arus kas yang dinilai dapat diperoleh kembali dan disetujui secara independen oleh *Credit Risk Management Unit*.

Evaluasi cadangan kerugian penurunan nilai secara kolektif meliputi kerugian kredit yang melekat pada portofolio tagihan dengan karakteristik ekonomi yang serupa ketika terdapat kenaikan risiko kredit yang signifikan atau terdapat bukti objektif bahwa telah terjadi penurunan nilai tagihan dalam portofolio tersebut, namun penurunan nilai secara individu belum dapat diidentifikasi.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Several estimates and assumptions are created in the preparation of the consolidated financial statements in which management judgment is required in determining the methodology in the valuation of assets and liabilities.

Management makes estimation and assumptions that affect the reported amounts of assets and liabilities within the one next financial year. All estimation and assumptions required in conformity with Statement of Financial Accounting Standard are the best estimation undertaken in accordance with the applicable standards. Estimation and judgements are evaluated on a continuous basis, and are based on past experience and other factors, including expectations with regard to future events.

Although these estimates and assumptions are based on management's best knowledge of current events and activities, actual results may differ from those estimates and assumptions.

Key sources of estimation uncertainty

a. Allowances for impairment losses of financial assets

Evaluation of impairment losses on financial assets which is recognised at amortised cost and debt securities classified as fair value through other comprehensive income are described in Note 2c.

Allowance for impairment losses related to a specific counterparty as part of the entire allowance for impairment losses are established for receivables that are individually evaluated for impairment based on management's best estimate of the present value of cash flows expected to be received. In calculating the allowance for impairment losses, management makes judgements regarding of the financial condition of the counterparty and the net realizable value of the collateral received. Each impaired asset is evaluated, and its settlement strategy and estimation of cash flows considered recoverable are independently approved by the Credit Risk Management Unit.

Collectively assessed impairment allowances cover credit losses inherent in portfolios with similar economic characteristics when there is a significant increase in credit risk or objective evidence to suggest the impairments are exist within the portfolio, but the individual impaired items cannot yet be identified.

**3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN
AKUNTANSI YANG PENTING (lanjutan)**

Sumber utama ketidakpastian estimasi (lanjutan)

**a. Cadangan kerugian penurunan nilai aset
keuangan (lanjutan)**

Dalam menentukan perlunya untuk membentuk cadangan kerugian penurunan nilai secara kolektif, manajemen mempertimbangkan faktor-faktor seperti kualitas kredit, besarnya portofolio, konsentrasi kredit, dan faktor-faktor ekonomi. Dalam mengestimasi cadangan yang dibutuhkan, asumsi-asumsi dibuat untuk menentukan model kerugian ekspektasian dan untuk menentukan parameter input yang diperlukan, berdasarkan pengalaman historis, kondisi ekonomi saat ini, dan prakiraan kondisi ekonomi di masa mendatang (*forecasting*). Ketepatan dari cadangan ini bergantung pada seberapa tepat estimasi arus kas masa depan untuk menentukan cadangan individual serta asumsi model dan parameter yang digunakan dalam penentuan cadangan kolektif.

b. Menentukan nilai wajar instrumen keuangan

Dalam menentukan nilai wajar aset dan liabilitas keuangan yang tidak mempunyai harga pasar, Grup menggunakan teknik penilaian seperti yang dijelaskan dalam Catatan 2c untuk instrumen keuangan yang tidak diperdagangkan secara aktif dan memiliki informasi harga yang terbatas, nilai wajar yang kurang objektif dan membutuhkan berbagai tingkat penilaian tergantung pada likuiditas, konsentrasi, faktor ketidakpastian pasar, asumsi harga, dan risiko lainnya.

c. Imbalan pensiun

Program-program pensiun ditentukan berdasarkan perhitungan dari aktuaria. Perhitungan aktuaria menggunakan asumsi-asumsi seperti tingkat diskonto, tingkat pengembalian investasi, tingkat kenaikan gaji, tingkat kematian, tingkat pengunduran diri dan lain-lain (Catatan 2ai dan 51). Perubahan asumsi ini akan mempengaruhi nilai liabilitas pensiun.

Grup menentukan tingkat diskonto yang sesuai pada akhir periode pelaporan, yakni *zero coupon bond* yang digunakan untuk menentukan nilai kini arus kas keluar masa depan estimasian yang diharapkan untuk menyelesaikan liabilitas pensiun.

Dalam menentukan tingkat suku bunga yang sesuai, Grup mempertimbangkan imbal hasil obligasi pemerintah yang didenominasikan dalam mata uang imbalan akan dibayar dan memiliki jangka waktu yang serupa dengan jangka waktu liabilitas pensiun yang terkait. Asumsi kunci liabilitas pensiun lainnya sebagian ditentukan berdasarkan kondisi pasar saat ini.

**3. USE OF CRITICAL ACCOUNTING ESTIMATES AND
JUDGEMENTS (continued)**

Key sources of estimation uncertainty (continued)

**a. Allowances for impairment losses of financial
assets (continued)**

In determining the need to establish allowance for collective impairment, management considers factors such as credit quality, size of portfolio, credit concentrations, and economic factors. In estimating the required allowance, the assumptions made to determine expected default and loss model and to determine the required input parameters which are based on historical experience and estimated future economic conditions (forecasting). The accuracy of this allowance depends on how precise the estimated future cash flows to determine the individual allowance and the model assumptions and parameters used in determining collective allowance.

b. Determining fair values of financial instruments

In determining the fair value for financial assets and financial liabilities for which there is no observable market price, the Group uses the valuation techniques as described in Note 2c for financial instruments that are traded infrequently and have limited pricing information, fair value is less objective and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks.

c. Pension benefits

Pension programs are determined based on actuarial valuation. The actuarial valuation uses assumptions such as discount rate, expected rate of return on investments, future salary increases, mortality rate, resignation rate and others (refer to Note 2ai and 51). Any changes in those assumptions will impact the liability balance of employee benefit obligations.

The Group determines the appropriate discount rate at the end of each year, which is the zero coupon bond that used to determine the present value of estimated future cash outflows expected to settle the pension obligations.

In determining the appropriate discount rate, the Group considers the government bonds' yields denominated in currency and have similar period with payments that will be made and have terms to maturity approximating the terms of the related employee benefit liability. Other key assumptions for pension obligations mostly are determined based on current market conditions.

d. Kontrak asuransi

Entitas anak mendasarkan asumsi dan estimasinya pada parameter yang tersedia saat laporan keuangan disusun. Namun, keadaan yang ada dan asumsi tentang perkembangan di masa depan dapat berubah akibat perubahan pasar atau keadaan yang muncul di luar kendali Entitas Anak. Perubahan semacam itu akan tercermin dalam asumsi saat perubahan tersebut terjadi.

Sejak tanggal 1 Januari 2025

PSAK 117 berlaku untuk kontrak asuransi yang diterbitkan, kontrak reasuransi yang diterbitkan (bisnis masuk), kontrak reasuransi yang dimiliki (bisnis keluar), dan kontrak investasi dengan fitur partisipasi diskresioner, asalkan Entitas Anak juga menerbitkan kontrak asuransi.

Contractual Service Margin ("CSM")

Entitas Anak melakukan estimasi signifikan dalam pengukuran *Contractual Service Margin (CSM)* dalam penilaian liabilitas asuransi. CSM mewakili laba yang belum direalisasi atas kontrak asuransi dan diamortisasi secara sistematis selama periode pertanggungan.

Estimasi yang digunakan dalam penentuan CSM mencakup proyeksi arus kas masa depan, asumsi tingkat diskonto, estimasi penyesuaian risiko dan asumsi lainnya seperti mortalitas, morbiditas, dan persistensi.

Perubahan asumsi atau estimasi ini dapat berdampak signifikan terhadap jumlah CSM yang diakui. Entitas Anak melakukan tinjauan dan pembaruan estimasi secara berkala, setidaknya setiap akhir periode pelaporan, sesuai dengan perkembangan informasi dan pengalaman aktual

Probability-weighted atas proyeksi arus kas masa depan

Perkiraan arus kas masa depan mencerminkan pandangan Entitas Anak terhadap kondisi saat ini pada tanggal pelaporan, dan perkiraan terhadap variabel pasar yang relevan konsisten dengan harga pasar yang dapat diamati.

Dalam memperkirakan arus kas masa depan, Entitas Anak mempertimbangkan ekspektasi saat ini terhadap peristiwa masa depan yang mungkin mempengaruhi arus kas tersebut.

**3. USE OF CRITICAL ACCOUNTING ESTIMATES AND
JUDGEMENTS (continued)**

Key sources of estimation uncertainty (continued)

d. Insurance contracts

The Subsidiary based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Subsidiary. Such changes are reflected in the assumptions when they occur.

Since 1 January 2025

PSAK 117 applies to insurance contracts issued, reinsurance contracts issued (inward business), reinsurance contracts held (outward business) and investment contracts with discretionary participation features provided the The Subsidiary also issues insurance contracts.

Contractual Service Margin ("CSM")

The Subsidiary makes significant estimates in measuring the Contractual Service Margin (CSM). The CSM represents the unearned profit for insurance contracts and is systematically amortized over the coverage period.

The estimates used in determining the CSM include Projections of future cash flows, discount rate assumptions, risk adjustment estimates and other assumptions such as mortality, morbidity, and persistency.

Changes in these assumptions or estimates may have a significant impact on the amount of CSM recognized. The Subsidiary reviews and updates its estimates periodically, at least at each reporting date, in line with emerging experience and updated information.

Probability-weighted estimates of future cash flows

The estimates of future cash flows reflect the Subsidiary's view of current conditions at the reporting date and estimates of any relevant market variables are consistent with observable market prices.

When estimating future cash flows, the Subsidiary takes into account current expectations of future events that might affect those cash flows.

d. Kontrak asuransi (lanjutan)

Sejak tanggal 1 Januari 2025 (lanjutan)

Probability-weighted atas proyeksi arus kas masa depan (lanjutan)

Ada berbagai asumsi ekonomi dan non-ekonomi yang digunakan sebagai masukan dalam proses perkiraan arus kas masa depan, termasuk, namun tidak terbatas pada, asumsi operasional seperti morbiditas, mortalitas, persisten, dan biaya, serta asumsi ekonomi seperti *risk free rates* dan *illiquidity premium*.

Penyesuaian risiko untuk risiko non-keuangan

Pengukuran penyesuaian risiko harus mencerminkan kompensasi yang diperlukan oleh Entitas Anak untuk menanggung ketidakpastian terkait jumlah dan waktu arus kas masa depan yang timbul dari risiko non-keuangan saat Entitas Anak memenuhi kontrak asuransi.

Asumsi biaya yang digunakan dalam perkiraan arus kas masa depan

Entitas Anak memperkirakan perkiraan biaya masa depan yang berkaitan dengan pelaksanaan kontrak menggunakan tingkat biaya saat ini yang disesuaikan dengan inflasi. Sebagian besar biaya diakui sebagai biaya yang dapat diatribusikan (biaya langsung) yang terdiri dari biaya akuisisi dan pemeliharaan, kecuali biaya litigasi dan Tanggung Jawab Sosial Perusahaan (CSR) yang mana diklasifikasikan sebagai biaya yang tidak dapat diatribusikan.

Tingkat diskonto

Entitas anak akan menerapkan pendekatan *bottom-up* dengan menggunakan kurva imbal hasil yang konsisten dengan pasar berdasarkan suku bunga bebas risiko dan penerapan premi illikuiditas

Sebelum tanggal 1 Januari 2025

Liabilitas kepada pemegang polis (manfaat polis masa depan dari produk non-unit link dan estimasi liabilitas klaim) Entitas Anak dicatat di laporan posisi keuangan konsolidasian sebagai bagian dari liabilitas kontrak asuransi berdasarkan perhitungan aktuaris dengan menggunakan asumsi aktuarial yaitu asumsi estimasi terbaik dan margin atas risiko pemburukan.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

Key sources of estimation uncertainty (continued)

d. Insurance contracts (continued)

Since 1 January 2025 (continued)

Probability-weighted estimates of future cash flows (continued)

There is a wide range of economic and non-economic assumptions that are used as inputs in the future cash flows estimation process including, but not limited to, operating assumptions such as morbidity, mortality, persistency and expenses, and economic assumptions such as *risk free rates* and *illiquidity premium*.

Risk adjustment for non-financial risk

The measurement of risk adjustment should reflect the compensation required by the Subsidiary for bearing the uncertainty around the amount and timing of the future cash flows that arises from non-financial risk as the Subsidiary fulfils insurance contracts.

Expense assumption used in future cash flow estimation

The Subsidiary estimates future cost projections related to contract execution using the current cost rate adjusted for inflation. Most costs are recognized as attributable costs (direct costs) consisting of acquisition and maintenance costs, except for litigation costs and Corporate Social Responsibility (CSR) costs, which are classified as non-attributable costs.

Discount rates

The subsidiary will adopt a bottom-up approach using a market consistent yield curve based on risk free rate and applying illiquidity premium.

Before 1 January 2025

Liabilities to policyholders (future policy benefits from non-unit linked products and estimated claim liabilities) of Subsidiaries are recorded in the consolidated statement of financial position as part of insurance contract liabilities based on actuarial calculations using actuarial assumptions, which is the best estimate assumptions and margin for risk of deterioration.

Sumber utama ketidakpastian estimasi (lanjutan)

e. Aset pajak tangguhan

Aset pajak tangguhan diakui atas seluruh perbedaan temporer yang dapat dikurangkan, sepanjang besar kemungkinannya bahwa penghasilan kena pajak akan tersedia sehingga perbedaan temporer tersebut dapat digunakan. Estimasi signifikan oleh manajemen disyaratkan dalam menentukan jumlah aset pajak tangguhan yang dapat diakui, berdasarkan saat penggunaan dan tingkat penghasilan kena pajak serta strategi perencanaan pajak masa depan. Bank tidak memperhitungkan sebagian manfaat aset pajak tangguhan karena manajemen Bank berpendapat bahwa aset pajak tangguhan tersebut tidak dapat terpulihkan di masa yang akan datang.

f. Penyusutan dan estimasi umur manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen Bank mengestimasi masa manfaat ekonomis aset tetap antara 4 (empat) sampai dengan 20 (dua puluh) tahun.

Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi.

Nilai tercatat atas aset tetap Bank diungkapkan pada Catatan 18.

g. Penurunan nilai aset non-keuangan

Bank Mandiri dan Entitas Anak mengevaluasi penurunan nilai aset non-keuangan apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat aset non-keuangan tidak dapat dipulihkan kembali. Faktor-faktor penting yang dapat menyebabkan penurunan nilai aset non-keuangan adalah sebagai berikut:

- Performa yang tidak tercapai secara signifikan terhadap ekspektasi historis atau proyeksi hasil operasi di masa yang akan datang;
- Perubahan yang signifikan dalam cara penggunaan aset atau strategi bisnis secara keseluruhan; dan
- Industri atau tren ekonomi yang secara signifikan bernilai negatif.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

Key sources of estimation uncertainty (continued)

e. Deferred tax assets

Deferred tax assets are recognised for all deductible temporary differences, as long as taxable income most likely will be available so that the temporary differences can be utilised. Significant estimation by management are required in determining the amount of deferred tax assets that can be recognised, based on utilisation period and the level of taxable income and future tax planning strategies. The Bank does not consider some of the benefits of deferred tax assets as management believes that those part of deferred tax assets will not be recoverable in the future.

f. Depreciation and estimated useful life of fixed assets

Cost of acquisition of fixed assets are depreciated using the straight-line method based on their estimated economic useful life. Bank's management estimates the useful lives of the fixed assets between 4 (four) to 20 (twenty) years.

Changes in the level of usage and technological developments could affect the economic useful lives and residual value of assets, and therefore future depreciation charges may be revised.

The carrying value of the Bank's fixed assets is disclosed in Note 18.

g. Impairment of non-financial assets

Bank Mandiri and its Subsidiaries assess impairment of non-financial assets whenever there are events or changes in circumstances indicate that the carrying value of non-financial assets cannot be recovered. Important factors that could cause impairment of non-financial assets are as follows:

- Performance is not achieved significantly against historical expectations or projected operating results in the future;
- A significant change in the way of the asset usage or the overall business strategy; and
- Industry or economic trends are significantly negative.

g. Penurunan nilai aset non-keuangan (lanjutan)

Manajemen Bank dan Entitas Anak mengakui kerugian penurunan nilai apabila nilai tercatat aset melebihi nilai terpulihkannya. Nilai terpulihkan adalah nilai yang lebih tinggi antara nilai wajar dikurang biaya pelepasan dengan nilai pakai aset (atau unit penghasil kas). Nilai terpulihkan diestimasi untuk aset individual atau, jika tidak memungkinkan, untuk unit penghasil kas yang mana aset tersebut merupakan bagian daripada unit tersebut.

h. Revaluasi atas nilai wajar tanah

Grup menggunakan spesialis penilai independen untuk menilai nilai wajar atas tanah. Tanah dinilai berdasarkan referensi atas bukti berdasarkan pasar, menggunakan nilai yang dapat diukur setelah disesuaikan dengan faktor pasar spesifik seperti lokasi dan kondisi dari tanah.

i. Menentukan jangka waktu kontrak dengan opsi perpanjangan dan penghentian kontrak - Grup sebagai penyewa

Grup menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk menghentikan sewa, jika cukup wajar untuk tidak dilakukan.

Grup memiliki beberapa kontrak sewa yang mencakup opsi perpanjangan dan penghentian jangka waktu sewa. Grup menerapkan penilaian dalam mengevaluasi apakah dapat dipastikan jika akan menggunakan opsi untuk memperpanjang atau menghentikan sewa. Hal tersebut dilakukan dengan mempertimbangkan seluruh fakta dan keadaan yang relevan yang memberikan insentif ekonomi untuk melakukan perpanjangan atau penghentian sewa. Setelah tanggal dimulainya, Grup menilai kembali masa sewa, jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali dan mempengaruhi apakah penyewa cukup pasti untuk mengeksekusi opsi memperpanjang atau menghentikan sewa.

g. Impairment of non-financial assets (continued)

The Management of the Bank and its Subsidiaries recognise an impairment loss if the carrying amount of the asset exceeds its recoverable amount. Recoverable amount is the higher value between the fair value minus costs of disposal and the value in use of the asset (or cash-generating unit). Recoverable amount is estimated for individual assets or, if not possible, for the cash-generating unit in which the asset is part of the unit.

h. Revaluations of land

The Group engaged independent valuation specialists to assess fair value of land. Lands were valued by reference to market-based evidence, using comparable prices adjusted for specific market factors such as location and condition of land.

i. Determine the contract term with options for extension and termination of the contract - the Group as lessee

The Group determines the lease term as the term of the lease that cannot be canceled, together with the period covered based on the option to extend the lease if it is determined to be exercised, or any period covered by the option to terminate the lease, if it is reasonably not to do so.

The Group has several lease contracts that include options for extension and termination of the lease terms. The Group applies its judgment in evaluating whether it is certain to exercise the option to extend or terminate the lease. This is done by considering all relevant facts and circumstances that provide economic incentives to extend or terminate the lease. After the commencement date, the Group reassesses the lease term, if there is a significant event or change in circumstances which is under its control and affects whether the lessee is certain enough to exercise the option to extend or terminate the lease.
